If you treat the 8874's carefully and run them with minimal grid current,
and avoid overdriving, they will last you indefinitely. I had an Alpha 78 that I purchased from the original owner that was about 20 years old and was running the original set of tubes, with full power out.

Although you can get over legal limit p.o.with the 76PA, it was not designed for running this type of power. Keeping it to 1200-1300 W out, or less, with <50-75 ma total grid current should keep those tubes going for many, many years. One tip - go inside about once every 6 months (sooner if you operate it heavily) and blow out the dust that accumulates in the plate fins. They're very close spaced and tend to get blocked up with dust, and lead to overheating. The thing that kills these tubes are excessive grid current and overheating. And yes, they've gotten expensive since I think Eimac is not producing large quantities anymore due to the popularity of the 3CX800A7. I suspect eventually that the whole 8873/74/75 line will be discontinued since they are not used much commercially anymore, if at all. As stated, Svetlana is making the 8874, but they've priced it about the same as the Eimac. - Bob, K3AC

2. Heathkit SB1000

I'm considering Heathkit SB1000 for my first HF Amp. I've been looking and still not sure what to purchase. I'm looking for an AMP that will do 10-160 / WARC / MARS / SHARES frequencies. Don't have a lot of $$$.

What is your recommendation on the Heathkit SB1000 HF Amp. Other Amps I should consider? Price around $550 since this is the cost of the Heathkit SB1000.

Thank you for your help and assistance.

Happy New Year.

-----For Sale-----
Kenwood TS-830S 160-10m HF Transceiver,
later series with gold nameplate,
s/n 4090058. This radio is very clean,
only a few light paint scratches
on the top and sides keep this radio
from being "mint"...the front panel,
knobs, digital display, meter, etc, are
all flawless. I do not have the optional
CW filter in it, it has of course a
built-in AC power Supply, all WARC bands,
100+ watts output, etc...i have the manual,
and the original box.. **** $ 440. ****
I'll go 50/50 on the shipping to 48 states.
I'm willing to give you an on-the-air demo
too, on 160-40m.. or 10m if your local...
I am located in Croswell, Michigan.

Body handling: Binary attachment payload not displayed: wilson.jpg

FOR SALE: Wilson Mark IV VHF Handheld Transceiver ($30 + shipping)

This is an older VHF (2 meter) ham radio (see attached picture below).
Would make an excellent portable backup, emergency or packet radio. The
radio is in working condition, however, I do not have the antenna,
charger or owner's manual. It features:

+ 6 channels (crystal controlled -- see frequencies below)
+ Tone squelch decode
+ DTMF keypad (touch tone dialer)
+ HI/LO power switch
+ External Mic/Speaker
+ 11v, 500ma NICAD battery (last replaced 9/14/91)

Crytals included: 146.520, 146.670, 147.285, 147.165, 146.625 and
147.060 MHz

$30 plus shipping

If you're interested, please send e-mail to kc4vnu@nospamjuno.com (just
remove the "nospam" from the reply address to send e-mail to me).

Hello, I have the following for sale.

Eico Model 720 Transmitter. good condition cabinet could use
repainting, complete and everything lights thats supposed to but I
never put it to an antenna.
$50.00 plus shipping.

Modulator, push pull 6L6 output. Collins modulation transformer. I
don't know if this was home built but is complete. Components mounted
on a U shaped chassis 13"X6" . $40.00 plus shipping (has power supply
built on board so its heavy for the size, 20lb).

Home built 80 meter VFO. whoever built this new what they were doing.
Looks good, works great. Very stable. Tunes across most of the 80
meter band. Has pl259 connector as RF output with coax terminated with
gutted FT243 crystal case. Just plug into your crystal connector and
tune.
$25.00 plus shipping

Galaxy III Transeiver. Good condition, (I have a photo of this radio
on my web page) cabinet has been repainted. About 180watts PEP output.
S meter deflects on only strong signals but receiver works fine.
This is a 80,40, 20 meter SSB transeiver.
$50.00 plus shipping.

Lafayette HE35 6 meter transeiver. This little radio has been modified
with extra switches and meter installed in the front panel. does work
though. With microphone.
Needs crystal for transmit (8mhz) but receiver has built in VFO.
$15.00 plus shipping

Palomar mobile HFamplifier. about 300 watts PEP, Solid state. Front
panel has selector knob for 80-10 meters. This amp had a receiver
preamp but previous owner had removed it.
$50.00 plus shipping

Henry Electronics 2 meter amp
12 volt mobile
5 to 20 watts in has 80 watts out.
Does not have correct power cord.
$45.00 plus shipping

Mikes:
ElectroVoice 630 microphone, I don't think this mike was ever used.
With new amphenol connector.

Shure model 55S microphone with connector, in Shure Microphone
drawstring bag.

ElectroVoice 719 good condition.
I honestly don't know what these are worth so make (fair) offer.

Bud Codemaster oscillator .
good condition and works. Front panel has Pitch and Volume knobs.
2 tube oscillator in metal case.
$15.00 plus shipping

TUBES:
2 ea. 235 globe 4.00 ea.
4 ea. 24A ST 4.50 ea
5 ea. 27 ST 2.00 ea.
1 ea. 280 ST 10.00
2 ea. 35 ST 2.00 ea.
These are used and test good.

If you need any info on these items please email me. My zip is 70058

I HAVE A ALPHA 76A , WHICH I AM THE SECOND OWNER, AND THE AMP IS
ABOUT 12 YRS OLD, WITH THE ORIGINAL TUBES INTACT, IT STILL PUTS OUT
FULL POWER, AND THE ORIGINAL OWNER HAVE , "WORKED THEM ALL"
AWARD FROM ARRL, USING THIS AMP. YES THE TUBES ARE VERY PRICEY,
AND NOT EASY TO FIND AT HAMFESTS, BUT THEY CAN BE FOUND. THIS IS ALL THE
ADVICE I CAN GIVE YOU EXCEPT BUYER BE WARE,
PS. I HAVE BEEN USING THE AMP FOR THE LAST 5 YEARS WITH FAULTLESS
SERVICE. BILL KE3A

Am looking for a repeater controller.Would need to have voice synthesizer
and autopatch is not a necessary thing. Would be willing to buy if it is
under 250.00 or above that price mark I would be interested in trading some
gear.

Available gear:
ic 727?? i don't remember the mod # but believ that's it. it's hf + 6m
hasonly been used for maybe 20 bours at one field day about 3 years ago.

Also have dualband ht's available:
ic-w2a
standard c-528a
Both have batts, and some other misc accessories.

also have dualband commercial mobile.
alinco ald-24t
single band rx at one time. comes with tt mic.

anything interest you???? let me know. de RodEkholm Jr.

Naah, I'm just still overwhelmed with doctorate (ministry) work and can't even make the time to get the necessary 230 line run into the shack! It was easier to do the trade and get the gear up and running. Sure appreciate all of the help! I learned a lot! 73, DavidC AA1FA

Hello To All,

I am selling a Cushcraft 10 meter magnet mount antenna (Model CS-28M) in Brand New Condition. I purchased this in anticipation of putting a 10 mtr rig in my truck but the deal fell through. I have used this antenna ONCE.

HRO PRICE: $59.95
****YOUR COST $39.95*** plus shipping

Thank-you for reading my ad.

I am trying to repair a Regency HR-2A 2m crystal rig. Want to peak the TX
and RX and try to 'pull' a couple of the crystal pairs to a local Repeater.
I'm going to keep it in the car for a
bang-around-don't-care-if-someone-steals-it-occasional-use-rig ... though
once they look at it they'll not be interested! :-)

Thanks for any help!

27. FS: Three 5V 200A power supplies

Newsgroup: rec.radio.amateur.swap
Date: 1998-01-07 00:00:00 UTC
From: DavidC <davidc@bit-net.com>
Message-ID: <01bd1b21$01cfaca0$098a92d0@bitnet.bit-net.com>
Source record: 10522
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.swap

I have three 5V 200A power supplies (amazingly small, about 12" deep x 5" wide x 8" high, though very solid and heavy). They weigh approx. 15 pounds each.

They are JETA Power Systems, Inc. Model G1001-1
Label says Input: 3 phase 208v 3.5a 47-400hz,
OR 230v 9.6a 47-60hz
Output: 5v 200a

Each unit has its own built in fan, massive plated connection posts, etc.

(Several of the wonderful Hams here on the newsgroups have provided wonderful info. as to how I might tie them together for a massive 12v 200 amp supply - thanks again! I'm not going to do that project, but someone else can - I'll include your suggestions with the supplies!)

I have arranged to acquire a supply that is designed to provide 12v at all of the current I could ever want, so I am selling these. I am told that many people are now discovering that these (screwdriver) adjustable 5v supplies with high amperage are very valuable to have (or to use via the tied-together-for-a-massive-12vdc-supply-thing).

I may keep one, just in case I discover a need down the road! :-)

I'm asking $75. plus actual shipping for each.

Would anyone advise me on the pin out of a GE master 2 control cable plug<at the radio>. I don't have a cable and need to know where i need to put positive and negative connections to the front of the radio as i am using an internal repeater controller <nhrc-3 mii-90> and have deleted the control head.

I realize the two large pins are + and -, but the smaller pins must have a pos and neg. pin in there somewhere.

Thanks for any help!!
please e-mail responses....

For Sale:
Drake 2A Reciever and 2AQ Q-Multiplier/
Speaker. Both are excellent condition, everthing
is original, no mods. 2AQ is cosmetically perfect.
The 2A has one small paint scratch on right side
at the rear, everything else including all knobs,
switchs, front panel lettering, is perfect. There
is some dust inside, I've never had the cabinet off.
Everthing works fine, except the senisitivy on
15m -10m is kinda low. This set has optional crystals
for coverage of all of the 10m band and 26.9 - 27.5 Mhz.
Includes original manual. 2A s/n is 816. It also has
the 2AC xtal calibrator.
I also have a new boxed 6BZ6 and 6BE6, that I never got
around to trying in the set (to bring up 10m sensitivity.)

$165. for the set, plus $10. shipping usa/48

Where are you located at?? Get with me in email and I'll have the info
you need by then...yes there is a +DC input for the exciter and
the rcvr (the 7amp fused feed to the control head) that uses the
smaller pins...the large pins are for the PA only

I would like to acquire a basic phone patch to allow me to couple my SW receivers to the phone line. I would prefer to buy one here in Canada to make the shipping easier, but will entertain offers from the US, as well.

Thanks,
Walt

Posting for a friend who doesn't have net access. This is a rackmount monitor, apparently used to monitor signals from two receivers used in diversity mode. 3" CRT display and many controls. The unit is in fair cosmetic condition, and had apparently had several mods made at one time or another. Untested. US$125 OBO + shipping.

I have a pair of Radio Shack PRS-101 GMRS transceivers for trade. The radio are hardly used. They are ten channel, switchable 0.9 and 2 watts, complete with battery chargers for each. Jack for speaker mic or headset. New, they were $179.00 each. I would like to trade them for either:

1) a 9600 baud TNC or
2) a Yaesu VX-1R or
3) a Ranger 2950 or
4) a 6M mobile, especially interested in the Yaesu FT-690 or
5) an Index Labs QRP+ transceiver

If you have one of the above items and are interested in a trade, please contact me via e-mail. Thanks.

Daniel,
I hate to burst your bubble but what you have is worthless. I suggest you check out some on line motherboard suppliers and you'll see you can get a motherboard for around $80.00 but unfortunately because what you have is a coimpaq they made special connector and such. Its just not supportable.

tony

I have for sale a Kenwood TS-530 HF Rig with the
optional YK-88-CN CW filter installed. The frequency range
is 100-10 meters sideband and CW. It uses a pair of 6146Bs for
finals for an output of 220W PEP sideband and 180W CW.
Only other tube is the driver tube, and the rest is solid state.
It has a digital readout, and features RIT/XIT, IF shift, Noise
Blanker and VOX. Will include an MFJ 300W tuner.

Also for sale is a Vibroplex Brass Racer keyer $50 (excellent condition)

NEW Only 5 days old -

Reason for selling? I'm NOT close enough to the repeaters for reliable communications for the low wattage output of the radio. Radio HAS NOT been modified!

I HAVE sent in the warranty card! However I will take care of the purchaser for 1 year providing the buyer sends me the radio and pays for shipping should the need arise.

Purchased for $119.00

Sell for $90 plus $10 for shipping
I have purchased a Carrying Bag/Camera Bag for radio cost me $25 sell for additional $15 if interested.

73. Price Reduced IC-761 and IC-271H

Newsgroup: rec.radio.amateur.swap
Date: 1998-01-24 00:00:00 UTC
From: Howard Groveman <groveman@home.com>
Message-ID: <34CA6E8E.2298D275@home.com>
Source record: 10474
Cross-posted to: rec.radio.amateur.equipment,alt.ham-radio.arketplace,rec.radio.amateur.swap,rec.radio.swap

I sold the FL-7000 amp and now I've reduced the price on these other 2 cherry units which were hardly used since purchased new.

IC-761 HF built in Tuner, Passband, Notch, SSB Filter - can't tell from new - only thing it needs is a new platic thumb grommet for the removable little "window" metal panel. Original box. Sacrifice $900.

IC-271H 2 meter all mode 100W radio with built-in PS35 power supply, original box $450 takes.

Both for $1300 if you wish, otherwise prices firm.

Pick up in San Diego or you pay shipping. Howard Groveman KD6UU

74. Technical/Math Books FS

Newsgroup: rec.radio.amateur.swap

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for
sale:

1. -----, "SINGLE SIDEBAND FOR THE RADIO AMATEUR," 5th
edition, ARRL, 1970, pbk, G+ with very slight wear.
$10.00

2. Beyer, William H. (ed), "Standard Mathematical Tables,
24th ed.," CRC Press, 1973, hbk, G/G+ with owner's
names inside front cover.
$10.00

3. Cockrell, W.D., "INDUSTRIAL ELECTRONIC CONTROL,"
McGraw-Hill, 1944, G- with slight moisture damage
not immersion). Interesting work on vacuum tube
power control circuitry.
$10.00

4. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND
RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942,
hbk, G- with little wear but damage to bottom of spine.
No markings on pages.
$10.00

5. Crawford, Robert H., "MOSFET IN CIRCUIT DESIGN," McGraw-Hill,
1967, hbk, G+ with intact dust jacket and no markings on
pages.
$15.00

6. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS,"
Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

7. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING,"
1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with
little wear but markings throughout.
$10.00

8. Glasgow, R.S., "PRINCIPLES OF RADIO ENGINEERING," McGraw-Hill,
1936, hbk, G-/G with little shelf wear and owner's name and
notes inside front cover.
$15.00

9. Henney, Keith, "THE RADIO ENGINEERING HANDBOOK," 3rd edition, 4th printing, McGraw-Hill, 1941, hpk, F+/G- with moderate wear on covers and hinges, but heavy wear on spine with 1/2" tear on top. No markings on pages.
$10.00

10. Henney, Keith and Glen A. Richardson, "PRINCIPLES OF RADIO," 6th edition, Wiley, 1952, hbk, G with little wear and some pencil marks throughout.
$12.50

11. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.
$15.00

12. Krauss, Herbert L., Charles W. Bostian, and Frederick H. Raab, "SOLID STATE RADIO ENGINEERING," Wiley, 1980, hbk, G with some shelf wear, owner's name on page edges, and some minor markings on pages. Sells new for $70.00
$40.00

13. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

14. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

15. Orr, William I., "THE RADIO HANDBOOK, 16th ed.," Editors and Engineers, 1962, hbk, G/G+ with little shelf wear and rubbing in spine top and bottom.
$20.00

16. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very little shelf wear.
$15.00

17. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

75. Ceramic Rotary Switches FS

Newsgroup: rec.radio.amateur.swap
Date: 1998-01-24 00:00:00 UTC
From: Christopher Trask <ctrask@primenet.com>
Message-ID: <6ae6gk$rhk@nntp02.primenet.com>
Source record: 10476
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have acquired a large (24" by 24" by 24") box stuffed
with Centralab (Now Electroswitch) ceramic rotary switches,
index assemblies, and switch sections. The bottom of this box
was 1" deep in nuts, washers, and spacers. I am offering them
here for sale at prices well below their current market value.
Prices DO NOT include shipping.

Centralab is one of the oldest names in the electronics in-
dustry, so old that they reportedly supplied the stone that the
original ten commandments were written on. Their ceramic rotary
switches have long been an industry standard for quality.

Get 'em while they last.

INDEX ASSEMBLIES

All index assemblies are 30-degree spacing, ceramic insu-
lation, and are supplied with the shaft nut, shaft washer, stop
washer, (2) wafer screws, (2) fiber washers, (2) lock washers,
and (2) nuts. Ceramic spacers are sold separately.

List Your
Model# Description Price Cost

PA-300 1-3 sections, 2" shaft $17.72 $6.00

PA-302 7-9 sections, 6" shaft $37.72 $12.50

PA-552 7-9 sections, 6" shaft $12.50

CERAMIC SPACERS

These are the spacers needed tp separate the switch sec-
tions when assembling the switch sections below with the index
assemblies above.

1/8" $0.10

3/16" $0.15

1/4" $0.20

1/2" $0.40

1" $0.80

SWITCH SECTIONS

All switch sections are ceramic (steatite) insulation

List Your
Model# Description Price Cost

PA0 1 pole, 1-12 position, $22.03 $5.50
shorting

PA1 1 pole, 1-12 position, $22.03 $5.50
non-shorting

PA2 2 pole, 2-6 position, $23.07 $5.50

I have for sale 2 Cuttler Hammer heavy duty limit switches with levers and rollers, new. These switches sell for over $100 each, my price $20 each, $30 for two. A JPG picture is available.

R.W.Schlachter.

79. FS/FT: Misc Items

Newsgroup: rec.radio.amateur.swap
Date: 1998-01-30 00:00:00 UTC
From: "Jack T.Dragon" <tdragonn@blarg.net>
Message-ID: <6arm2r$6nt$1@guysmiley.blarg.net>
Source record: 10385
Cross-posted to: alt.radio.scanner,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.scanner,rec.radio.swap

I have the following items for sale or for trade.
I'm interested in HT equipment, mics, batteries, etc. I'd
perfer to sell for cash. Make me an offer on what I have.

• 99 call Caller ID box. Shows time, date, caller's name,
and caller's number all simultaneously. And, when not in use,
shows current time and date. Comes in origional box and with
batteries.
• Two 14.4 external fax modems. Both are in working
condition and come with the needed powersupply. One is a
USRobotics Courier with manual, and the other is a Motorola
Fastalk without the manual.
• Red security telephones. These are the wall hanging
phones used in airports and larger hotels. they have no means of
dialing out, but are otherwise fully functional. they'd be great
for use in the garage so you don't have to run through the house
to answer a call, or in the kids room. I have two of them.
• Fone Flasher 2. This is RS's origional. Has a strobe
light that flashes when the phone rings, and a built in ringer.
You can have one of the two, or both simultaneously when the
phone rings. Great out in the shack for when you don't want to
be disturbed by additional sounds.
• Composite computer monitor. This is a left over from
the days of the apple IIc computer. It's monochrome green and
has no internal speaker. It would be great for an on-site display
for video work, amateur video applications, and for video editing.
• 12v 2Ah Sealed Lead Battery. GE Part number 1CVA156.
• Helium neon laser tube and power supply. 1 milliwatt
output. mostly a fun little toy, great for parties.
• Compaq 286/LTE laptop. Backlight display, 1.44meg
floppy drive, internal 2400 modem, modified to run off of ni-cad
C batteries instead of proprietary battery pack, and fully MS-DOS
6.22 compatible. Batteries not included.
• 82mb 3.5" IDE Hard Drives. Tested and none have bad
spots. I have two Maxtor, and one Western Digital.
• 125mb 3.5" IDE Maxtor Hard Drive. Tested and has no bad
spots. These hard drives would be great for adding space to an
existing system, or keeping the kids' homework and games on a
separate drive.
• As a side-note, yes, everything works.

tdragonn@blarg.net

I have the following items for sale or for trade.
I'm interested in HT equipment, mics, batteries, etc. I'm
also interested in radio scanners. Anyone got a Pro-42? I'd
perfer to sell this stuff for cash. Make me an offer on
what I have.

• 99 call Caller ID box. Shows time, date, caller's
name, and caller's number all simultaneously. And, when not
in use, shows current time and date. Comes in origional box
and with batteries.
• Two 14.4 external fax modems. Both are in working
condition and come with the needed powersupply. One is a
USRobotics Courier with manual, and the other is a Motorola
Fastalk without the manual.
• Red security telephones. These are the wall hanging
phones used in airports and larger hotels. they have no means
of dialing out, but are otherwise fully functional. they'd be
great for use in the garage so you don't have to run through
the house to answer a call, or in the kids room. I have two
of them.
• Fone Flasher 2. This is RS's origional. Has a strobe
light that flashes when the phone rings, and a built in
ringer. You can have one of the two, or both simultaneously
when the phone rings. Great out in the shack for when you
don't want to be disturbed by additional sounds.
• Composite computer monitor. This is a left over
from the days of the apple IIc computer. It's monochrome
green and has no internal speaker. It would be great for
an on-site display for video work, amateur video applications,
and for video editing.
• 12v 2Ah Sealed Lead Battery. GE Part number 1CVA156.
• Helium neon laser tube and power supply. 1 milliwatt
output. mostly a fun little toy, great for parties.
• Compaq 286/LTE laptop. Backlight display, 1.44meg
floppy drive, internal 2400 modem, modified to run off of
ni-cad C batteries instead of proprietary battery pack, and
fully MS-DOS 6.22 compatible. Batteries not included.
• 82mb 3.5" IDE Hard Drives. Tested and none have
bad spots. I have two Maxtor, and one Western Digital.

• 125mb 3.5" IDE Maxtor Hard Drive. Tested and has no bad spots. These hard drives would be great for adding space to an existing system, or keeping the kids' homework and games on a separate drive.
• As a side-note, yes, everything works.

86. FS Yaesu HF Station - 707 Series

Newsgroup: rec.radio.amateur.swap
Date: 1998-02-01 00:00:00 UTC
From: banker1NOSPAM@idirect.com
Message-ID: <MPG.f3e8553f6f50ea69896a3@n3.idirect.com>

Hello Everyone,

Does someone out there have any documentation for the following
receivers:

1) Watkins Johnson model 977 30-300 MHz Receiver
2) Communications Electronics Inc. (Became WJ) model 775-3
300-1000 MHz Receiver
3) Racal model RA9217E (I think) 1-30 MHz Receiver

I am willing to pay top dollar for original schematics, operators manuals,
etc. Good quality copies also acceptable. Thanks.

Harold Screven

90. FS: Boatanchor receivers

Newsgroup: rec.radio.amateur.swap
Date: 1998-02-02 00:00:00 UTC
From: Tony White <twhite@cyberramp.net>
Message-ID: <6b5cnirhn1@usenet45.supernews.com>
Source record: 10396
Cross-posted to: dfw.forsale,rec.radio.amateur.swap,rec.radio.amateur.boatanchors

Due to overabundance of projects I am selling the following items:

Hallicrafters SX-28. This GC boatanchor receiver is in very good cosmetic condition, and should be in good working condition. The radio worked great the last time I tried it (I put it in storage several years ago and haven't touched it since). There are a few knobs missing and the meter is broken, but the housing is intact and I have a meter that may work as a relacement movement. No tabletop case. This was used at a VA hospital, I believe, based on what is painted inside the top cover. 110/220 transformer. Includes an original (NOT a reproduction) instruction book. $150 plus shipping.

Hallicrafters SX-104. This 30-50MHz boatanchor receiver is in excellent cosmetic condition and good working condition. $75 plus shipping.

Hallicrafters SX-105. This 152-173 MHz boatanchor receiver is also in excellent cosmetic condition and good working condition. $75 plus shipping.

Realistic DX-75. This GC boatanchor receiver is in very good-excellent cosmetic condition and good working condition. Includes an original (NOT a reproduction) instruction book. This is when Radio Shack was still Radio Shack, and not a Tandy division. $50 plus shipping.

Speical deal: Take all four of the above radios for $300, or buy all three Hallicrafters and get the Realistic for free!

DenTron MT-2000A Antenna Tuner. 3kW PEP antenna tuner. This unit is in good cosmetic and working condition. $150 plus shipping.

These radios are currently located in the D/FW area.

I need to get out of the radio business, so I would prefer outright sale to trades. Delivery possible in north Texas, eastern Oklahoma, or northwest Arkansas. If interested, or for more information, email me at twhite@cyberramp.net. Thank you.

Unfortunately Mark, these will never stop, as never will the force-feeding here of the porno ads. They are all part of mass-mailings, they never see your/our comments of dislike, etc, and am sure they could care less! You do have the ultimate power of control though, throw the power switch! ;-)

GO TO THE SEARCH ENGINES, YELLOW PAGES, OR TRY ASKING A HAM IN PERSON.
most of the people who post on n/g are just bored with no knowlege of of
anything asked.

case in point. i asked for opinions on the ft-8100r. bert was the only
email i got that stated the experience he and his friends had. the other
27 emails said either
"a piece of S%^t " or " dont have one but i like the &*^^%$ i have"

so that means 2 in 29 people have a brain.
And considering this i think me and bert have better things to do.

P.S. what happened to AMOR.

To no one who wanted an answer...

One of the oddest things we do on news groups is expect a straight answer.

Go here to a n.g., ask a question, and an reply will be forthcoming with the absolute best answer to the question we asked.

Great if it were true.

No one owes anyone a straight answer. Never have. Western civilization then has been declining since the ancient Greeks.

What's the best rig? What's the best antenna? - just tell me so I don't have to waste my time like the people who's experience, effort and money spent I'm relying upon, to tell me what's right from wrong.

All the answers start with the coil of a 1934 Ford model A. And some wire.

[Flame me! I love it! Make me write bad checks! Ooooh, I can hardly wait because I'll be blamed for not solving your problems!].

OK, I'm sorry, spend all of your money on a FT-1000D and a 200' tower, and move to a salt marsh, and win the lottery, and, really serious, Floss! damn it, every single day!

73,
N1XNC

PS - I built a Vertical out of floss and W.A.S. back in 1962. But then they floridated the water... :-(I blame the ARRL for this and the sun spot cycle.

So what's with the FT-920? I think it's worth a try now. Everything after the August [7H] serial # seems to be cool.

96. FS- Daiwa NS-448 900-1300Mhz SWR-Power Meter

I have for sale a 2m HT. It's an Icom IC-2ia.

RX 138-175 MHz, Tx 144-148 MHz

It has 100 memory channels available, and is fairly
easily programmed.
It has 4 power settings at 13.8 volts, 5W, 2.5W, 500 mW, and 20 mW

Has a clock, dtmf functions, power-on timer, power-off timer, auto
power-off,
priority watch, and easy and multi-function modes.

Includes a wall charger, and BP-121 7.2v/ 400mAH battery pack.

Very enjoyable little rig.

$100

I love mine, but, it has been in the shop twice in 6 months. Speaker
rattle and a 'known' but not much explained problem with UHF to VHF
Cross-band Audio. (Oh yeah, the FSK22 decode kit doesn't quite fit
the way they say it does, but if you have some tape to keep it from
shorting out, it works) Although, It seems that since I got it back
from Yeasu America, the fan sounds like it is on its last legs......ah
Rod, the 1 year is up in August, right ----<grin>

I have an FT-8100R and did not see your post. It has or has had 4
problems:

1) Speaker rattle (even a new one did little to help)
2) The FSK-22 Decode kit requires a shoe horn and lots of insulation
tape to install (It really doesn't fit where it says it should the way
it says it should, but, you can make it work if you can keep it from
shorting out (use the tape). (Yeasu reps know and admit to this
problem)
3) The UHF to VHF cross band audio was non-existent and it had to go
back to Yeasu America for repair (Seems that it is a known problem,
also, so check it if you can before you buy a particular unit.) Works
GREAT after the fix, though.
4) Fan is on its last legs after only 6 months.

Now for the gripes:
You cannot use the DTMF keypad to program frequencies (the way you can
the FT-51R).
The print for the button function ID is impossible to read while
driving (gee, after all it is a mobile rig)
As is normal for a massive function radio without a keypad, keep the
manual VERY handy.
The DTMF does not have an xmit hold function so you have to manually
hold the ptt while dialing (two handed in the car is DANGEROUS.)
There is a mod to help this wandering around.
Dialling from memory is a multi-step operation that is not obvious
(again you cannot use the DTMF keypad to select memory #1 as you can
with the FT-51R HT)

PLUSes;
Has lots of creature features (but then I haven't used most of them -
like smart band scanning/programming when in a new city)
Works great with both one-way and two-way crossband (once the audo is
fixed)
Hmmmm Other than that I guess I just like it, for no good reason.
Yes, I would buy it again.

The ADMS-2D software is GREAT (purchased separately) and it even takes the import data directly from the ADMS-1C and D if you have an FT-x1R, or FT-x0 series. (x=1, 4, or 5)

There is only one "dumb" question, the one that
does not get asked. Don't believe me? Ask any
"good" teacher.

Hello, I have the following parts forsale. They have been sitting in my
basement for a long time now, so I do not know if they work -- so I am
selling everything ASIS. Buyer pays the ups shipping COD from ny. Prices
are not negotiable. Voice: 607-777-7453 or email bg20300@binghamton.edu
-Andrew Sitzer

1) Pentium Motherboard w/ 256K cache. 3 PCI and 4ISA slots. 4 72pin
simm sockets. Jumper settings printed right on it. $35
2) 486 dx2/66 Motherboard & cpu. has 8 32pin simm sockets & 2 72pin
sockets. 8 ISA slots (with 3 VLB extensions). 256K cache.
Also incl cpu cooling fan and 8 1mb simms. Works well. $70
2) Windows 95 CD. $45
3) Digital thinwire singleport repeater 150. AUI/BNC.
excellent condition -- tested and works. $150.
4) HP Laserjet I. selftests fine, but didnt try hooking it up. has
one toner that appears about half-full. heavy. $150
5) IBM Proprinter. dotmatrix. parralel. $40
6) IBM X24 printer. dotmatrix. parralel. $40
7) IBM Graphics printer. dotmatrix. parralel. tested. Works. $40
8) IBM X24E printer. dotmatrix. dotmatrix. parralel. $40
9) HP Ruggedwriter. selftests fine, but didnt hook it up. serial. $100
10) Epson FX1050 printers. dotmatrix. I have 3 of em. These have been
tested and work. $50ea all for $130.
11) Epson LQ2500 printer. dotmatrix. $45
12) Epson LQ1070 printer. dotmatrix. $45
13) HP Deskwriter inkjet printer for macs. $100
14) Brother dynax dx-15 daisy wheel printer. takes standard casette
ribbons. $15
15) VT131 Terminal. $35
16) Hitachi 19" BNC cga monitor. Has seperate R,G,B and external sync
connections. $150 but its heavy so shipping will be alot (>$35)
17) Kenmore Air-conditioner. Model 2539750551. 5500 BTU. Good cond. $145
18) Interdyne external 6025 Tape backup unit. db37 connector. $12
19) Commodore 64 Computer w/ diskdrive & powersupply & software. $50
20) Commodore 1525 Dotmatrix printer. $30
21) Hero-I Robot #1. Fully built. Has worked in the past, but the
charger is currently broken and the batteries are drained, so I
dont know how much of it works or doesnt work. All the boards
are installed and it looks okay. Includes original schematics
and user manual. $1200
22) Hero-I Robot #2. Alot like the one above, but this one does not
have a couple of the circuit boards (about 3 missing) and is
missing the arm. No charger. Batteries are probably dead.

But this one does have a remote control, which is neat.
Great for parts. $625.

112. 6 Meter Rig Wanted

Newsgroup: rec.radio.amateur.swap
Date: 1998-02-05 00:00:00 UTC
From: wrt@eskimo.com
Message-ID: <34da54e7.2440172@eskinews.eskimo.com>

Looking for IC-575A or comparable six meter transceiver.

Required:

Digital readout
All mode (AM, CW, FM, SSB)
10-25 watts output
Good appearance (normal wear ok, but no holes or other abuse)
All functions working or easily repairable (noisy potentiometer or
burned out lamp ok, etc)

73, Bill W7TI

I have just aquired a FT-50R Dualbander HT. The radio is in EXCELLENT condition and includes a 5 watt battery also included is The FBA-15 (3 AA size Batterys). This radio DOES NOT HAVE THE DIGITAL VOICE RECORDER OPTION! However it still is a excellent rig and you can purchase the option if needed/wanted.

If interested email me at kc4oxp@flash.net

Price -$325 plus shipping
Things that I would consider for trade -

Dual Band mobile -
Complete weather station -
Plain Paper fax machine -
Other ham gear, tell me what you have..
HF gear -

I have a near perfect TS-940S/AT for sale. Includes hand mic, manuals & original boxes (inner & outer). Also included is the SP-940 Speaker, And PC-1A Phone Patch. This radio is a 9.8 on appearance and 10 on performance. I've got 'new radio' fever but I don't 'HAVE' to sell this radio so PLEASE don't waste either of our time with low-ball offers. $1350 (and worth it!). Prefer local sale so I can demo the radio but will ship at your expense. Also I have just aquired a FT-50R Dualbander HT. The radio is in EXCELLENT condition and includes a 5 watt battery also included is The FBA-15 (3 AA size Batterys). This radio DOES NOT HAVE THE DIGITAL VOICE RECORDER OPTION! However it still is a excellent rig and you can purchase the option if needed/wanted. $325 obo Will consider trades for the Yaesu FT-50R looking for the following items Complete weather station Plain Paper fax machine Dual Band mobile Other ham gear, tell me what you have.. HF gear -

The following is a repost:

The following COLLINS equipment is for sale. Equipment has been securely stored for the past several years and was operational when stored. All equipment is sold with a 7 day refund policy, less 2-way packing, shipping and insurance charges. Send email requests for JPEG scanned image of all 4 pieces.

Offers in US dollars will be received on these lots until 12:00 noon CST on Sunday, February 15, 1998. All equipment subject to prior sale. Highest or any offer may not be accepted.

Buyer is responsible for pre-payment by money order or bank draft in US dollars of purchase price plus packing, shipping and insurance. Equipment is located in Western Canada, approximately 300 miles North of the Montana/North Dakota/Canada-US border. Shipment by UPS or TBA.

PLEASE PHONE OR EMAIL FOR ADDITIONAL INFORMATION.

Lot #1: KWM-2 Winged
Serial Number: 12535
Spinner Knob
No scratches on panels
No rub marks on panels
Includes Collins manual
Includes 516F-2 AC power supply

Lot #2: 75S3-C Meatball Complete with Collins CW Mechanical Filter for 75S Receivers (Filter: F455PA FA05 6735 (526 9494 00)
Serial Number: 13572
Spinner Knob
No scratches on panels
Minor rub marks on front panel
New original equipment dial front has been installed (old one also supplied)
Two screws on dial front may not be original
No extra crystals installed
Recently gone over by technician
S-meter appears erratic in operation
Includes Collins Manual

Lot #3: KWM-1 Winged
Serial Number: 791
Rub marks on knobs
Includes 516F-1 AC power supply (Missing 4 side panel retaining screws for

PS case and one small extra hole (1/4") has been drilled in the top of PS case)

The Dallas ARC was given these goodies to auction at our Ham Radio Auction, which is set for next Saturday, Feb 21 in Dallas, Texas. Many of these items are better served to be sold to those who appreciate them. Please stop by these two pages and look around at the photos. Let me know if you'd like to make an offer. Thanks and 73,

Glen

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for
sale:

1. -----, "Single Sideband for the Radio Amateur,5th ed.,"
ARRL, 1970, pbk, G+ with very slight wear overall.
$7.50

2. Beyer, William H. (ed), "Standard Mathematical Tables,
24th ed.," CRC Press, 1973, hbk, G/G+ with owner's
names inside front cover.
$10.00

3. Brainerd, J.G. (ed), G. Koehler, H.J. Reich, and
I.F. Woodruff, "Ultra-High-Frequency Techniques,"
Van Nostrand, 1942, G-/G with moderate wear but no
markings on pages. Text is typewriter-written. A
very good text on WWII microwave and radar develop-
ment.
$17.50

4. Bucher, Elmer E., "PRACTICAL WIRELESS TELEGRAPHY,"
Wireless Press, 1918, hbk, G- with faded spine,
moderate wear on spince ends and cover edges,
owners name inside front cover. A collector's
item.
$25.00

5. Chance, B., V. Hughes, E.F. MacNichol, D. Sayre, and
F.C. Williams, "Waveforms," McGraw-Hill/MIT, 1949,
hbk, G/G+ with slight wear and no markings through-
out. \this is volume 19 of the MIT Radiation Lab-
oratory Series, and is a first edition.
$30.00

6. Cockrell, W.D., "INDUSTRIAL ELECTRONIC CONTROL,"
McGraw-Hill, 1944, G- with slight moisture damage
not immersion). Interesting work on vacuum tube
power control circuitry.
$10.00

7. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND
RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942,

hbk, G- with little wear but damage to bottom of spine.
No markings on pages.
$10.00

8. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS,"
Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

9. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING,"
1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with
little wear but markings throughout.
$10.00

10. Hardy, J., "High Frequency Circuit Design," Reston, 1979,
hbk, G+/VG with virtually no shelf wear and occasional
highliter markings. Excellent book on RF design techniques
with discrete bipolar and FET devices.
$25.00

11. Hunter, L.P., "Handbook of Semiconductor Electronics, 2nd ed,"
McGraw-Hill, 1962, hbk, G+/VG with virtually no shelf wear
and no markings throughout. Excellent early semiconductor
reference on theory and applications.
$25.00

12. Jasik, Henry, "Antenna Engineering Handbook, 1st ed,"
McGraw-Hill, 1961, hbk, G/G+ with slight shelf wear and
wear along hinges. No markings on pages throughout. A
very valuable reference on antenna theory.
$22.50

13. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL
ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941,
hbk, G-/G with slight wear on cover and spine.
$15.00

14. Krauss, John D., "Electromagnetics," McGraw-Hill, 1953,
hbk, G with very slight shelf wear and occasional pen
markings on pages. An excellent reference on electro-
magnetic theory.
$15.00

15. Lenk, John D., "Handbook of Electronic Test Equipment,"
Prentice-Hall, 1971, hbk, G+/VG book with G DJ. Small
tears on DJ but no markings throughout. Part of Lenk's
series of handbooks.
$17.50

16. Lenk, John D., "Handbook of Simplified Solid-State Circuit
Design," Prentice-Hall, 1971, hbk, G/G+ with slight shelf
wear and no markings throughout. Excellent book on discrete
transistor circuit design.
$17.50

17. Martin, Thomas L., "ELECTRONIC CIRCUITS," Prentice-Hall, 1956, hbk, G-/G with small tear at top of spine, small piece cut out from FP, slight shelf wear, some student pencil markings. Nice text on introductory vacuum tube circuit theory.
$15.00

18. Martin, Thomas L., "ULTRAHIGH FREQUENCY ENGINEERING," Prentice-Hall, 1961, hbk, G with slight shelf wear, library stampings on page ends and inside cover. Interesting text on waveguides, klystrons, magnetrons, and transmission line theory.
$15.00

19. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

20. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

21. Reich, H.J., P.E. Ordung, H.L. Krauss, and J.G. Skalnik, "Microwave Theory and Techniques," Van Nostrand, 1953, hbk, G with no noticable shelf wear, library mark on bottom of spine and FP. Excellent post-war book on waveguid, antennas, klystrons, magnetrons, etc.
$25.00

22. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very little shelf wear.
$15.00

23. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

24. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
$15.00

25. Terman, F.E., "Radio Engineering, 3rd ed," McGraw-Hill, 1947, 5th printing, hbk (red), G- with moderate shelf wear along spine, hinges, and cover edges, worn through on bottom spine/front cover. Owner's name inside FC, otherwise no markings.
$15.00

26. Valley, G.E. and H. Wallman, "Vacuum Tube Amplifiers," McGraw-Hill/MIT, 1948, hbk, G/X-LIB with slight shelf wear but no markings on pages. Library markings inside FC and on spine plus card pocket. This is volume 18 of the MIT Radiation Laboratory Series and is a first edition.
$35.00

27. Westman, H.P. (ed), "Reference Data for Radio Engineers, 4th ed.," ITT, 1956, hbk, G- with numerous notes on backsheets and both hinges torn through paper but not separated. No markings on pages.
$12.50

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

I have forsale a Mirage 440 MHz amp (1 watt in 15 Watts out).
Mirage asks $185 for these, and AES wants $169.

Here's some of the features
Special for ATV Service as well as SSB and FM
All Solid State - No Relays
No Remote Outlet
Excellent for H/T's
Specifications:
RF Power In
250 mW to 2 W
RF Power Out
2 W In 20 W Out
Current
3 Amps nominal
Size
7ï¿½" x 3ï¿½" x 2"
Weight
1.5 lbs.

Used for about a month on 9600 baud packet. Still in great shape.

Bruce

*** FOR SALE: Fine Tuning's "Proceedings", complete set 1988-1995 ***

I've recently acquired a fresh set of Proceedings editions, so I have no need for these. The physical condition of the volumes range from fair to excellent. ("Fair" ones have worn covers.) This set includes the six editions that have been published to date:

1988 1991
1989 1992-93
1990 1994-95

(the 1989 ed. is 3-hole punched for binder; all others are the original perfect binding)

This is a good opportunity for a radio hobbyist interested in the acclaimed "Proceedings" books, but put off by the $120+ original price.

The set represents over 1200 pages of receiver reviews, radio history articles, antenna designs, radio propagation articles, SWL/DX accessory reviews & construction projects, etc.

$65.00 US, shipped in continental USA.

Please e-mail if interested.

I have to agree.... investing in this set was the absolute BEST
investment I ever made for shortwave and receiver information.

The information contained in these reprints is timeless & priceless.

No, I am not a "shill" for Mr. Atkins, just an enthusiastic supporter!
Since the price includes postasge in the continental U.S., it is quite
a deal! I wasn't so lucky, I had to get mine new like most people!

The following is posted for a friend without internet access. PLEASE CONTACT NIGEL DIRECTLY...thanks!
==========

The following Racal communications equipment for sale:

MA 168 Diversity Unit (no manual) $100

TA99 1 KW Linear (no power supply), 1.5 to 25 MHz, with Distortion Unit and VSWR unit, with all technical manuals. $700

TA349C 1 KW Linear, 1.5 to 30 MHz, servo tuned, with power unit, all interconnecting cables, set of technical manuals. $1600

The following three Racal transmitters are extremely rare. As regards prices, I am open to cash offers:

(1) Racal TA127 Transmitter (Royal Navy Type 632S). 1 KW, 1.5 to 25 MHz. All in very good to mint condition, in working order, original cabinet and wiring, with set of technical manuals and many spares.

(2) Racal TA83 H.F. Transmitter, 500W, in UN-USED condition with all Racal supplied tools, technical manual.

(3) Racal TTA371C Transmitting Terminal (Ex-RAF). 1 KW, 1.5 to 30 MHz. All in very good to mint condition, in working order, original cabinet and wiring, with set of technical manuals and many spares.

All items can be packed and shipped at cost from Georgia.

Please contact Nigel Boyd, K4UGD

For Sale:

DSP-232 Dual Switchable Port DSP Multi-Mode Data Controller
(TNC) with all manuals and hookup cables. Perfect condition and currently
wired for FSK with Kenwood series HF transceivers.
$275.00

I will cover all shipping costs.

<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<

Here is additional info on this unit:

DSP-232 Dual Switchable Port DSP Multi-Mode Data Controller

The plug and play DSP-232 is Timewave's new state-of-the-art multi-mode data
controller designed around a high-speed, digital signal processor which
provides the ultimate in signal filtering, modem performance, and
flexibility. Timewave is known for excellent filtering systems. Digital
signal processing combined with memory ARQ, true DCD, and hardware HDLC
provide the best filtering available, and Timewave/AEA has been building DSP
multi-mode controllers longer than anyone (since 1991 with the
DSP1232/2232). Once you see the features, the upgrade capability, and the
affordability, your view of multi-mode controllers will be changed forever.

Modes
All proven modes are included. Send and Receive: packet VHF (9600 and 1200

bps) HF (300 bps), PACTOR, AMTOR (ARQ & FEC), RTTY (Baudot & ASCII), and Morse. Receive: TDM and NAVTEX. Also includes: Output Calibration, Signal Identification (SIAM&#65533;), & 16 software selectable modems.

Upgradable
The firmware upgrade capability for new modes like PACTOR II and new modems, such as for satellites, make this the premier multi-mode platform for the future. Timewave has a reputation of providing customers with frequent upgrades as technology advances, so your equipment will always be on the cutting edge. We've designed the DSP-232 to be a platform to which you can add features as technology changes.

Full MailDrop Facilities
There is 18K (32K RAM) of mailbox space standard which is expandable to a whopping 242K (256K RAM)-you will always have the message space you need. The MailDrop accepts messages in packet, PACTOR, and AMTOR. The internal battery holds the messages when the unit is turned off. The mail LED on the front panel display will alert you to new PACTOR, AMTOR, and packet mail. MailDrop also controls 3rd party traffic and receives, forwards, and reverse forwards messages. You have complete control of the MailDrop with Timewave/AEA's advanced commands. CFROM and DFROM let you select who may or may not connect and leave a message. MHeard lists the 18 most recently heard stations. Leave your DSP-232 on all the time, it will continue to receive/route mail and serve as a node, like all other Timewave data controllers.

Gateway as a Node
The Gateway firmware lets you "node-hop" to reach distant stations instead of digipeating; thereby reducing channel traffic and increasing data throughput. As with MailDrop, you have control of who uses your Gateway. Gateway also allows identification of TheNet, TCP/IP, and NETROM. There are two heard lists included with Gateway: one for stations heard and one for nodes.

Signal Identification (SIAM&#65533;)
AEA developed Signal Identification & Acquisition Mode to automatically detect incoming Baudot, ASCII, AMTOR/SITOR, PACTOR, and TDM signals, and with a few keystrokes switch to the recognized mode and start displaying data.

WeFax Reception
The DSP-232 includes a Zero-Crossing Detector for gray scale terrestrial fax reception with the optional Timewave FAX III 900 WeFax receiving program. This program allows you to receive WeFax images, colorize them with 256 color, then export them to .PCX or .GIF files for use in other applications. Also compatible with Timewave's WeFax 256 for Windows.

Power Filtering with DSP
The DSP-232 continues the Timewave tradition of quality signal filtering technology. Incoming signals are digitized by a high speed, analog-to-digital converter. The digitized data is then digitally filtered and analyzed by the on-board digital signal processor. The processed

demodulated signals are then passed to a second processor for protocol conversion. The reverse procedure takes place when you transmit. DSP gives the DSP-232 a better shape-factor than analog filters. In addition to the DSP, we've included PACTOR memory ARQ for reduced errors. All this makes the DSP-232 the data controller of choice for those who want to connect in poor HF conditions.

Packet Power
Run 9600 or 1200 bps VHF and 300 bps HF packet. This is a true DCD state machine for hearing signals with an open squelch when operating 9600 and 1200 bps packet. Full-duplex packet capability lets you speed up communications by sending and receiving simultaneously. KISS mode provides compatibility with the TCP/IP protocol. There are even special GPS capabilities which allow mapping and tracking in packet.

Packet Satellites
You can use the ultimate nodes, the BBSs in the sky-the satellites! Use 9600 bps, 1200 bps PSK PACSATs, and 400 bps telemetry. Take advantage of the satellite's store-and-forward capability. The satellites are up there, use them with the DSP-232.

Control Software
Timewave offers a whole line of state-of-the-art control software programs.
Microsoft Windows® users can use the powerful PC PakRatt for Windows.
DOS-based users will appreciate PC PakRatt II for DOS.

Global Positioning System
A GPS-specific command set is included in the DSP-232. These commands allow the controller to be used in Stand Alone Tracking, where you take the unit mobile and transmit your position to other packet operators using Automatic Packet Reporting System software. Remote programming allows you to set and change vital GPS commands from a remote location. You can also use Timewave's optional APRS adapter cable to connect a GPS receiver and a DSP-232 to a single COM port on your computer. The DSP-232 is GPS, Loran, and ARNAV compatible. It is even ULTIMETER-II compatible which allows you to set up a weather net or to hear weather nets.

Connect with the DSP-232
The DSP-232 has a rear panel connections for direct-FSK/Auxiliary to take advantage of your tone generating radio and AFSK port one and two. Timewave gives you both the direct FSK and the AFSK options for optimum flexibility. There are two radio connections (one for each radio port), two receive audio connections (one for each radio port), plus an RS-232 computer interface. There is even an 'option' slot for future advancements-we mean it when we say this is the digital platform for the future!

Specifications
Modem Analog Devices 2105 Digital Signal Processor running at 12.3 MHz in conjunction with Analog Devices 28msp02 audio CODEC
Modulator output level 5-100 mV RMS rear panel adjustable controls for each audio port
Processor system Hitachi 68340 running at 16.7 MHz

RAM Battery-backed 32K standard, expandable to 256K
ROM 128K standard, expandable to 256K
Hardware HDLC Zilog Z8530 SCC
Power Requirements +12 to +16 Vdc @ 1.1 A
Input/Output Connections
Radio interference One 5-pin DIN connector, one 8-pin connector
Direct FSK outputs Normal/Reverse
Terminal Interface RS-232C DB-9S connector with hardware/software handshakes
Terminal data rates Autobaud setting at 300, 600, 1200, 2400, 4800, 9600 bps; and 19,200 bps
RX Audio Port 1 and Port 2
TX Level Port 1, Port 2, and 9600
Other Station ground connector and external reset button
Physical
Dimensions 9.35" (237 mm)W x 7.9" (201 mm)D x 2.3" (58 mm)H
Weight 3 lbs. (1.36 kg)
Features
Fast digital signal processor
9600 & 1200 bps Packet
All standard HF & VHF modes
Mailbox expandable to 242K
Full MailDrop facility for Packet, PACTOR, and AMTOR
Two switchable radio ports with rear-panel AFSK adjustments and another adjustment for 9600 bps
GPS firmware which is compatible with GPS, Loran, ARNAV, and ULTIMETER II weather stations
GPS commands are remotely programmable
Gateway firmware which works as a node for faster throughput
SIAMTM signal identification
Memory ARQ
Identify TCP/IP, TheNet & NetRom

For Pickup in Vicksburg, Mississippi Only
I will not attempt to ship these antennas

Cushcraft A4S - Used in good condition $300

These Hygain Antennas have never been installed, but stored outside,
partly assembled (can carry in a pickup).

Hygain 105BA-S 5 El. 10 Meter Beam on 24 ft. Boom $170

Hygain 155BA-S 5 El. 15 Meter Beam on 28 ft. Boom $200

Hygain 205BA-S 5 El. 20 Meter Beam on 34 ft. Boom $350

Hygain 7-3 3 El. 40 Meter Beam on 35 ft. Boom $550
(Missing one element tip, easily replaced from Hygain)

I have the manuals for all of these.

Kenwood TS-450S (No Auto-Tuner) $650
All-Mode HF 160-10 Meters

Kenwood TS-50S $650
All-Mode HF Mobile 100 Watts

Kenwood MB-13 Quick-Release Bracket $ 35
To Be Sold With Above TS-50 or if TS-50 sells first Only

All items in excellent condition both cosmetically and electrically - No

problems with any of them. Each includes mike, power cable, and manual,

TS-450 also includes service manual. Shipping extra on all
items.

If you intend to use it with OS/2 as a WIN-OS2 operation, while you are digging for things be sure you get a copy of the OSTSR time slice release utility. This one is free ware. At least install it with your setup, otherwise PPWIN will clobber your CPU load.

The best utility for bringing it under control in OS/2, to my experience, is the TAME320 utility, but that one will cost you a few bucks to register. It is more versatile than OSTSR and has let me do some things I needed that OSTSR wouldn't do...

Hi,

I am trying to obtain two Communique HX507 hand held two way radio's, I have a complete system (ie base stn, chargers, batteries etc) apart from two bodies and would like to make use of them. I am told these units are about 7yrs old and are no longer made. If anyone has any for sale or could point me in the right direction I would be most grateful.

Regards,
Andy Daws

Cross-posted to: alt.books.technical,biz.books.technical,misc.books.technical,rec.radio.swap,rec.radio.amateur.swap

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for
sale:

1. -----, "Single Sideband for the Radio Amateur,5th ed.,"
ARRL, 1970, pbk, G+ with very slight wear overall.
$7.50

2. Beyer, William H. (ed), "Standard Mathematical Tables,
24th ed.," CRC Press, 1973, hbk, G/G+ with owner's
names inside front cover.
$10.00

3. Burghhardt, H.D., "MACHINE TOOL OPERATION," McGraw Hill,
hbk. This is a two-volume set of 1930-1940 high school
texts on machine shop practices. The two volumes are:
Vol. 1 - "Lathe, Bench, Forge," 1941, F+. Cover and
spine are worn through on edges, top, and bottom,
numerous student pencil markings throughout. Some
moisture damage, but not immersion.
Vol. 2 - "Dilling, Planing, Milling, Grinding," 1937,
G/G+ with slight to moderate wear all over, no markings
on pages.
Sold as a set. Very good book on machine shop practices,
little of which has changed over the years. These were
used as a high school or apprentice instruction manual,
and are a good aide for the machining hobbyist.
$15.00

4. Churchill, R.V., "MODERN OPERATIONAL MATHEMATICS IN
ENGINEERING," McGraw-Hill, 1944, hbk, G/G+ with very
slight wear and no markings on pages. Good early work
on the LaPlace transform and it's applications.
$12.50

5. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND
RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942,
hbk, G- with little wear but damage to bottom of spine.
No markings on pages.
$10.00

6. Everitt, W.L., "COMMUNICATION ENGINEERING, 2nd ed.,"
McGraw-Hill, 1937, 6th printing, hbk, G+ with very slight
shelf wear and no markings on pages. One of the first
comprehensive texts on telephony and radio communications
with chapters on filters, impedance transformation, bridge
circuits, modulation/demodulation, oscillators, vacuum-
tube power amplifiers, etc.
$25.00

7. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS,"
Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

8. Forsythe, G.E., M.A. Malcolm, and C.B. Moler, "COMPUTER
NETHODS FOR MATHEMATICAL COMPUTATIONS," Prentice-Hall,
1977, hbk, G-/G with slight damage to top of spine and
upper cover corners, very slight markings on pages. Good
book on numerical analysis techniques for integration,
differential equations, optimization, interpolation, etc.
$12.50

9. Gardner, M.F. and J.L. Barnes, "TRANSIENTS IN LINEAR SYSTEMS
STUDIED BY THE LAPLACE TRANSFORM METHOD, vol. 1," Wiley,
1942, hbk, G with slight wear and no markings on pages,
owners name inside FC. I have never seen a volume 2 of
this book, and don't think that there is one, either.
$12.50

10. Hicks, G., P.E., (ed.), "STANDARD HANDBOOK OF ENGINEERING
CALCULATIONS," McGraw-Hill, 1972, hbk, G/G+ with very
slight wear. Massive work on the fundamental mathematics
of virtually all engineering disciplines from civil to
nuclear.
$30.00

11. Hund, A., "HIGH-FREQUENCY MEASUREMENTS," McGraw-Hill,
1933, hbk, G with small ink stain on front cover, some
slight wear all over, no markings on pages. Otherwise
a G+ copy. Very thorough chapters on determining and
measuring voltage, frequency, capacitance, self-induct-
ance, mutual inductance, resistance, etc.
$15.00

12. Hurley, R.B., "JUNCTION TRANSISTOR ELECTRONICS," Wiley,
1958, hbk, G with slight shelf wear and no markings on
pages. Early work on juction transistor theory and ap-
plications, including noise, biasing, power amplifiers,
high-frequency models, video amplifiers, etc.
$10.00

13. Johnson, W.C., "TRANSMISSION LINES AND NETWORKS," McGraw-
Hill, 1950, hbk, F+. Book has VG cover, but pencil, pen,
and highlighter marks throughout. First 9 pages torn in

half by previous owner. If not for that, this would be a G copy. Poor way to treat an otherwise valuable book on power transmission, telephone, and telegraph lines with chapters on filters and ladder filters. Usable copy.
$5.00

14. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.
$15.00

15. Krauss, John D., "Electromagnetics," McGraw-Hill, 1953, hbk, G with very slight shelf wear and occasional pen markings on pages. An excellent reference on electro-magnetic theory.
$15.00

16. LePage, W.R., "COMPLEX VARIABLES AND THE LAPLACE TRANS-FORM FOR ENGNIEERS," McGraw-Hill, 1961, hbk, G-/G with slight shelf wear, covers won through on bottom outer corners, owners name and book store markings inside FC, some highlighting, FP torn at hinge but not separated. Veryngood text on the LaPlace transform and it's appli-cations.
$12.50

17. Lo, A.W., R.O. Endres, J. Zawels, F.D. Waldhauer, and C-C. Cheng, "TRANSISTOR ELECTRONICS," Prentice-Hall, 1955, hbk, G-/G with slight wear overall, small 1/2" tear at top of spine, some underlining and markings on pages, FP clipped on top corner. Good early book on semiconductor theory and applications.
$12.50

18. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

19. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

20. Mulvey, J., "SEMICONDUCTOR DEVICE MEASUREMENTS," Tektronix, 1969, pbk, G/G+ with very little wear. Very good book on the measurement of bipolar transistor, FET, UJT, thyristor, signal diode, zener diode, and tunnel diode parameter measurements.
$15.00

21. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very little shelf wear.
$15.00

22. Schwartz, M., "INFORMATION TRANSMISSION, MODULATION, AND NOISE, 1st ed.," McGraw-Hill, 1959, G+/VG with G DJ. Good basic book on AM/SSB/DSB/FM and PCM modulation theory, as well as the effects of noise on detection and demodulation. Now in it's 3rd edition.
$17.50

23. Seely, S., "RADIO ELECTRONICS," McGraw-Hill, 1956, hbk, G- with very slight shelf wear but considerable pencil underlining throughout. Excellent book on vacuum-tube amplifier, modulator, and demodulator theory and design techniques.
$12.50

24. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

25. Skilling, H.H., "ELECTRICAL ENGINEERING CIRCUITS," Wiley, 1957, hbk, G-/G with slight to moderate wear, covers worn through on outer corners, but no markings other than owner's name inside FC. Good basic electrcal network, transient response, LaPlace transform, and image parameter text.
$12.50

26. Stout, M.B., "Basic Electrical Measurements," Prentice-Hall, 1950, hbk, G-/G with slight to moderate wear on cover edges and spine ends, 1/2" tear on front top hinge. Good reference for measurements practices using meters, bridges, galvanometers, ballistic galvanometers, etc.
$15.00

27. Terman, F.E., "Radio Engineering, 3rd ed.," McGraw-Hill, 1947, 3rd printing, hbk, G-/G with slight to moderate shelf wear and no markings on pages. This is a better than average copy of a radio classic.
$22.50

28. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
$15.00

29. Van Der Ziel, A., "SOLID-STATE PHYSICAL ELECTRONICS," Prentice-Hall, 1957, hbk, G-/G with slight wear and occasional markings on pages. Early work on diodes, transistors, masers, photoemission, ferroelectricity,

ferromagnetism, etc.
$15.00

30. Westman, H.P. (ed), "Reference Data for Radio Engineers,
4th ed.," ITT, 1956, hbk, G- with numerous notes on
backsheets and both hinges torn through paper but not
separated. No markings on pages.
$12.50

Greetings,

I have for sale a Yaesu FRG-100 general coverage table-model shortwave receiver. Radio covers 50 KHz - 30 MHz in AM, USB, LSB, CW. Will also receive HF FM signals with optional FM board (not included).

Radio was purchased new by me approx 2 years ago. It is in excellent condition with no scratches or blemishes. It has seen minimal usage. Radio can be computer controlled with Yaesu CAT interface (not included in this sale).

Comes with original box, manual, 12 VDC power supply, and schematics.

Asking $475.00 plus COD shipping, cash or money order. If interested, please respond to my E-mail address only. Thanks for reading.

You can now find the mods for the Kenwood TH-G71A HT, On my site,
http://www.angelfire.com/ca/ke6gwf/
Note; Currently I only have the wide band Receive mods. If any of you have,
or know were I can find, the full Transmit mods, please let me know.
I will post them, as well pictures that I took with the radio apart, as soon as I get them.
Thank you, Ben (KE6GWF)

P.S. I did the receive mods on mine last night, and everything seems to be
working all right.
After mod Rx capability.

Hello,

I wanted to know what you might recommend about mobile antennas. My radio covers 25.165MHz to 28.775Mhz and I'm trying to figure out what the best solution is to get optimum performance regarding SWR. Will 1 antenna do it all? Should I buy a few antennas and tune them individually for low and high band? Is one mobile antenna better than another?

Any help that you can offer will be great !!!

Sincerely,

Roger Kinney

Cross-posted to: rec.radio.swap,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment

I have a like-new Kenwood TH-78A with all original equipment (box, manual, antenna, wrist strap, charger, and battery in excellent condition), and the following accessories:

ME-1 200-memory expansion chip (total of 250 memories)
SMC-34 Remote-control programmable speaker/mic with volume control.
SC-35 Soft case for standard batteries
SC-36 Soft case for large batteries
KLF-3 Filtered cigarette lighter power cord.

The radio is opened up for full tx/rx capabilities and crossband repeat. It has seen only minor use, and works superbly. It is the most full-featured dualband ht available, and will give you good service. I have all of the original packaging and documentation for the accessories
as well.

Price is $350. Reply here or email me at one of these addresses, after removing NOSPAM-:

NOSPAM-wd4sgu@juno.com
NOSPAM-wd4sgu@prodigy.net

Thanks.

I have the following items for sale. I plan to take them to the Charlotte, NC hamfest if not sold before.

Mirage A-1015G 6 meter amp. Christmas gift this year. Upgrading to 100 watt 6 meter rig so I don't need the amp. New condition in box. Asking $325.

Kenwood TR-751A 2 meter all mode radio. 25 watts out. Comes with mobile mounting bracket, mic, manual and origional box. I am origional owner and I am a non-smoker. Asking $400.

Kenpro KR-5400 az/el rotor system. Similar to Yaesu KR-5400B but no computer interface. The elevation works fine but the azimath rotor is frozen up. Both rotors and dual control box. Asking $175.

AEA AT-300 antenna tuner. As new condition but I can't find the origional box. Asking $125.

Please reply to: lbarnett@claimsware.com

73,

Lee, KJ4BF

Icom 761---------- General coverage HF transceiver. All the bells and whistles. If you know the model you can appreciate what it is even more. A jewel of a transceiver. Works and looks like new. I am upgrading otherwise this would be mine til? A few features - VOX, electronic keyer, auto antenna tuner, AM-FM-RTTY-CW,SSB, compressor and more and more. Manual and schematics. -------- Winner pays shipping and insurance. ---
This radio is a one owner and non-smoker.

|||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||
|||||||||||||||||||||||||||||||||||| FOR SALE
|||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||
|||||||||||||||||||||||||||||||||||||||||||
```

AOR 8000 with cell mod's and Opto Scout Model 40. AOR 8000 also has the mod's for the scout so it can "reaction tune" the frequency that the Scout catches. also novex mod's done also.
Also included is the Optoelectronics DC 440 Tone decoder and the Optoelectronics "CI-V~ CX12" and AOR RS232 computer interface for the Scout, DC440 and the AOR 8000. And two opto DB32 mini antenna's
Everything was bought and kept just as the day it arrived all boxes, chargers, cable's, paperwork, invoice and accessories and all equipment have Nicad batteries.
All Equipment was bought from EEB and mod's were done there as well.

The total price I paid for all equipment with everything was $1451.00 and the first $1095.00 takes it all. Anyone interested or need any more info can email me at gene@surfsouth.com

I have a scanned .bmp of the invoice if anyone would like to see it.

I have a new Mirage A-1015G for sale. This was a Christmas gift, but I am now upgrading my 6 meter radio and don't need the amp. As new condition in box. Non-smoker. Amp has been hooked up and tested. Asking $300 plus shipping.

Please rely to: lbarnett@claimsware.com

73,

Lee, KJ4BF

Raymond,

I may be interested in your Barber colman Micropositioners, but I can't identify them. Do you have URL where I could find photos or other descriptive information? Where were these used, and what is the range of positioning?

Thank you, Larry Carr

238. WTB: Larsen (or other) mag-mount or on-glass 2M ant

Newsgroup: rec.radio.amateur.swap
Date: 1998-03-13 00:00:00 UTC
From: rca@saber.net
Message-ID: <35089a15.44624486@news.saber.net>
Source record: 10221
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.swap,rec.radio.swap

Looking to buy some kind of 2 meter antenna that will allow me to avoid the trauma of punching a hole in the roof of my vehicle.

I have both a 1/4 wave and 5/8 wave whips, so I really only need a mag mount to put them to use.

I might be able to use an on-glass antenna, but my rear window has a screened on defroster. I don't know if there will be any interaction or not. It's possible that I could mount it on the windshield. In this case, I will want to buy the whole rig.

Suggestions appreciated.

Who is Jose Muldoon and why is he such an asshole??
The problem with the internet is you can't just bash a guy in the face when you want to.
This jack ass has taken to leaving remarks about someone he doesn't even know-me
The only thing I can attribute this to was my remark about homosexuals oh well can't please em all.
MK

Oh dearie me, I presume our Mr. Muldoon made the mistake of thinking you a homophobic bigot. Quite right you're annoyed about it - you were just generally being bigoted, the derogatory reference to people as "fags" seemed to pass you by entirely.

Let's get one thing straight (no pun intended), this is a newsgroup for articles on VALVES. Remember those? Little glowing glass things? Try one of the macho groups if you want to be the all-American dumb bigoted jock, not in this one, matey! If you want to try any more anti-gay remarks, go to a gay newsgroup and try it there. Being torn to shreds by leslie-beans isn't one of the worst ways to go.

With fond regards,

Russ Sadd

PS: Please brush up on your grammar - a little punctuation goes a long way. So does humility - I can't say getting to know you better sounds like a fun thing to me. Was that subtle enough?

I have an Icom IC-730 HF rig for sale. This is a solid state older unit and is in good condition. It has 80-10 meters with the WARC bands. There is some minor scratching on the sides but the front is cosmetically beautiful. Functionally it works flawlessly and comes with the origional microphone and manuals. This unit has the quad-conversion reciever so you KNOW that it will be SENSITIVE!! I will also include with the radio a Radio Shack dsp filter! I am asking $375 for the set.. Please send e-mail to the address listed below if you have any questions.

First off, your concern/gripe seems poorly founded. The
impropriety you seem to be whining about is at worst an
indescretion hardly worthy of note, and could've been quite
simply a mistake or miscommunication.

Secondly, judging by the ISP, path, newsreader, use of language,
subject content of post, and grouping of usenet groups posted
to (this is not as obscure as you might think- have a look),
"watcher" <wakanisay@owell.com>)
is in fact
"MK" <MKAUDIO@prodigy.net>.

"wow some people will do anything to cut down the competition!"

How true! How much lower will this guy sink? For another example of
how low he's gotten, see his "Why I hate whiny fags" post and ensuing
thread in rec.audio.tubes 1998/03/10. What might the future hold?

Ethan

Hello,

Thanks for responding to our Press Release. We our excited to
announce the all new 1998 line of Ham Radio Repeater Directories. They
can be found at...

http://www.rotd.com/worldxn/

These exciting directories are great for Amateurs on the
move, or those who would like to take advantage of the many Repeaters in
their Area. We encourage you to visit our site and would appreciate any
feedback you offer.

Looking to Buy/Trade for Autopatch setup that will work with a Radioshack HTX-202 Handheld (at first) and later can be hooked up to a standard Moble Rig (adi-146 50 watt moble rig)

Have Sony Playstation Modification Chips (3 which sell for 10-30 dollars each) and a CD-R which I can burn your favorite Library of information onto (got a favorite webserver? or Dir on cdrom.com?)

and can also pay cash (but extremely broke, thats why I hope to trade something)

Let me know!!

Brad

I am restoring a set of Army Field Telephones and require two rubber covered , three wire cords. It would be nice to get the original replacement with black, white and red leads and lugs attached. Is there anyone out there that has a stock of these or knows where I can find them.

R.W.Schlachter.

I just received a sportsman's catalog (I don't recall the firm's actual name), but I remember they were selling surplus army field telephones AND spools of wire to interconnect them. As I recall, the spools were about 2000' long. I'm not sure if I still have the catalog, but if I do, I'll repost tomorrow with the info.

Cheers,
Brian, N6IIY

Hi Again Raymond,
I found that catalog, The Sportsman's Guide. They are selling 2600ft of
New Military Phone Wire for $49.67. It is listed as 2-strand, 16gauge wire.
This wire is for interconnecting two phones, hence the large spool size.
Were you looking for the cord which connects the handset to the phone? If
so, the cord from an old (i.e. 1940ish) black desk telephone handset
might be a reasonable facsimile, and it will probably have spade lugs
attached. Colors might not be exactly what you were looking for, however.

Sportsman's Guide has a website: http://www.sportsmansguide.com

Good Luck,
Brian, N6IIY

Hi all,

I have for a friend the following radios:

You may email me or call him at (304) 855-4678.

Ten-Tec Omni A HF rig with matching external VFO, Vintage hand mic :) and operators manual for each item. Radio is solid state with analog dial (NO TUBES!!) Sent to Factory in 1990 for a checkup and tune-up (have documentation on that) Radio was purchased new in 1979 and has worked like a champ. 160-10 meters, 3 cw filters, ssb filter, full break-in QSK. VFO allows rx of 2 freqs. simultaneously, tx/rx from radio or vfo or vice/versa. Also in vfo are 4 crystal slots for fixed channels. runs 100 watts on 12vdc using 16amps for full output! Radio is a 9 out of 10..
PRICE IS $400 SHIPPING INCLUDED.
Will trade for the following:
Prefer solid state radio!!
Yaesu 757GX
Kenwood TS820/TS830/TS530, or similar. (looking for something with DIGITAL DISPLAY, IF SHIFT and NOISE BLANKER) with vfo or speaker or whatever... let me know what u have (excellent condition, please!!)
thanks,
Randy

278. FS/FT: Icom IC-W21AT dualband HT $125

Hi again,
Have for sale for a friend the following radio:

IC-W21AT handheld dualbander. Includes speaker/mic, veh. power cord, hi and low cap. batteries. HAS INTERMITTENT TX AUDIO PROBLEM.. it transmits fine, but no audio sometimes. Audio cuts out with no rhyme or reason, but we suspect the speaker/mic jack as the culprit. this is the radio with the 'telephone' whisper mode so u can hold radio like handheld cellular phone. it has a mic in the radio and another mic in the battery pack for this purpose. the radio works great with dual in-band rx, cross band retransmit and rx, lots-o-features for Mr. Fix-it. PRICE IS $125 INCLUDING SHIPPING

Will also use this as 'boot' for the other radio trade (see ten tec ad)
will also trade for a 1kw (rated at more than 600 watts) antenna tuner,
prefer roller inductor tuner like a MFJ tuner or a Dentron Supertuner.
Wish list: prefer Drake Model MN-2700 tuner.
please email me or call Slade Sowers at (304) 855-4678
thanks,
Randy

I have a mint IC-738 for sale. The unit has very few hours on it and is in outstanding condition. I bought the radio a little over a year ago and I haven't had much free time since to devote to radio. The radio will come with an optional narrow CW filter, a chrome Iambic paddle, and an astron RS-35M power supply. All components are absolutely perfect. The radio will be shipped in its original shipping carton with the original box and manuals.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I am asking $1,400 shipped continental US.

I will ship upon receipt of a cashiers check or money order.

Please reply via E-Mail.

Thanks for reading.

Due to overabundance of projects I am selling the following items:

Kenwood R-2000. This BC-30MHz shortwave receiver is in excellent condition. Comes with manual. $300 plus shipping.

Bearcat BC760XLT, pre-ban model. This scanner radio is in excellent condition. Comes with antenna, charger, and copy of manual. $125 plus shipping.

* Hallicrafters SX-104. This 30-50MHz boatanchor receiver is in excellent cosmetic condition and good working condition. $75 plus shipping.

* Hallicrafters SX-105. This 152-173 MHz boatanchor receiver is also in excellent cosmetic condition and good working condition. $75 plus shipping.

* Special deal - take the pair for $125 plus shipping. (Sale pending)

Realistic DX-75. This GC boatanchor receiver is in very good-excellent cosmetic condition and good working condition. Includes an original (NOT a reproduction) instruction book. This is when Radio Shack was still Radio Shack, and not a Tandy division. $50 plus shipping. (Sale pending)

DenTron MT-2000A Antenna Tuner. 3kW PEP antenna tuner. This unit is in good cosmetic and working condition. $125 plus shipping.

Cobra 148GTL-DX CB transceiver. Excellent condition, including all original documentation and box. $250 plus shipping.

Marko 10-40M mobile linear. 75W, AM/SSB. Condition unknown. Take a chance? $25 plus shipping.

I need to get out of the radio business, so I would prefer outright sale to trades. Delivery possible in north Texas, eastern Oklahoma, or northwest Arkansas. If interested, or for more information, email me at twhite@cyberramp.net. Thank you.

Note: Corrected text - the software is Host Master II + rather than Hamtronics. It is on both 5 1/4 and 3.5 disks.

The deal fell thru, so my Kam Plus v6.1 which includes Pactor is again available. It is in very nice shape and includes the complete manual set, the Host Master II + software and complete manual, cable(s), original box. Asking $175. plus shipping.

Or, will sell my AEA PK-88, also nice, with manual and cable(s). Asking $75. plus shipping.

I have been cleaning out the estate of ham friend and ran across a new pair of Eimac Y-427 tubes with Hewlett-Packard part number stickers on the boxes (1921-0046). They are a "lighthgouse" type device, looking like a small 2C39. I suspect they were used in UHF or microwave test equipment.

Does anyone know what piece of HP gear this went into? Can anyone use them? If so, make an offer. I know how hard it is to get exotic tubes for some of the old test equipment so would like to see them used.

Hello all,
I bought a Uniden "Force" Uhf 2way and it didn't come with any
info (real cheap price for a real cheap radio).
Can anyone tell me if a normal eprom programmer will work with
the 2716 prom? Is there any special "program" that needs to be
run to actually program the thing?
I noticed a jumper wire on the eprom board what's it for?
I'm interested in taking the radio to 440 can I??
The two freqs in it now are 463.xx and 461.xx.

Thanks
Michael

What is the model number? Some of the Unidens are PC programmable through the mic jack, while older ones require a propriatory prom burner from Uniden. (The PC programmable variety needs a propriatory interface box from the seriel port to mic jack)

From what I can recall, the PC software will not allow freqs below 450, and the prom burner is band selectable to START at 450 (Never tried programming a lower frequency.)

We see these Unidens from time to time in the shop I work in. Let me know the model number of the radio and I'll provide you with more info.

Source record: 10281
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have a Mint Icom IC-738 HF rig for sale. The rig has very few hours use on it. I bought it a little over a year ago, just haven't had the time for radio in a while. The radio is a 9.99 out of 10, non smoker, never mobile, unmodified, etc. I have the manuals with the original box and shipping carton. The rig also has the optional narrow CW filter.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I'll sell it with a chrome iambic keyer and Astron PS-35M for $1200 firm, shipped and insured in the continental US.

If your not interested in the power supply and keyer, I'll sell the radio by itself for $1000 firm, shipped and insured in the continental US.

I'll consider a possible trade of a dual band all-mode or a nice vhf all-mode for the radio alone.

Please reply via E-Mail to peaster@connors.cc.ok.us

Thanks & 73's

I've got way too many radios.
Very nice Yaesu VX-1R for sale. I think this is the smallest
Dualband 2m/440 handheld that you can buy. It's about the size
of a pager.
Very wide range receive including am/fm broadcast up thru 800mhz.
Follow the link below to the forsales page.

I have a Kenwood TM-733a Dual Band Mobile For-Sale.
Complete unit with built in duplexer, removable face place,
2 mics, and docs. Also have extended mounting cable kit for remote
mounting.

Comes with 2 mics. The backlight mic with DTMF has a intermittent
problem with the PTT switch but can easily be fixed. The other mic is
standard mic (with no dtmf) and works great.

Complete unit and accessories for $375.00 including shipping.

If interested, please e-mail sproctor@microline.org or
sproctor@calweb.com

Thanks

Woops, I take that back, the regular mic that comes with this DOES have DTMF on it!!! So both mics have a DTMF pad! Makes the deal even better :)

Obviously I don't use this much as you can tell!!

problem with the PTT switch but can easily be fixed.

I've had to repair
all 3 of my Kenwoods microphone PTT switches.
Kenwood repaired the first
one, under warranty, I did the other two.
Their the newer style back light
DTMF, I found a replacement from Digi-Key.
Digi-Key Part number SW408-ND,
this is 150g force.
If you like a lighter feel, then I would go with ...

Digi-Key Part number SW407-ND, this is 100g force.
These are made by
Omron, minimum life is 300,000 cycles,
Should last a little while,
cost...45cents. They do have a minimum order
Digi-Key # 800-344-4539
I
hope this helps,
KF6ATH

Had the same problem, company called Digi-Key makes a replacement part to fix that runs about 2-3 dollars by the time you ship it, by the way this is the first realistically priced 733 on the group in a while!!!!

800-344-4539 is the company's number, at least that is what my scrawling in the manual looks like!

Hello I recently purchased an RCI-2950 and I need the power cord connector to go to my power supply. It has a connector with 3 female parts that fits on the radio and this make the red and black leads for the power supply. If anyone knows where I can pick one up, Ill be very greatful. Ill pay damn near anything for this! Please help

Not sure if I posted this already, but... I have 2 MC-50 desk mics for sale at $50/both. One mic is in great condition, works great, other mic looks rough, base is great, works ok but has hum... inside base is evidence of many rewirings, and I believe the audio leads being reversed is the only problem. Please email if interested! Buyer ships COD/CONUS or prepay.
thanks,
Randy

Bought for emergency cache and never used...

7 RELM RSP-400 HT's
(Not average RELM stuff, much more serious.)
420-482 MHz (+/-)
PL/DPL/INV.DPL
20 Channel
4 Watt/1 Watt
Scan, Priority, Power Level edited in field.
Instant Priority button

11 Batteries
mixed 600maH and 1000maH

3 DTMF Pads
1 installed, can install others for you

6 Leather holsters
swivel type

PM 4500 Field Programmer + optional PC Software (very nice)
(qualified buyers only, talk to me)
Also programs:
RSP-500,
DRV/DRU/RU4501 Repeaters
DBV/DBU Desktop Bases
LMV 2548 Transceiver
Mini-Com Plus SM, SL, and PT series Transceivers
RELM Plus RM Series Tranceivers

Complete set is in excellent condition. Seen very light duty once.
Pictures and other info at http://www.gothic.net/~dcrisis

Local to San Francisco? Call me and I'll show you the equipment, you'll
see the quality of these radios. They're equivalent to Moto MT-1000's
with a few more features.

ASKING $2000.00 for everything. Mailto:4701@opg.org

I have for sale two Kenwood all-mode mobile transceivers. A TM-255 2 meter rig and a matching TM-455A 440 rig. Both rigs come with separation kits, mikes, mounting brackets, power cables, manuals, and original boxes. The TM-255 is a 55 watt rig, the TM-455A is a 45 watt rig. Both are in excellent physical and electrical condition, a 9+.

I am asking $500.00 for the TM-255 and $400.00 for the TM-455A. If you buy them both you can have them for $850.00 and I'll throw in the factory service manuals too.

Prices are US Dollars, and do not include shipping costs.

Thanks and 73,

330. FS: ICOM IC-738 HF RIG New Low Price!!!!

Newsgroup: rec.radio.amateur.swap
Date: 1998-04-05 00:00:00 UTC
From: Peaster <peaster@connors.cc.ok.us>
Message-ID: <6gbsc0bka1@sunhub-tulsa.onenet.net>
Source record: 10177
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have a Mint Icom IC-738 HF rig for sale. The rig has very few hours use on it. I bought it a little over a year ago, just haven't had the time for radio in a while. The radio is a 9.99 out of 10, non smoker, never mobile, unmodified, etc. I have the manuals with the original box and shipping carton. The rig also has the optional narrow CW filter.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I'll sell it with a chrome iambic keyer and Astron PS-35M for $1000, OR, If your not interested in the power supply and keyer, I'll sell the radio by itself for $800 firm, shipped and insured in the continental US.

I will ship upon receipt of a cashiers check or a money order.

Please reply via E-Mail to peaster@connors.cc.ok.us
Thanks & 73's
Mike Peaster

I'm real new to ham radio and I see lots of different radio models advertised for sale but it is hard for me to see the relationships between the models. For example, was a TS430 made before or after a TS530? When did the TS430 first hit the market?

I'm wondering if anyone knows of a WEB site that might help lend order to these various models of radios?

Thanks in advance. Dean Wooldridge <meds@onramp.net>

Try this: disassemble radio and remove the coil cans in question, one by one, dont mix em up!. Use a solder sucker iron or you will destroy them! The "screwdriver" slot is also on the bottom side, which IS accessible on those coil cans! Simply unscrew them, throw away any crumbly bits, and reinstall them upside down. (The cores, that is). Realign the set and your'e back in business. Almost every one in my HTX'es is very near, or at, the top of the metal housing, so that is where you should probably set them when starting the alignment.

Tim, VE7SEZ

351. WTB Dead HTX-100 (2)

Newsgroup: rec.radio.amateur.swap
Date: 1998-04-10 00:00:00 UTC
From: Michael <me_hamman@yahoo.com>
Message-ID: <352e39dc.0@news.snip.net>
Source record: 10104
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

I bought a HTX-100 at a hamfest and found out that EVERY
SINGLE COIL had its ferrite slug damaged or pushed to the
bottom. I'd like to find someone who has a HTX-100 that's
dead because of semiconductor faults. I have contacted
Tandy and found that they stopped restocking the replacement
parts for this thing a couple of years ago. If you have a radio
that may fit the bill please email me with your price.

I have looked into removing the coils and unscrewing them from the
bottom. Some can be done others actually have a bottom that
prevents ANY access. To make matters worse the wingnut that
messed this radio up didn't stop at just breaking the ferrites. He
went so far as to drill out the broken ferrites and totally trash the VCO
coil as well as a few others.
The point has been made that the HR 2510 was also made by Uniden
and probably has the same coils. Well that's true but in my case the coils
that are trashed aren't used in the 2510.
I thought of buying both service manuals and comparing parts but
at a cost of >$50 for a radio that is only worth $80 I thought again.

Throw the HTX- 100 in the trash and write it off as a lesson learned
the hard way.You will spend too much time and energy trying to fix the
thing and you will wish you had never gotten the junk in the first
place. Don't let the thing tear your nerves up. Trash it! 73's DanOn

The really BAD coils in this HTX-100 are:

FT-2 (triple coil set in the upper right corner, going front to back)
L317 (VCO coil on the PLL/micro baby board)
L1,7,8,12,13 and L26 the rest don't look great but I hope they are
still intact and just need a new slug.

If anyone has a chassis that they want to part with I'm still looking.

TNX

I have for sale a IC-706 and AT-180. Includes items below:

IC-706 MKI
FL-101 CW filter 250Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

AT-180 (auto tuner HF+6M)

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $1150.00 for everything. I will pay shipping lower 48 states. For another $150.00 I will include a Timewave DSP 59+ (latest software). Unless it is sold first. I can be reached by E-mail or my phone number is 216-741-4717.

I will think about spliting up the 706 and the tuner.
Mike

I have for sale a IC-706. Includes items below:

IC-706 MKI
FL-100 CW filter 500Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $825.00 for everything. I will pay shipping lower 48 states. I can be reached by E-mail or my phone number is 216-741-4717.

Well, I thought the GP68 was the european version of the ht1000.... maybe that's the gp900. (So whoever I said that to- I'm wrong!) I don't know anymore.... :) It's getting too darn hard to keep up with!! So, could someone please fill me in on the GP68 and why they are selling at FRS prices??
thanks!
Randy

Euro-spook radio. Not for sale, legaly, in the USA. It is a keppad programable radio like the JT-1000, but again not type accepted in the USA. VHF is 136-172 MHz, UHF is 438-470. Uses GP-300 Mic. They are longer, and narrower than a GP-300. Thats what I know. BiLL

Hello All:

Thankyou for reading this item. I am asking for $115.00 plus a few dollars for shipping and insurance depending upon shiping mode and location.

I am selling a new Radio Shack Power Amplifier. Perfect for mobile and stationary use. Catl. No. 19-1122. Some Features:

o 30 watts output
o Low Noise GaAs Field Effect Transister (FET) pre-amp
o Accepts 0.5-5 watts input
o Double Tuned Helical Band Pass Filter cuts intermodulation distortion - This is a must
o 13.8 Volts Direct Current

Originally, I purchased 2 amplifiers for 2 cars and only used one. This one is brand new, Never Used.

I would be more than happy to trade you a Talkabout, but a VISAR
is not a talkabout. Talkabouts are Family Radio Service radios,
a Visar is a portable radio for Public Safety and Commercial use.

Well, la-de-da. A talkabout is whatever you want to make it. What a nitpicker, whew! I'll bet you're a real joy to be around all day. "Hey, hand me the HT." " I beg your pardon, that is a portable radio for Public Safety and Commercial use."

Thanks for your reply.

The post was a copy of an email sent to various WIARC club members, as such the general location needed not be specified, however this will be corrected in future postings

As for the date, there were no hamfests scheduled during that weekend when WIARC picked its date. It was only later that we were informed that the Hosstraders were having their hamfest in NH that same weekend. Nevertheless it is fairly distant from the Montreal area and takes place during 2 days so we hope this will not greatly affect the number of hams coming to our hamfest.

We're glad you are enjoying the return of the auction to the WIARC fleamarket, and hope that if this auction is successful and gains enough support that it will remain a part of fleamarkets for years to come.

WIARC

>Public Safety and Commercial use."
>
Just a note, maybe this will help you to post to me, without
showing ignorance of the facts. .

The Talkabout, is a Motorola Radio, called the "talkabout". It
is manufactured in two versions, in a variety of colors.

Now, if he had said a portable radio, a HT, a Handi-talkie, a
Brick, handheld, or any of the other variety, I would have
approached it differently.

But, no, he said a specific product name, a "talkabout".

Now, I explained that, is a very polite manner, and you saw
fit to start flaming. Why was that? Did you have a
bad day today?

A little further education for you, might be obtained at

WWW.mot.com

The home page has a "Talkabout" radio prominently
shown, and includes a link to learn more about it.

Have a nice day, and if I can help you in understanding Motorola
radio products better, please don't hesitate to ask!

Well I wonder if our American friends think we are dumb. Well I was surprised that when I decided to send out a followup usenet message, I was asked if I want to send it to all 9, yes all 9 usenet groups that the original message was sent to..

You'd think that these people would work out that USENET has groups to place relative information and you don't have to SPAM 18,000 groups to get a message across.

If I wanted a flaming RADIO FROM THE US, I would check out the REC radio newsgroups. YANKS, don't treat the world like idiots because we can search usenet ourselves and we do appreciate that you just don't want us to miss such an incredible offer !

I am looking for a version of the MT1000 software that is a pirate version
that The tech at Motorola use:
I got another radio software from them that allows out of badsplit reception
and Transmission, and
allows actual full VHF Transmision. I need this bad, and if anyone knows how
to dump and or reset
the CPU in one that would be helpful also. I tried to program one and the
radio locked up while
loading to the prom, I can still use my other MT1000, read/write, so it is
no the rib. anyways
it is locked up and says 88 on the lcd. ANY IDEAS?

Thanks

M. Storm

I have seen alot of Internet chatter about the Icom IC-2000H not living up to Icom's advertising with respect to intermod. Icon claims this unit to be the "Intermod Fighter!". If the IC-2000H is such a failure and hams are disappointed with the unit, why don't we see more of these units for sale in the newsgroups? Are the people that are buying the units genuinely disappointed? If so, are they throwing their rigs in the garbage and not reselling them? Perhaps all the bad "Internet Press" is only personal opinion from sadistic amateur operators who like to torture themselves buy buying the wrong radio and then feel sorry for themselves in a public kind of way, or, perhaps the units are not that bad after all and the people posting these messages just like to watch themselves type.

I read all of the performance reports for this rig posted by many Hams on the Internet and have read all of Icom's advertising, I imagine this radio to be in the class of the Kenwood TM-261A or the Alinco DR-140T but, without a test rig, I can't form an opinion to post to fellow hams. I did swap a scanner (cell capable, no less) for a IC-2000H that wasn't working (Hmmmm, don't know what happened, just quit workin one day, duh...) and thought I might repair the thing and try it out for myself. Unfortunately, the guy didn't tell me that the unit had been struck by lightning and that all the components 'crumbled to the touch'.

I've tested the Kenwood TM-261A and think that the scan-speed it "too slow", the display is "too glossy" (tough 'read' on a bright day... sunny day?... forget it!). I haven't been able to FIND let alone touch an Alinco DR-140T to form an opinion on this rig yet, but, based on my success with my Icom IC-229H, I will probably buy the IC-2000H as my next rig. So, all you disappointed IC-2000H owners, sell me your unit cheap if you are embarrassed to admit you own one. I will even give you a few bucks for your 2000 if it is not working (this should get those opinionated people typing.... eh?).

Greetings Banff, the heart of the Rocky Mountains!

Your looking for the Lab version.
I'm not shure if it would help you.
Your not supposed to power down / interrupt the radio when loading
a codeplug. You might need to copy the PROM from the other radio.

Are the people that are buying the units genuinely disappointed? If so, are they throwing their rigs in the garbage and not reselling them? Perhaps all the bad "Internet Press" is only personal opinion from sadistic amateur operators who like to torture themselves buy buying the wrong radio and then feel sorry for themselves in a public kind of way, or, perhaps the units are not that bad after all and the people posting these messages just like to watch themselves type.

I read all of the performance reports for this rig posted by many Hams on the Internet and have read all of Icom's advertising, I imagine this radio to be in the class of the Kenwood TM-261A or the Alinco DR-140T but, without a test rig, I can't form an opinion to post to fellow hams. I did swap a scanner (cell capable, no less) for a IC-2000H that wasn't working (Hmmmm, don't know what happened, just quit workin one day, duh...) and thought I might repair the thing and try it out for myself. Unfortunately, the guy didn't tell me that the unit had been struck by lightning and that all the components 'crumbled to the touch'.

I've tested the Kenwood TM-261A and think that the scan-speed it "too slow", the display is "too glossy" (tough 'read' on a bright day... sunny day?... forget it!). I haven't been able to FIND let alone touch an Alinco DR-140T to form an opinion on this rig yet, but, based on my success with my Icom IC-229H, I will probably buy the IC-2000H as my next rig. So, all you disappointed IC-2000H owners, sell me your unit cheap if you are embarrassed to admit you own one. I will even give you a few bucks for your 2000 if it is not working (this should get those opinionated people typing.... eh?).

Greetings Banff, the heart of the Rocky Mountains!

Due to a change in hobbies I have the following for sale:

AOR AR7030, exc. cond. with latest ver. CPU; 400 memories; 2 Kiwa Premium Filter Modules and Kiwa CLF-D2K filter (measured bandwidths in the receiver are 2.1, 2.8, 3.5, 4.4, 6.5, and 9.0); Kiwa audio mod; Kiwa highpass filter mod (better IP3); optical encoder for main tuning (same main tuning encoder as AR7030+ model); remote controller; AC adapter; manual; thick notebook of AR7030 reviews, tech. data, correspondence with AOR, synch alignment, etc.; connecting cables with DIN plugs for PC control & audio output, and custom padded travel case. I also have the original shipping carton if it's wanted. Total new cost for the receiver and accessories was $1650. Sale price: $975 US. plus shipping/insurance.

Detailed information on this receiver may be found in my online review at this URL:

http://espresso.ts.uvic.ca/aor1.htm

a followup article (updater) is at:

For Sale.....

Radio Shack HTX-212 2M FM Mobile.

Has a problem!!! No Transmit Power Output.

I can hear the "low level" transmit signal in my

scanner or my HT, so it is on frequency ok,

and modulation is ok, But no Power output on the

antenna jack at all. (selling as-is).

Receives fine, excellent sensitivity etc....I have the

DTMF microphone for it, original manual and box.

$75.00 plus $5. to ship it usa/48

Email-me n8lmt@x2.alliance.net

I have a ts-140S and for some reason the radio shuts down if the SWR reaches
a particular level. I have tested on various levels from 2.2 - 1.5 and it
seems to shut down somewhere around the 2.0 level. So here are my questions:

o Does the radio have a Sweet spot of where it shuts down? I do
not have the issues
as much on voice unless you throw a real high pitch.
o Is there a way to increase the sweet spot so to speak?

Any ideas or information would be helpful. Just does not seem right that the
radio would shut down with a SWR of 2.0, but I could be wrong.

THANKS 73's Tom - N1ZPC

Hello
I have a Kenwood TS 680 I would like to sale. I'm asking $650.00. This price includes shipping. The radio is in good shape. The radio has no mods. It covers 160, 80, 40, 30, 20, 17, 15, 12, 10, and 6 meters. The rig comes with hand held mic, DC power cord, and instuction manual. The rig is pretty good shape. If you are interested drop me a email.

I've owned a IC-2000H for more than a year and have had no real intermod problems. The only complaint is the internal speaker needs to be replaced. If you turn the volume to a comfortabe listening level the speaker distorts and or vibrates.

The radio , if aligned and operating properly, will shut down to 30
watts out at an SWR of 3-1 on 20m. That is the alignment criteria.

If you care about how these groups are going, you had better pay attention to a SMALL group that want to have it their way. I am tired of these people trying to tell us what we should or should not say in a message or group. IF YOU DON'T LIKE WHAT'S IN THE GROUP.....YOU DON'T HAVE TO READ IT.

If you want moderated groups....then bring them into existance and be done with it.

All readers.....be prepared to let people you don't even know tell you what you should and should not be able to do in these groups.

Forewarned is forearmed.

I started getting the RFP and quickly unsubscribed.....what a waste of time to try and read it. Only one day and over 20 messages from the same individual......I love these "For your own good." attempts.

I guess i dont understand your comment. If i want to read about Ham gear
I would go to a Ham news group, if I want to see smut I would go to a
porne news group. Whats rong with commenting on whats posted hear or
there....after all you do!!

Hi Pat,
I don't know. When I go into a ham radio equipment newsgroup I sort of expect to talk about radio equipment and not Scientology.

Likewise I don't go into a ham club meeting and expect to be able to start telling everyone about the virtues of basket weaving. Wrong place, wrong topic.....

rec.ham-radio,rec.ham-radio.swap,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

You might note that COM2: and COM4: use the same IRQ -- that often
causes
problems with other communications software... I suggest removing the
MODEM
for a test, that is the only way to quickly tell if the rig, software
and
cable are OK.

I suspect the cable, rig and software are OK, just a bit touchy!

You will also want to upgrade the software, V1.03 has bugs download the
patch
from RT's site: http://www.rtsars.com

I just purchased the software and cable ... after some start up
problems, and
the bugs in the version 1.03, I finally have it up and running.

Tom must not have check Tandy parts before opening his mouth!
I would have liked to pay $5 for the thing. It cost me $23 shipped
from national parts.
If anyone wishes to dispute the price call Tandy's National parts
line at 1-800-843-7422 and ask them the price for part number

Charlie;
I recall back in the late 50's and through the 1960's E.F. Johnson
produced a CB model which had 6 or 8 Xtal controlled "slots." the
model I owned was called a "Viking," and it was a decent little rig -
as CB's went at the time ... I was in the USN at the time, and recall
hooking it into a linear amp of some sort (military), patching it into
one of "my" large antenna systems in the Caribbean ... and blasting hell
out of the fishing fleets at the time ...

For Sale, Henry 2K-2 Amplifier

I have a Henry 2K-2 floor console Amp for sale. It is in very good condition. It runs a pair of 3-400Z tubes that have full output 1400+ watts output. It works on 10 through 80 meters. Has tuned inputs. It uses forced air cooling with chimneys on each tube. It will run eater 3-400Z or 3-500Z tubes. Very clean inside and out. With book.

$700.00 or Trade for HF Rig ??

Will not ship, but would meet within 200 miles of Eureka Ca.

440 was owned by a heavy smoker and is full of tar. The VOX circuit does
not work.I heard orifice say this on the air as he worked on the
goo-covered,broken mess. Buyer Beware!

I believe that I still have some am xtal filters as well as some
cw filters for the 101's. I also have some aftermarket boards to
ehance the rcvr gain and agc circuits in these as well. I probably
have a few other things like all the card extenders for this and
other Yaesu's. I have several extra service manuals for the 101's
too. At this time I think I have the 11 meter xtals but not 100%
sure.

I am looking for a very good condition HTX-202 2mtr Handheld. It must have the original antenna, ni-cad pack, AA pack, manual and carry strap. It should be in exellent physical condition and needless to say, in likewise exellent operational condition. I have for trade a n extremely nice Pro-51 Scanner. If not that, tell me what you are looking for in dollars or other radio items. Perhaps we can strike a deal. Please write me with complete details. Thanks

I have one of the early TH-79A's which has been modified for extended Tx/Rx, and which covers up to 512Mhz on UHF. These are fairly rare, as the Microprocessor was changed in subsequent production runs, to only allow UHF operation up to 470Mhz. This is a problem for those having public service activities above 470Mhz, where they are forced to listen to an image.
My TH-79A will cover this range , both Rx and Tx, directly.
It comes with all standard accessories, manual, boxes, and includes the KSC-14 dual compartment, drop-in charger. I am also including 3 battery packs. They are all 6V, 2.5W packs, with capacities of 600, 900, and 1200 mahr. The 900 mahr pack is a new NiMH pack, and the other 2 are NiCD with new inserts.
The radio and all accessories are in excellent condition, both cosmetically, and operationally. and I will ship all for $315, ConUS.
If interested, please reply by direct email.

Does anyone have a schematic of the Heathkit
IG-102 100khz to 110mhz rf generator. Mine died
after many good years. I can only guess that a tube
has gone on to better worlds. My problem is that
only one tube has ID numbers on it (12AT7) the
other tube is a 6A??A. If I can't get a schematic
can someone out there tell me what the 6 volt
tube's number is supposed to be??

Thanks

CD Quality Cable Stereo Receiver
- and -
50-150mHz RF Communications Electronics Bonanza

StudioLine COMPANDING FM RECEIVERS (See Photo) with
up to 90db audio s/n ratio for Cable
(and other RF Distributed) consumer and professional Audio.

Complete specs functional descriptions of electronic modules
and many images of handsome enclosure and circuit boards
is on display at:

http://www.lasermotion.com/DEALS.html

WHAT THEY ARE: Three RF receivers in one box with "F" connector input,
and RCA phono outputs for two channels of audio.
Two receivers are FM audio channels, can be tuned (VCO Circuit) 50-150mHz
and the third receiver (at 50.675MHz with 10.7MHz IF) is dedicated to
optional control and programming functions.
The audio section includes the 3:1 "expander" section of a companding system.

(Original (OEM) Large Quantity Manufacturing Cost in Japan = $321 /each)

THE STORY: StudioLine technology for economically distributing truly
studio-quality audio programming over existing Cable & Wireless broadcast
systems was originally developed by FM Systems, Inc.., Santa Ana, CA. with
funding provided by The Chronicle broadcasting company in San Francisco,
CA. We acquired the equipment and rights. Pricing is very affordable.
Head End transmitters are available inexpensively from
FM Systems, Inc., Santa Ana, CA.

The units are unused and in original manufacturer's packing.
Schematics and technical info is included.

Shipping weight: 7.5 lbs.
You pay UPS ground shipping. We pack it for you.
Thanks

don't have a cable, but you may not need one. I modified on of the
"commercial" versions of the ft23, slightly different number, the fth-2006,
to be programmed from the keyboard, making it a freely progammable ft23 with
complete 140-200 mhz tx-coverage! yaesu has the missing keys of the ft-23
keypad hidden under a peace of plastic.
Just soldering one jumper #9, and some mechanical stuff to reveal the hidden
keypad keys did the trick!
If you want more information, let me know.

Fellow Hams,
The time for action is at hand. There is only a short time to act on this.
It appears to me that they gave us less than a month to reply so that this would not have time to be published in the ham magazines, so we must use other methods to get the word out quickly. Please read thru the info below, I got it from a remailer that I am on at home but I wanted to share this with all the hams I know. Each one of us must act or lose one of our most popular ham bands.
All you need to do is write a short note saying that you oppose RM 9267.
Send it to -
Secretary, FCC, Washington DC, 20554.
and do it by June 1st. Be sure to sign it with your name and address and callsign.
73, Dave KD5FX

Greetings:

I know that this subject has been broached in the remailer. But here's some more info which was just brought to my attention.

First one from the ARRL, the second from WA6ITF & Company.

SB QST @ ARL $ARLB030
ARLB030 LMCC petition opposed

ZCZC AG30
QST de W1AW
ARRL Bulletin 30 ARLB030
>From ARRL Headquarters
Newington CT May 7, 1998
To all radio amateurs

SB QST ARL ARLB030
ARLB030 LMCC petition opposed

The ARRL is organizing opposition to a new threat to the 70-cm Amateur Radio band. The Land Mobile Communications Council (LMCC) has asked the FCC to immediately reallocate 420 to 430 MHz and 440 to 450 MHz from the federal government to the Private Mobile Radio Service (PMRS) on a primary basis. Amateur Radio now enjoys the use of 420 to 450 MHz on a secondary basis, and the 430 to 440 MHz

segment is an international allocation. The 70-cm band is the second most popular of the hobby's VHF/UHF allocations, with substantial FM repeater and other operation in the 440 to 450 MHz segment and a variety of uses in the 420 to 430 MHz segment.

The LMCC request, based on ''additional spectrum needs of the PMRS community,'' acknowledges Amateur Radio's use of 420 to 430 and 440 to 450 MHz, and suggests that ham radio applications can remain secondary to PMRS in those segments, but offers no explanation of how sharing could be accomplished. The LMCC says it believes the 430 to 440 MHz subband ''is more important to the amateurs for use in emerging technologies such as links with spacecraft and amateur television applications.''

The petition also suggests that equipment availability and technology resulting from an expanded PMRS presence on 70 cm would benefit hams ''pursuing such applications as compressed video television in the 430-440 MHz band.'' The LMCC concedes, however, that its ''most urgent need'' for PMRS is voice and low-speed data applications, not advanced technologies which might come later on.

The petition also notes that PMRS already uses 420 to 430 MHz in three Canadian border cities (Buffalo, Cleveland and Detroit) and a ''reduction in military use of this band is foreseen.''

The LMCC also seeks allocations at 1390 to 1400 MHz, 1427-1432 MHz, and 1670 to 1675 MHz as well as 85 MHz at 960 to 1215 MHz by 2010.

Comments are due on the LMCC's Petition for Rulemaking, RM-9267, by June 1. Reply comments are due by June 15.

MORE INFO....

From: BillWA6ITF <BillWA6ITF@aol.com>
To: repeater@repeater.net
Subject: [rpt] Newsline Version - 420 MHz threat: RM-9267 from LMCC
Date: Fri, 8 May 1998 14:07:50 EDT

Here is our Newsline version of the story. Unlike every elses, it gives info on how to protest and where to send that protest -- aka -- commentary.

I'll add -- do not look to the ARRL, W5YI, the FCC or anyone else for salvation on this one. ONLY YOU can save our ham bands. Do not wait for some 'annointing power' from Newington, Dallas or Washington to tell you what you already know. These are you bands. You and only you can protect them.

Learn to be your own leader instead of playng 'follow the leader.'

de Bill Pasternak, WA6ITF / Newsline

LMCC DEMANDS 70 CM HAM BAND FOR COMMERCIAL USE

The Land Mobile Communications Council has issued a demand to the FCC that it immediately reallocate of most of the 70 centimeter Amateur band over to private mobile operations with private land mobile designated as the primary user.

Technically the document is nothing more than a formal rule making request to the FCC that has been designated RM 9267. In reality it is more a demand by the LMCC for the FCC to immediately reallocate 420 to 430 MHz and 440 to 450 MHz away from the federal government and over to the Private Mobile Radio Service on a primary basis. The Land Mobile Communications Council is also asking for news allocations at 1390 to 1400 MHz, 1427-1432 MHz, and 1670 to 1675 MHz. It is also demanding a walloping 85 MHz at 960 to 1215 MHz and it wants all of this turned over to the Private Mobile Radio Service no later than 2010.

But LMCC is not willing to wait until 2010 to take over the 70 centimeter band even though this is the second most popular of the Amateur radio services' VHF and UHF allocations. Amateur Radio is a secondary user of 420 to 450 MHz. There are thousands of FM repeaters operating from 440 to 450 MHz and a variety of modes on the air every day in the 420 to 430 MHz segment. While the Land Mobile Communications Council petition indicates that it is willing to permit Amateur Radio to retain some sort of secondary status, this would be only on a non-interfereing basis with the new commercial interests.

Experts say that the best way to kill RM 9267 is though a massive letter writing campaign to the FCC. A campaign that outlines the specific use of the band by Amateur Radio Interests -- informational filings that detail how every hertz of 420 to 430 and 440 to 450 MHz is utilized on a day to day basis by hams.

The commentary cutoff date on RM 9267 is June 1st. This leaves precious little time for radio amateurs around the nation to react. Those responding must be certain to reference RM 9267 at the top of your letter. Send comments to the Secretary, FCC, Washington DC, 20554.

Again, that June 1st as the commentary cutoff date on RM 9267. Comments go to the Secretary, FCC, Washington DC, 20554.

EDITORIAL:

This is actually an end run by the LMCC to get spectrum for free. Others in the same business have had to BUY the spectrum

at auction. This is only the first in the pressures to get spectrum for free when others have pay for it. There main argument will be that their spectrum loading studies indicate that these frequencies are used very little by Amateurs and a secondary use basis is adequate for the Amateur needs. Just think of it folks, all those phantom repeaters that are on the coordination books that have been blocking the real use of these frequencies will be our undoing. The other ugly fact is that the LMCC members contribute to congressional re-election campaign fund and the Amateurs do not.

These are the facts. The spectrum alligator is biting off chunks all the time. 902-928MHZ has become useless will the addition of many other users. We are about to lose 1240-1260MHZ. Every year we will see more chunks bitten off our spectrum. The argument that Amateurs push forward technology just isn't true today. The only thing we support is technology that is 30 to 50 years old. The commercial market has pushed technology and we have resisted. As far as the Amateur is concerned 1200 baud is good enough. Try that one on any 14 year old today and they will laugh at you. Ask most Amateurs what TDMA or CDMA is and you will get a blank stare. Our amateur community has insisted that the rules OUTLAW any technological progress. The last change was when SSB came in the 50's. The digital technology we support is from the 30's. Today we have to justify our usage. We can bicker all we want, others will only view this with amusement.

I think we agree on all points here. One suggestion I have for everyone here:

Crosslink! Take your 52, 220, 440, 1.2 pairs and link them, FULL TIME, to the busy 2m repeaters in town. That will at least get some voices into our under used spectrum. If people bitch, tell them to go talk on another repeater.

I'm sure all of these groups going for spectrum have spectrum analizers in storage mode across all bands. Where they see quiet, they demand, and I think rightfully so, to use it for more productive uses. We've sat on our butts for years moaning about HF (which NO ONE wants) and contests (getting points for adding to congestion?) and CW (there's a bright idea, insist that people use the most narrow bandwidth to justify more spectrum).

Time to get the projects off the bench and on the air. I'm guilty too... I have a couple repeaters to install. Let's let this be our motivation.

Don't think about writing to your congressman or the FCC until you can honestly say you're helping the service. If you're on the same bands and the same modes as you were 10 years ago, YOU

are the one that caused this situation.

This power supply is the 12V version of the AN/GRC-? which is a radio set from the 1950's which was used by the military. There was also a 24 version of this power supply. There were two versions of the transceiver using this supply, one covering from 27-38.9MHz and the other from about 38 to 54MHz. My particular experience with is was in the mid 50's while an ET in the US Navy. We used this radio in the LCVP landing craft. I understand that the army also used in in tank and other vehicle applications.
I used to repair them. They did have an internal schematic which was printed on silk as I recall.

Less than 1 year old Yaesu FT-840 with FM-747 board for 10 meters, and 500Hz CW filter. 10-160 meter and general coverage receive too. This rig is in excellent condition and includes original box and owners manual. Have upgraded to FT-1000. Wish I could keep the 840 for mobile but can't afford both right now (and divorce is too expensive!) If interested email me at n1zni@maine.rr.com first $675 takes it (will pay shipping to lower 48 at $675).

Today I opened a package that my father had wrapped when I was a child. The paper crumbled in my hands as I removed the twine around it. The power cord and plug looked like the rubber had melted away with age. I did not plug it in to see if it was working. The radio has three knobs in front, one is the on-off-volume , the second is the band control and the last is for tunning. The tunning dial is divided into two sections, Foreign and American. The wood case is in very good condition even with a water mark left by a glass on top. Is this model considered rare or collectable?

R.W.Schlachter.

533. For Sale: CELLWAVE 903- 915 AMPLIFIER

Hello listers:
I don't have a service manual for my IC2340H Dual bander. Can
someone who has one please tell me the value of L8 on the two meter
side of the radio?

On the advice of my local radio store, I replaced the high power module
but this may be the problem.

Any help will be greatly appreciated!

Didn't we see this the other day? What does a pyramid scheme like this have to do with CB radios or any kind of radio at all? Why post this to all of the newsgroups? Don't they have a newsgroup called rua.sucker.yet? That is the only type of person who will respond to this kind of ad.

537. FS: Icom 820H at Dayton

I have two items that might be of interest to a collector. The first
is an I TT Mackay Marine Type 401-A portable lifeboat emergency
transmitter with all spares, mounting bracket and lifeboat antenna.
Unit is in mint condix. You pickup. Weight about 40 lbs.
The second in an original Instructograph code practice maschine with
all paper tapes. Circa 1947. Mint condix.
I have no further use for them and they are taking up space.
Please replt by e-mail to tstrong@acadia.net

> Oh, I'm sorry I don't come to rec.RADIO.swap to read ads for PCs. I come to rec.RADIO.swap to read ads for radios. If I wanted to buy a PC, I'd go to a computer newsgroup. This one is called rec.RADIO.swap not rec.COMPUTER.swap.

Well you can shop here now, just as we have been for some years now,

for rigs and pcs too! Why did you know a buncha rigs are actually

controlled by pcs? Can't run digital modes without 'em dumb shit!

Incredible concept, huh?

>If we are going to resort to name calling, hey dumbass, "re-tarrd" is >spelled retard.

You are correct sir for individuals with normal IQs!

Traditionally, the number of Rs placed in retard indicates just how

badly retarded one is, it should have been spelled retarrrrd!

>Using your logic of advertising a computer in a radio newsgroup, why >not advertise a cellular phone for sale in video equipment for sale >because "you can use a cellular to order video equipment parts" or in >sports equipment for sale since most professional athletes have >cellular phones. Hey I'm selling my car, well advertise it in a realty >ad because you park a car at a house.

I don't have a problem wit dat! Did you notice the guy selling the

7000.00 truck for 4000.00? Right here in good 'ol rec.radio.swap, know

why? You can put a transceiver in them suckers! Somebody here might

have a rig and no fuckin' truck. Whats he sposed to do? God your dense Bubba.

You find out what your real name and call is yet?

Love, Butch Magee, KF5DE

FS: Midland 13-510A 25 watt 2 meter mobile. The "A" version
covers 143 to 149.995 MHz with three power levels (1, 5, 25).
The radio has NO memories (uses cerebral cortex memory).
Standard +-600khz repeater splits are supported.
I have installed a Comm Spec TS-64 CTCSS encode/ decode
module ($70) and changed the analog s/rf meter to a 10 segment
led bar (looks good!). Included is the standard microphone, power
cable and owner / service manual. I can provide a picture.
I have owned and used this radio as a base station for the last 5 years. I'm
asking $100 plus shipping

Thanks for reading this post

I have for sale the following items:

1. Novex FC-7300 HF converter. Allows users of the Yaesu FRG-9600 and Icom R-7000 all mode HF reception. Converts HF and VHF-LO bands to 100-160 MHz range on either of the above radios. Will also work with any scanner (limited to the available modes on the radio). Example: to receive the BBC world service on 5975 KHz, the user tunes his scanner or receiver to 105.9750 MHz, AM mode. The converter is switchable and has N connector jack for VHF antenna passthru. Radio is also fed with N connector jack. SO-239 jack for HF antenna. Unit is in fairly good condition. Has two holes drilled in top of plastic cabinet which facilitated mounting underneath a shelf. Requires 12volt DC supply which is not included. Was $249.00 new approx 5 years ago. Will sell for $100.00. Works great!

2. Kantronics KPC-3 Amateur Packet Radio TNC. Has 128K mailbox. Includes cable to interface with older Icom HT's such as the 2GAT. Also has two holes drilled in top of cabinet. In otherwise excellent condition. Will run on 9 volt battery for portable use. Requires 9-12 volt supply, not included. Will sell for $90.00

Will ship above items COD cash/money order only. If interested, please reply to e-mail address below, do not post reply in newsgroup!

To Mr.John Andrews

Hello!
Thank you e-mail.

I am not interested in MAC PC. I'm sorry.
I have used PC-AT.

JRC-245 is very good condition.
So you have NRD-535D, I know it have good design,performer.
Noise level is better than NRD-535D.
Because it does not have display noise.

If you can get it, you will like it.
My JST-245 is mint condition.

Best regards,
73

571. FS: Electronics and Communications books

Newsgroup: rec.radio.amateur.swap
Date: 1998-05-21 00:00:00 UTC
From: W8EK@usa.net
Message-ID: <6k1km7$g5s$1@nnrp1.dejanews.com>
Source record: 9932
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.swap

I have the following books (all in excellent to new condition) available:

Practical Electronics Troubleshooting by Perozzo
Good information on troubleshooting all sorts of electrical
and electronic devices $ 15

Understanding Data Communications by Friend
The title says it all! $ 15

Understanding Communications Systems by Cannon
This one covers all sorts of communication systems -- not
just the data communications like the one above. $ 15

An Introduction to Fiber Optics by Shotwell
Not in great depth, but an easy to understand book $ 15

Introduction to Electronics and Electronic Shop Practices
by Worden - Mainly a "Shop Techniques" book, with lots
of reference charts, etc., but some theory included $ 18

Digital Electronics by Uffenbeck - Technician Level text
Covers from number systems to shift registers to Programmable
devices to interfacing $ 25

Electricity - Principles and Applications by Fowler
Part of McGraw Hill's "Basic Skills in Electricity and Electronics"
group of texts. Mainly theory, in easy to understand
explanations. $ 20

Electrical Measurements by Smith & Wiedenbeck
Classical measurements book - Engineer level $ 15

Principles of Electronic Communications by Mandl
Includes modulation, amplifiers, noise, transmission lines,
antennas, etc. $ 18

I also have

Exploring Handbook - 1958 - close to new condition $ 20

Handbook for Patrol Leaders - 1950 copyright - 1959 printing $ 18

1986 American Red Cross "Expect the Unexpected" $ 2

If you would like more information about any book, please e-mail to
W8EK@usa.net. All books are in good shape.

Prices do not include shipping from NE Ohio.

Hi

I have 4 Items for sale. I originally had these items posted as for pickup in the MD area. I changed my mind and am willing to ship these items.

Note: The price for the 830 does not include shipping. I am not sure how much it will cost to ship the 830 but if anybody is interested, I can find out

Here are the items I have left:

Kenwood TS-830S HF Transceiver with Shure Desk Microphone- $500
Ameco Preamplifier for HF through 6 Meters- $75
Kantronics VHF1-60 2 Meter Amplifier- $150
MFJ-1276 TNC- $75

For more information, EMAIL me at keithc@mail.com or call me at (410) 682-3594. If you are in the MD area, I can demonstrate the 830 or anything else to show you that it works.

Thanks,

Keith Calligan

Lets see:

6 of them you have
for $50 each?

but all of them for $40

wow!

Sounds like volume discount in a non-linear equation

$200 (I have seen them for over $400 used)
Handheld (Smaller than a TH-G71A) 100 Khz - 1300 Mhz continuous.
AM/FM/WFM, 100 channels with 10 programmable freq edge-scans.
with VHF/UHF Ducky antenna, manual, and DC lighter plug, works on
6-16Vdc)
has priority watch, and tuning steps of .5, 5, 8, 10, 12.5, 15, 20, 25,
30, and 50 Khz.

will trade for dual-band Amp (45/35W) or older dualband mobile unit.

585. FS: Antennas in NE Ohio

Newsgroup: rec.radio.amateur.swap
Date: 1998-05-25 00:00:00 UTC
From: W8EK@usa.net
Message-ID: <6kc72l$9of$1@nnrp1.dejanews.com>
Source record: 9946
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment,rec.radio.amateur.antenna;

We will be moving soon, and unless a ham buys the house, will have a variety of antennas and towers for sale.

All are located in NE Ohio, with pickup being preferred.

The following are available.

Hy-Gain "Hy-Tower" Vertical - This is the full size vertical that is about 55 feet tall, with about 25 feet of actual tower on a tilt over base. $150

Cushcraft A-147-22 two meter beam - pair of stacked 11 element antennas with phasing harness, etc. $ 100

65 feet of very heavy duty Riverview tower. This tower is rated to hold 14 square feet of antenna, with no guying required. Obviously, it will hold much more if guyed. $ 450

You can also get all of these antennas, and much more, by buying the entire house, located on one of the highest locations in Stark County. E-Mail to W8EK@usa.net, or call (330) 499-7388, for more details.

73,

Ken, W8EK

Radio Shach unable to help.
Recently purchased a HTX-202 on the net and it came with a beautiful box, but not the original (I believe they utilized stiff cardboard) packing insert where the radio, antenna, ni-cadd pak and AA pak and manual would have been secured for shipping. As a collector, I do enjoy having my items kept in their proper containers when not in use for extended uses.
Anyone, out here have what I need? I would be willing to purchase the box as well if required. I feel everything could be properly flattened and sent in a large manilla envelope of the 8.5" X 11" variety, then re-assembled once here.
I would pay a reasonable price to anyone who has these items, in near mint to mint condition who is not interested in the packing material and so forth. Please, write with full condition, price and any other details I may need to contact you.
Thanks
Ray Miller N2NJK

595. WTT Drake SW8 For Good Desktop Rx

I have a SW8 I purchased early this year, and would like to trade it for a used desktop.
NRD 515, NRD 525, R8 or a R71A I have seen most of these sell for 475 to 525 and that is about what I see the newer SW8's go for.
Prefer Local but Can Ship via UPS with no problem.

Source record: 9868
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have the following for sale. The prices in parenthesis are current NEW item prices from the latest HRO catalog. You won't find a package like this closer to new condition than these are. My total price for the lot is $400 plus shipping. I am only interested in selling in the continental U.S. and payment will be by money order in advance. If you want to you can look me up in any callbook, I have had the same call for about 20 years and my address had been the same for the last 10 or so, and before that, 6 blocks away, for 23 years. Everything is in EXCELLENT condition as I don't think I have actually transmitted on this radio more than twice. I decided that I prefer my older and larger Icom Z1A so I am selling the Yaesu. Feel free to make offers for individual parts but I am going to wait a little and hopefully sell it all as a unit.

FT-50R Dual band HT ($350)
FNB-41 9.6V 600Ma Battery (Included in basic package)
NC-60B Overnight AC charger (Included in basic package)
Soft Case (Included in basic package)

FBA-15 AA battery case ($20)
FNB-V47 7.2V 1200Ma Battery ($56)
MH-34 Speaker Mic ($31)
MH-37 Earphone Mic ($31)
LT-30 Mic Adaptor ($11)
E-DC-5B Car DC Adaptor ($27)
ADMS-10 Programming Software ($40)
Rubber Shell ($8)

Total Price (if bought new today) ($574)

PS. For all the self appointed price police out there. I don't really care if Mannys Discount Barn is selling these radios for $5 a dozen. If you don't like my price feel free not to buy the radio. I personally think that this is a fair price but do have a little leeway for haggling. If I don't sell at this price I may lower the price, or I may just keep the radio, I don't need to sell it.

Well, I lot of help I was!!
Not only did I not supply the URL, but I even managed to mis-spell the name
of the company. Hopefully, this will be better:
http://www.rust.net/~hires/
Cheers!

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of
Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes with original antenna, box, AC wall adapter, and a BP-83 battery. The radio also has the CTCSS encode/decode board inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US for the package, buyer pays shipping and prepays with an International Money Order if outside of Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you have any questions (remove the stuff in quotes, thanks :)).

629. FS: CCA VGC KWM-2 (WE)

Newsgroup: rec.radio.amateur.swap
Date: 1998-06-07 00:00:00 UTC
From: Ed Juge <ed@juge.com>
Message-ID: <357b4385.0@oracle.zianet.com>
Source record: 9891
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.swap

I have a very nice, CCA VGC, winged, KWM-2, S/N in high 11,000's. (Front panel / cabinet appearance is more like CCA Excellent.) Very few, almost-undetectable marks on cabinet and front panel. Chassis is very clean. Crystal codes are mostly 6-62.

The radio was just gone over thoroughly by Bud Whitney, K7MRT. He replaced several weak tubes, several caps and other minor parts, and thoroughly aligned and tuned it. When I bought it, the original RCA antenna plug had been replaced with a BNC. Bud exchanged that for an original ceramic RCA. The rear panel, immediately beside that plug shows some scuffing. Wired-in relay has also been changed. The radio works perfectly on all bands with full output. PTO tracks great end-to-end.

I'm asking $650, which is a bit less than I have in it, but will entertain reasonable offers. Add $20 for UPS surface shipping. Please reply by email.

Hello,

Are you driving between cities and searching for a Repeater in
the Western States? The Travel Repeater Directory and Maps contained
in this 29 paged book will make it simple. Whether you're out for a
drive
or on vacation, locate the nearest city or highway to you on the map and

the closest repeater will be listed.

We encourage you to visit our site and take a look at this new
book, and any feedback you can provide will be greatly appreciated.

I am the original owner (still have the shipping box). It's a WP-738-1.
The cavity is currently tuned to pass 146.000 and reject 145.700 with 32 dB
rejection and .5 dB loss. Wacom can supply retunning instructions. I no
longer use it and don't want to look at it anymore. I'm asking $75 (less
then half of what I paid for it about 2 years ago) buyer paying shipping.
Yes it can be shipped UPS.

Thanks
Michael

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes
with original antenna, box, AC wall adapter, and a
BP-83 battery. The radio also has the CTCSS encode/decode board
inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US for the package, buyer pays shipping and prepays
with an International Money Order if outside of
Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you
have any questions (remove the stuff in quotes, thanks :)).

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of
Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

I have a Yaesu VX-1R complete with original box, antenna, manual, and charger. I also have 'The Clip', a Comet SMA-501 and a Comet SMA-503 antenna for this radio. This unit has the Freeband Mod and receives everything. This radio is less than a year old and is in very good condition. I haven't had any problems with it, but I live in an area where I need more Watts to work the local repeaters.

I would like to swap/trade for a Kenwood TH-79A(D) in equal condition. Please reply via EMAIL ONLY to randyz@telusplanet.net.

Message-ID: <6lujeu$v9$1@news-1.news.gte.net>
Source record: 9816
Cross-posted to: rec.radio.amateur.swap,sci.electronics.equipment,sci.electronics.misc,misc.industry.electronics.marketplace,rec.radio.amateur,rec.radio.swap

I have for sale two new, in the box, Pioneer Magnetics switching supplies:

1) Model PM2500A-1 switching power supply. Rated at 24V at 40 Amps - $60 + shipping

2) Model PM2496A-1 switching power supply. Rated at 24V (adj 19-28V) at 16 amps - $45 + shipping

These supplies would make wonderful heavy duty supplies for a Ham radio project or commercial application.

Even though these units are new and unused, they have been in storage since factory burn in (the Test acceptance data is supplied with the unit). These supplies are being sold AS-IS, with the buyer paying shipping. Money Order or Certified check only, please.

Thank you..... Jim Flanagan WB5KYE

653. Thermal Wire Strippers for SALE

Pat,

I am interested in your wattmeter, but I am unfamiliar with the specifications of this model. I need to be able to measure from 10 mw to 30 watts in the 2 and 6 meter bands. I have used Bird equipment in the past, but I no longer have access to it. From the description of my needs, does it sound as if your HP430 would fit the bill?

What is totally amazing is the membership of NCI allows things like
what you show on your web page to happen in their organization. I guess
that is what you get when a bunch of people trade their morality for a
free HF handout.

No MD that is what you get when you allow an idiot with a grudge to post heavily edited and out of context excerpts from the newsgroup. I noticed he didn't include any of his pearls of wisdom posted on the newsgroup in his website.

The sad part of it is you joined this charade and are trying to bump up his hits.

"Heavily edited"? "Out of context"? Maybe you'd like to post some examples,
Dave.

>I noticed he didn't include any of his pearls of wisdom posted on the
>newsgroup in his website.

Why should he? Isn't that what the web page is for?

>The sad part of it is you joined this charade and are trying to bump up his
>hits.

I visited. I found much of what he says to be "right on" target.

I realize that you probably feel betrayed, learning now for the first
time that you were duped into joining an organization which exists now
solely to profit the leader(s), all of whom are self-appointed-for-life
dictators. But, that's what you get when you fall for the old class-
warfare line.

Actually MD I have no problem with being a member of NCI and I have actively recruited several new members recently and they are well pleased with the organization. Steves' website is probably a good place to refer potential members too as an example of what kind of prestigious is out there regarding the new Amateurs entering the ARS today and why NCI is working hard to be representative of all Amateurs in the ARS today and not just a few license

classes. Do I worry about my membership in NCI, no I don't because too many people like you and Steve seem to be doing the worrying for me.

Mike ... NOTHING of what Jim shows (in most cases, COMPLETELY
out of context) "happened within NCI" ...

Your (and Jim's and Steve's) lame attempts to "connect" my personal
arguments with rabid procoders such as yourself to NCI are absurd
and totally baseless and you know it ...

You are simsply playing the old political game of muck-raking
in hopes that some can be duped by your tactics, plain and simple.

> I guess
> that is what you get when a bunch of people trade their morality for
a
> free HF handout.

Your characterization of the members of NCI in the sentence above is
SURE to enamour you to them ... keep up the good work.

I have a CCA VGC, winged, KWM-2, S/N in high 11,000's. (Front panel / cabinet appearance is more like CCA Excellent.) Very few, almost-undetectable marks on cabinet and front panel. Chassis is very clean. Crystal codes are mostly 6-62.

The radio was professionally serviced/aligned in May (at cost of $155). Several weak tubes, several caps and other minor parts were replaced, and it was thoroughly aligned and tuned.

Previous owner replaced the original RCA antenna plug with a BNC. That has now been returned to the original ceramic RCA. The rear panel, immediately beside that plug shows some scuffing. Wired-in relay has also been changed. The radio works perfectly on all bands with full output. PTO tracks great end-to-end.

Power supply NOT included. Best offer over $550 this week. Add $20 for UPS surface shipping/insurance. Please reply by email.

Hi,
I have a four month old Kenwood TH-79AD for sale. I'm selling it as a package with two High Power (5w) battery packs and a two battery desk rapid charger. The radio also has the out of band mod on 2m and 440. I paid $560 four months ago, I'll sell the package for $400.00 shipped continental US. This radio is in excellent condition with very few hours use.

I have the manual but I'm not sure if I kept the box.

Please respond via E-Mail to peaster@connors.cc.ok.us

Thanks and 73's
Mike Peaster

Hi Everyone,

I am starting a collection of ALL SONY World Band "Shortwave" Radios ever made, old & new.

I have about a dozen so far and I need everyone's help to find these original radios in "mint" condition with original accessories and box for collecting.

My question is: Is there anyone out there started such a thing? (...or maybe I am nuts??!!) Where to start looking for older model SONY Shortwave World Band radios? Is there a Radio LIST of all the SONY "CRF","ICF SW" & "SW" models on the net somewhere?

If you have ANY SONY World Band Radio in mint shape, please email me with your model number and best price for a "CRAZY" collector!! :=)

Thanks in advance and any response will be appreciated!

Have an Astron RS-20A power supply that is surplus to me. Would like
to trade it straight up for something I could use such as:

Memory Keyer
HF Transmatch
Drake W4 wattmeter
25W synthesized 2m rig (older models that will tune current splits)
Video Capture card for my PC that I can plug a cam corder into
Stack of blank CD-R's
10" Table Saw

or let me know what you have. I am NOT interested in any converted
commercial uhf/vhf FM stuff, have no use for it.

Hi,
I have a 2M kenwood mobile radio, model TR-7850 for sale.
Vintage is early 1980's.
This is a heavy duty rig.
Covers 143.9-148.995
Does standard and odd repeater splits.
40 watts output.
Includes original owners manual, mic, power cord, mobile
mounting bracket, and radio.

Electrically, works fine.
Cosmetically looks good.
It's a bit big for the car, but as a fixed station rig it
is excellent -- big buttons, LED readout, 15 memories,
scan, etc.

Asking $150 + shipping from zip 97123
email if interested.

Thanks,
Joe

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

Folks,

does anyone have a spare audio amplifier for the RCA ET-4336 transmitter for sale? This amplifier is a self-contained, 7-valve unit - mains powered, 110V or 220V AC depending on version. Part nos are MI-11220 or MI-11209.

A friend (not on email or ng) is looking for one of these to complete his ET-4336 installation, and will consider shipping it from anywhere (he is located in the UK), provided it is working, complete and unmodified.

John,

Any of the current rigs (from 1980 on) should work fine for Pactor. I've used a Yaesu 101, Icom 730 and Icom 735 with excellent results. Nice thing about the Icoms is their auxiliary audio jacks in back so you're not always having to unplug your mike.

You should be able to run any TNC with Linux as long as you have a standard terminal communications program. I don't know if the proprietary software, designed for TNCs, will work with it though.

Good Luck.

Radio Randy

>
> Curt M. Breneman

Frequency-wise, it should be fine, but I recall that the upper power range for the thermistor bridge sensors was 10mW. I'm really more familiar with the later 432 model. You'll need some attenuators to extend operation to higher powers, but given good attanuators the thing is capable of very high accuracy.

It isn't a throughline instrument, like the Bird 43. Think of it as a VHF to microwave QRPpp dummy load with super accurate power metering.

Cheers
David GM4ZNX

717. Need electronic version of Yaesu FT 470 manual.

$10.00

4. Beyer, William H. (ed), "Standard Mathematical Tables,
24th ed.," CRC Press, 1973, hbk, G/G+ with owner's
names inside front cover.
$10.00

5. Bucher, Elmer E., "THE WIRELESS EXPERIMENTERS MANUAL,"
Wireless Press, 1920, hbk, G- with no markings but
moisture damage to rear cover and ffep, spine faded.
One of the very early books on experimental wireless
and amateur radio.
$15.00

6. Churchill, R.V., "MODERN OPERATIONAL MATHEMATICS IN
ENGINEERING," McGraw-Hill, 1944, hbk, G/G+ with very
slight wear and no markings on pages. Good early work
on the LaPlace transform and it's applications.
$12.50

7. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND
RADIOMEN," 1st edition, 1st printing, McGraw-Hill, 1942,
hbk, G- with little wear. No markings on pages.

$10.00

8. Cowles, L.G., "TRANSISTOR CIRCUITS AND APPLICATIONS,"
Prentice-Hall, 1968, VG+ with G- DJ. No wear or
markings on book, DJ torn at spine top and shelf
wear on spine bottom. Good basic book on transis-
tor fundamentals and applications.
$15.00

9. Dewitt, David and Arthur L. Rossoff, "TRANSISTOR
ELECTRONICS," McGraw-Hill, 1957, hbk, G+ with no markings
on pages but some tape residue inside front and back covers.
Interesting book on early transistor theory and circuit
design.
$12.50

10. Doll, Dixon R., "DATA COMMUNICATIONS: FACILITIES, NET-
WORKS, and SYSTEMS DESIGN," Wiley, 1978, hbk, G with
G DJ. Slight wearall along spine, owner's name inside
FC, markings on pages throughout.
$10.00

11. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS,"
Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

12. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING,"
1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with
little wear but markings throughout
$10.00

13. Gardner, M.F. and J.L. Barnes, "TRANSIENTS IN LINEAR SYSTEMS
STUDIED BY THE LAPLACE TRANSFORM METHOD, vol. 1," Wiley,
1942, hbk, G with slight wear and no markings throughout.
I have never seen a volume 2 of this book, and don't think
that there is one, either.
$12.50

14. Hamilton, Donald R., Julian K. Knipp, and J.B. Horner Kuper,
"KLYSTRONS AND MICROWAVE TRIODES," Dover, 1966, pbk, G+ with
no markings on pages, some slight peeling of cover plastic.
This is the Dover paperback reprint of volume #7 of the MIT
Radiation Laboratory series.
$15.00

15. Jones, F.D., "DIE DESIGN AND DIEMAKING PRACTICE, 2nd ed.,"
Industrial Press, 1941, 956 pages, G with slight wear on
spine ends and cover corners. No markings on pages, owner's
name(s) inside FC.
$20.00

16. Kerr, Donald E., "PROPAGATION OF SHORT RADIO WAVES," Dover,
1966, pbk, G+ with no markings on pages. This is the Dover

paperback reprint of volume #13 of the MIT Radiation
Laboratory series.
$15.00

17. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL
ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941,
hbk, G-/G with slight wear on cover and spine.
$15.00

18. Kuh, Ernest H. and Donald O. Pederson, "PRINCIPLES OF
CIRCUIT SYNTHESIS," McGraw-Hill, 1959, hbk, Except for the
top 1/4" of the spine missing, this book is in VG-
condition with no markings on pages.
$17.50

19. Langford-Smith, F., "THE RADIOTRON DESIGNER'S HANDBOOK,
3rd ed.," WIreless Press, 1940, hbk, G+ with very slight
wear and no markings throughout.
$17.50

20. Lo, A.W., R.O. Endres, J. Zawels, F.D. Waldhauer, and
C-C. Chang, "TRANSISTOR ELECTRONICS," Prentice-Hall,
1955, hbk, G with slight wear to top and bottom of
spine, very few markings on pages. Good early book
on semiconductor theory and applications.
$12.50

21. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL
SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

22. Middlebrook, R.D., "DIFFERENTIAL AMPLIFIERS: THEIR
ANALYSIS AND THEIR APPLICATIONS IN TRANSISTOR D-C
AMPLIFIERS," Wiley, 1963, G+/XLIB with no markings on
pages, library stamps inside covers, and library
pockets remainder inside back cover. Very nice book
on differential amplifiers.
$15.00

23. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION
TABLES," Dover, 1950, pbk, G
$7.50

24. Peterson, A.P.G. and E.E. Gross, "HANDBOOK OF NOISE
MEASUREMENT, 7th ed.," General Radio, 1972, hbk, G+
with very slight wear and no markings throughout. One
of the essential texts on acoustic and vibration noise
measurement.
$15.00

25. Seely, Samuel, "ELECTRON-TUBE CIRCUITS," 1st edition,
McGraw-Hill, 1950, hbk, G- with some wear to covers, worn
through slightly at corners. Excellent book on elementary

vacuum tube theory and applications.
$15.00

26. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

27. Skilling, H.H., "ELECTRICAL ENGINEERING CIRCUITS," Wiley, 1957, hbk, G-/G with slight to moderate wear, covers worn through on outer corners, but no markings other than owner's name inside FC. Good basic electrcal network, transient response, LaPlace transform, and image parameter text.
$12.50

28. Staib, J.H., "AN INTRODUCTION TO MATRICES AND LINEAR TRANSFORMATIONS," Addison-Wesley, 1969, hbk, G with very slight wear, no markings on pages, owner's name inside FC, and faded lettering on spine.
$12.50

29. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
$15.00

30. Van Der Ziel, A., "SOLID-STATE PHYSICAL ELECTRONICS," Prentice-Hall, 1957, hbk, G-/G with slight wear and occasional markings on pages. Early work on diodes, transistors, masers, photoemission, ferroelectricity, ferromagnetism, etc.
$15.00

31. Westman, H.P. (ed), "Reference Data for Radio Engineers, 4th ed.," ITT, 1956, hbk, G- with numerous notes on backsheets and both hinges torn through paper but not separated. No markings on pages.
$12.50

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

Hello All,

I just thought I'd share a little story with you, being that the JERK over at the Amateur radio WEB RING Delated MY ENTRY!!!!

This is what happened!

I submitted my entry to his "SO called" web ring... but I wasn't to wild on the idea of adding his GRAPHICS to MY website... But I figured, I'd try and get along with the Ham Radio community and So, I did it... and I send him a ICQ message saying I'd done all his little petty commands, and then I get a ICQ message saying HE DELEATED MY ENTRY BECAUSE MY FUCKING E_MAIL ADDERESS DIDN'T MATCH THE ONE IN THE GODDAMN QUEUE!?!?!?! What in the Name of God is WRONG with the HAM RADIO Community today?!?!?! YOu ever heard of FUCKING MULTI-EMAIL ADDRESSES, ASSHOLE!?!?!?!?! EVER HEARD OF E_MAIL FORWARDING SEERVICES?!?!?! Why is it that everytime, I attempted to get along with the self-serving bastards, they always try and make it hard for me to do so???? I know what it is!!! it's becuase, just maybe, he's using his website for a drug cartal... or maybe is becuase I didn't grace his little hand with money, like his buddies UP THERE at A.R.R.L!!!! Another JOKE if I ever saw one...

The point is, If the HAM RADIO people want to make it in the internet scene, they'd better get wise to alot of the stuff on the internet, or they'll be sent laughing back to they're 1200 baud packet stations!!!!

Hi,
I have a new in box, unbuilt HEATHKIT COAX SWITCH.
Yes. it has never been assembled.

I just opened the box to ensure all parts are in there.
They are...in nice sealed little baggies. Condition of
all kit components are excellent.

The manual is copyright 1973, but the kit is probably from
about 1978 or so.

This is a 6 position, 1KW+ antenna switch box.

$70 + shipping from zip 97123

email if interested

Amazing.....
Chuck you do more damage to any reputation you may have than the whole ng could do combined.
I really think you need to start taking those pills again....and be happy.

Can some one help me find answers to following queries.

How to select type of radio communication equipment ?. For what application SSB(HF) / VHF / UHF transceiver is used ?

How to select a antenna ?

Regards,

Shiv Prakash Khemka

Dear Friend Shiv,

You are asking many VERY BIG questions all at the same time..

Try to get to a public library and look on the shelves for small Amateur Radio Operating books. There may be Amateur Radio Antenna books. Also radio propagation books. Also books for radio learners. You may also find such books in the bigger book shops.

There are English language handbooks with all the answers, obtainable from -

American Radio Relay League, ARRL HQs in Newington, Connecticut, USA,

Also from Radio Society of Great Britain, RSGB Hqs in Potters Bar, London.

The HTX-404 is currently closing out at RS for $80 and the 212 closed out at $160. What makes these so special that you charge more than new price???? $300 would be a good package deal. Just some good advice.

Kenwood TS-180.
This is the all solid state 10 - 160 ham band only tranciever with
provisions (but not included) for any 2 of the WARC bands.
Runs 100 watts and has been a great radio for me the last 4 years.
Has the 250~ cw filter installed. With both Operator and Service Manuals

Also included is the: PS-180 matching power supply
SP-180 matching speaker
AT-180 matching tuner
MC-50 mic.

All in good condx. Will ship anywhere in lower 48 .....
$500

> Shiv Prakash Khemka

SSB(HF) has the ability to convey speech over long distances, far over the horizon, sometimes to the other side of the Earth. This uses frequencies at which the inside of our ionosphere acts like a reflector. The effectiveness of these reflections varies with time of day, time of year, and with an 11 year cycle of sunspot activity (solar radiation and particles are what makes the upper atmosphere ionised and hence reflective) Links are not particularly reliable on any particular frequency, so the usual ploy is to have a variety of frequencies available, and to try them until one that works over the wanted path is found. Computer programmes exist to model and predict route/frequency availability. Even for short range use, suitable frequencies have to be chosen, you can get the effect of a transmitter being receivable in one place thousands of miles away, with no discernible signal 30 miles away!

VHF transcievers are available with SSB modulation, but the majority are FM. VHF signals are at frequencies where ionospheric long-range coverage is rare. There are some other propagation modes that can give surprisingly long ranges, sometimes for several days per year. These things are unpredictable in the extreme. If you are wanting fun, pursuing and exploiting them can be great fun. If you are interested in communications just as a reliable tool for some other interest or task, then VHF radio is really best thought of as having little more than line-of-sight range.

UHF is pretty similar to VHF in these respects, with even lower likelihood of ionospheric reflection. There are other longer range propagation modes that occur occasionally. Think of reliable communication to the horizon (with dead spots caused by terrain in hilly areas), along with great flurries of activity when interesting weather effects or meteor showers open up a long distance path.

Both VHF and UHF (and microwaves), by penetrating not reflecting at the ionosphere, are used to link with satellites, and can also be bounced off of the face of the moon, in this way very great ranges can be

achieved whenever artificial satellites or the moon is in a suitable place. This is predictable!

Antennae? selection depends on what frequency, what purpose, whether fixed/mobile/portable, how much space you have, what climate they have to survive (chiefly wind velocities), how much money is available, and often construction/planning permissions from whatever government bodies are involved. Clearly there are so many variables, that you either have to be very specific about your interests, or you need a small library of books.

I hope this helps

David GM4ZNX

782. HELP: Need FM-747 FM unit for FT-840

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

Hi.

I have a Drake MN-75 tuner for sale. It is in very good condition with just few minor scratches. The previous owner engraved some letters on the back of it. The front is very clean without any scratch.

I am selling this because I got a new Drake MN-2000 to match to my C-line. Its electrical condition is perfect. It handles upto 300W.

The price is $100 plus shipping. The only shipping method I use is regular mail with insurance which will cost you only $10 or less. I will pack it firmly to prevent any possible damage in transit. I don't have a manual or box, though.

If interested, please e-mail me.
Thanks and 73.

Hello all,

I currently have a Yaesu FT-980, which is a 110/220vac only HF rig, very nice radio. I've loved it for quite some time, but a recent move is making me move my HF station and antennas, to my vehicle, due to antenna restrictions..

I'd like to get a good mobile rig for my truck. I've looked at the Kenwood TS-450S/AT and the ICOM IC-706, and found these both to be ideal. If you have one of these rigs your looking to part with, let me know. I am not looking to purchase immediatly, but will in the near future.

The FT-980 is still somewhat attached to me, so I would prefer to outright buy a new rig for the truck, but if you're looking for a good base-only HF rig that's almost as nice as the FT-1000, let me know also :)

Thanks!
Nate

I'm moving soon, and I don't want to move my collection of a few years' worth of QSTs. I also don't want to throw them out if someone out there wants them. So they're yours, free.

The catch? You've got to come pick them up at my apartment in Brooklyn.

Let me know via email if you want them and to arrange a pick-up time.

800. FS: 12 Volt Gel Cell Batteries

Newsgroup: rec.radio.amateur.swap
Date: 1998-07-10 00:00:00 UTC
From: tje@usol.com
Message-ID: <35a65b05.3512906@news.usol.com>
Source record: 9676
Cross-posted to: rec.radio.amateur,rec.radio.amateur.boatanchors,rec.radio.amateur.digital,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.cb,rec.radio.swap

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

My department is considering purchasing a Rapid bank charger for the
Motorola MTX8000 radio. I have been asked to look into it. I request bids
for the above charger, I prefer to get new, but I will look at all bids,
but the charger must work perfectly, and be in New condition. I request
you send bids to me at my e-mail account, If I need then on letter head,
I'll e-mail you back.

Also, Out Police Auxiliary may be getting several more MTX8000 B5 models,
and have normally gotten them from the local moto shop, if you have some,
send a bid to me here at this e-mail, and I'll pass it along,

Thanks in advance

Dave

I'm looking for an inexpensive Argonaut (505, 509 or 515). The condition is not important.

If you are interested in a trade, I've got several items you might want to consider, a Drake T-4XC, AC-4, spare finals, manuals, Electrovoice 644 mic, Drake SC-2 converter, manual, Heathkit HR-1680 receiver with speaker and manual, and a bunch of other stuff.

Send me a note if you have one sitting on the shelf you'd like to get rid of.

73,

Rob, KL7NA/W7

815. Trade: Tennetrac IV By Tenelec / Looking for HTX-202 Or HTX-404

Newsgroup: rec.radio.amateur.swap
Date: 1998-07-13 00:00:00 UTC

Source record: 9691
Cross-posted to: rec.radio.swap,rec.radio.scanner,rec.ham-radio.swap,rec.radio.amateur.swap

I have a crystal Scanner, 16 channel capacity by Tenelec. It is called
a Tennetrac IV. Has conrrols for volume, squelch,scanrate, tone, scan
/ delay and local / distant rockers. Serial #1335678. Condition is
bout 8 out of 10. I know it works as I had one crystal for my local
department and it picked them up fine. It has the original antennas
(seperate vhf & uhf). I aquired this unit and although it is nice
I am limiting my crystal units to Bearcat III's and right now, i have
a couple two many of those. I believe there are followers of this type
unit out there as it is frankly a pretty nice radio.
I would like to make an even trade for a realistic HTX-202 or HTX-404
with all original accessories (charger / ni-cad pak / AA pak / Duckie
antenna. Manual and box/packing items would be nice but not required.
Radio should be in an 8 out of 10 condition in cosmetics and
operation.

Or what have you?????????write and lets talk.

Have a nice day.
Ray Miller N2NJK

Hello out there,

I had an earlier post looking for somebody who has or does silk screening for a Hammarlund HQ-180A. Well, looks like the silk screen is a fat chance. So since that is the case, does anybody out there have a junker HQ-180A with a decent front panel. If the price is right I will be glad to take it off your hands (grin). Just got finished painting the cabinet (it was a very ugly gold color). Now I am looking to do the rest of the radio (the face is gold too, YUCK)!!!! Please email me at bierbier@bellsouth.net.

Thanks and 73's

Gary

818. WTB: Swan 250 or 250C 6 Meter Rig

Well since I can't find a reasonably priced IC-551D I figured I would try for a Swan 250 again... :)

Looking for a good working Swan 250 or 250C with matching power supply and mic. Cosmetic condition not all that important but prefer the rig to be in good working condition with full power output. Wanting to get back into 6 meters on a budget but with more than 8 or 10 watts.
Please email what you have and your asking price.
Thanks !

It has come to my attention that Stu Greene, WA2MOE has posted e-mail and otherwise made reference to me as "Hitler". I find his implication to be disgusting and absolutely disclaim any such racist views.

I had heard of this a few years ago from another Arizona amateur and I confronted Mr. Greene about it. At that time I insisted that he stop these unfounded references and left it at that. It was my understanding that he had stopped this practice.

I hope that no one takes his comments to be true and if anyone has been offended by what he implies to be my views, I apologize and would like the opportunity to further explain my status if felt necessary.

I have been an active amateur for 42 years and have enjoyed conversing with hams in virtually every country of the world. I have met hams of all ethnic and racial backgrounds and have never even considered race or religion to be a factor in any of my dealings, either amateur radio or professional.

As an attorney who specializes in criminal defense, I represent clients of all ethnic backgrounds. In doing so, my character MUST not be questioned. My clients deserve to be represented by an attorney that will be totally unbiased. To have my character cast otherwise is, at best, reprehensible.

I have sent an e-mail to Mr. Greene requesting an apology and that he explain himself to the person to whom he made the remark. I have heard nothing back and can only believe that he chooses not to correct his position.

I have known Mr. Greene for approximately 7 years and during this time I have spent hundreds of hours assisting him with computer problems as well as legal and other matters. To have him attack me in this manner is simply devastating. I can only speculate as to what would prompt him to attack me this way and trust that whatever pleasure he derives from this scurrilous lie is worth it.

:
If it hasn't been modified to bad (the jacks are original), the Mic plug is a standard stereo 1/4" plug. Tip is prob mic audio hot, the ring is ground to transmit (ptt) and the sleeve is ground. Try to use a high impedance mic cartidge like an un-powered D-104 or any similar crystal cartridge.

I used to service 1011's all the time, they are a fine batch of radios if kept up properly.

If you have specific questions about them, email me direct at the address below my name.

Have for my neighbor:

For trade: Icom IC229H 2m mobile unit, mostly base use.
45watt, 22ch, wideband mods done, looks and works
great.

Looking for: Would like to trade for an ht, Relm whs150 (must include
accys), or FT10, or GP68 (he has taken a liking to my gp68.... nice radio,
btw.) Anyway, need keypad programming radio, commercial or ham similar in
type and vintage or whatever as listed above!
Please email!
thanks,
Randy

Just more lies from pig vomit. This guy is a convicted felon. The Judge
said that he needed mental attention in the criminal case against him.
He also has some civil cases against him for libel and slander. The amp
is fine and working if you want to here it I'm on 3.901 most every
eveing. I have never ripped anyone off! I have never played music on ham
radio much less through the Clipperton L. If you go and look and the
posts this lier puts out in other news groups you would see why he has
the problems that he does. pig vomit is a lier and a loser.

More lies from covert62? Well here is the story on the amp that Darrel Beards stole from me. I was kind enough to give him some work when he was wining about needing more busisness. He was supposed to put new parrasidic choke to the single 3-500G and he was supposed to replace the oil filled cap in the power supply. Well Mr Beards did the work and when I went to get my amp back he wouldn't give it back. He is useing it on the CB band. Birds of a fether flock together. So their is your Darrell Beards story. The police will get him now. Its illeagal for CBers to run amps and the local police can get them now! So that amp was stolen from me by Darrel Breards AKA Ace electronics. I have never ripped anyone off in any of my trades on the internet. So this is just more lies produced by the slime ball convicted felon drug using Jimmy Obrian OOPS pig vomit The amp I have up for trade is in clean fine working order. The tubes in the amp did come from RF parts so that will let you know how much the slimy lieing pig vomit knows. He is a loser so he can't stand to see anyone else have anything. So remeber James Obrian is a convicted felon so where is the truth there. He has also sold 3 or 4 burned up antenna tunners and a weak 2950 it needed to have the finals replaced. Then when the people asked him about getting their money back he accused them of burning the equipment up. byer beware James Obrian is a drug using theif ! He lies about everything!

I have an NCR 12 volt 70 amp power supply I wish to trade straight up
for a working older 386 or 486 laptop computer preferably with at
least a 14,400 modem in it. Supply is a monster but works wonderfully.
Has adjustable over voltage. over current protection. I believe also
the voltage can be adjusted up to 24 VDC but would have to check on
that to be sure. Let me know what you have.

I have a Motorola model N1275A UHF amplifier for sale. It was designed for HT use, and puts out 40W+ with 2W in. It has been centered in the UHF ham band, but is broadbanded enough to easily cover the commercial band as well. It is in perfect condition, and comes with a power cord that currently has a cigarette lighter plug on the end.
I will ship ConUS for $80.
If interested reply via direct email.

For Sale:

80' self-supporting galvanized steel tower in NW Illinois.

This a very heavy-duty, 24" face, straight leg tower consisting of
4 - 20' sections. Total weight of sections about 2300 lbs. Uses
solid round bar legs ranging from 1" diameter in the top section to
1 7/8" diameter in the bottom and 5/8" solid round bar braces.

Tower is disassembled and ready for pickup. Price includes loading
sections on your trailer (sections will transport very nicely on
a 16' tandem axle car-hauler type trailer).

$ 1000.00

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes with original antenna, box, AC wall adapter, and a BP-83 battery. The radio also has the CTCSS encode/decode board inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US or best offer for the package, buyer pays shipping and prepays with an International Money Order if outside of Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you have any questions (remove the stuff in quotes, thanks :)).

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of
Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

For Sale:

80' self-supporting galvanized steel tower in NW Illinois.

This a very heavy-duty, 24" face, straight leg tower consisting of
4 - 20' sections. Total weight of sections about 2300 lbs. Uses
solid round bar legs ranging from 1" diameter in the top section to
1 7/8" diameter in the bottom and 5/8" solid round bar braces.

Tower is disassembled and ready for pickup. Price includes loading
sections on your trailer (sections will transport very nicely on
a 16' tandem axle car-hauler type trailer).

$ 1000.00

I have a fifty or seventy five amp transformer that I would be willing to get rid of. It's new except for being used to burn a few traces off a circuit board. If it's not too heavy for you, I'll look and see if I can find it.

Hi, I have a kenwood UHF mobile radio as listed (tk805d) for sale.
Radio has 16ch. & seems to go from infinity and beyond, but guessing
410-490ish.... FIELD PROGRAMMABLE thru ptt and front buttons/channel
selector!!!
Will program to suit and include copy of software for same!!
Sorry, no programming cable, but hey, It does have the factory hangup clip!
:) This radio is in LIKE NEW condition, as it's only about a year or two
old. Includes radio, s/w, new style mic/hangup clip and mounting bracket.
no cut cords, either! no docs. Asking $250 shipping included CONUS. email
please and no trades!
thanks,
Randy, KC8CPK

852. FS: 12 Volt Gel Cell Batteries

Have about 40 used 6 and 7AH 12 VDC gel cells for sale.
All load tested good. PERFECT for QRP rigs
and portable operation. I have sold hundreds of these to the QRP boy's
on the QRP mailing list and all have been very satisfied. Had a few
damaged in shipping and one came back DOA which I replaced for the
fellow free of charge but that's it. I am the service manager for an
alarm company and we change our customers batteries every 3-4 years as
preventive maintenance. These used cells should provide another 2 to 3
and probably longer service if used and recharged properly. Cells come
fully charged and are ready to go. They can be recharged with a simple
wall wart charger available at Radio Shack or a 1 amp automotive
charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

Images of the cells can be seen at:

Source record: 9633
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.swap

I would like to sell two solid state HF amp boards, labeled: Technicare 600 watt amp. They have been tested by the fellow I acquired them from at 450 watts (each board) key down for a few moments (they need much larger heat sinls and a couple of resistors upgraded before they may sustain that sort of power).
I have gathered information as to sources of splitter-combiners and output filters which will work if one chose to combine two of these for a full power+ HF amp. I also have a full set of replacement finals (Acrian S200-50).
Asking $325. shipped conus for the pair of boards and the four replacement finals. -- 73, DavidC AA1FA E-mail or call 603-894-1174

IF YOU WANT A REPLY--MAKE IT EASY TO REPLY TO YOU--all the "remove 'no-spam'" crap in the e-mail addressess makes a reply more difficult. I had several come back recently. One I sent about Icom batteries to someone who wanted a source--Oh well. NO NEED TO CLUTTER THE NEWS GROUP WITH REPLIES TO INDIVIDUAL QUESTIONS--so I try to reply direct to the senders address. I am not wasting my time anymore with the "no-spammers" If you want info--make it easy to get it to you!!!

Just my 1/2 cent worth of my 2 cents worth of my worthless opinion!

Actually Rudy, I learn a lot from replies to other people's questions
and I'm sure others do also. Public replies to individual questions
is a good way to spread knowledge over netnews.

Reply to Sender and Group is frequently valuable in that the reply to the sender is often of interest to the group. That's what makes this a good NewsGroup

It is your choice if you want all the SPAM that comes your way when you use these newsgroups. I do not have the time to weed out all the junk, although my system is getting better at doing it for me.

Personal replies are nice, but I think we all learn more from group posts anyway.

875. FS: HF/VHF/UHF/BOATANCHORS for sale -- updated 7/25/98

Newsgroup: rec.radio.amateur.swap
Date: 1998-07-25 00:00:00 UTC
From: Joe K7JOE <K7JOE@Yahoo.com>
Message-ID: <35BAA3BC.D9116370@Yahoo.com>
Source record: 9569
Cross-posted to:
rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

Hi folks,
Family time is more important than ham radio time. I'm cleaning
the shack and down sizing some equipment that I wont be using.
Please email with questions. Terms are check or
money order. Prices dont include shipping. I can ship by what
ever means you like. Net references available.

1. Kenwood TH75A SOLD

2. Kenwood TR2600 SOLD

3. Kenwood TR-7850 2M mobile rig. SOLD

4. Heathkit Coax Switch (unbuilt, new in box) SOLD

5. Icom HF solid-state transceiver station including:
Icom 701, PS701 and SM-8 desk microphone. This is a 100W
DIGITAL all solid state HF rig covering 160 thru 10 meters
(excludes WARC bands). Radio covers USB/LSB/CW/CW-N/RTTY and
red LED digital frequency readout.
Has speech compressor, cw-narrow filter,
vox capability. Microphone is a condenser "gooseneck" type
with PTT button on the base. Power supply matches the radio
cosmetically. It is a 13.8V at 20 amps. Power supply also
has big speaker in it, to be used as external station speaker.
Entire setup is very clean--a few minor scratches, but front
panel is perfect. I have the original manual too. This would
make a great setup from Tech plus thru Extra. The rig works
great on SSB with the speech compression, as well as on CW with
the narrow CW filter. The bands are coming back NOW.
Dont miss the action, especially on 10M and 15M!
Entire station (wont split) $425 + 1/2 shipping.

6. Regency CB converted to 10M SSB. Radio runs 15W output PEP
and covers AM and USB. Freq coverage is 28.5-28.8 Mhz, the
phone portion of 10M. Great for mobile/backpacking. Good
condition. Includes manual, sams photofact, mic, power cord,
and radio. $65 + shipping

7. ECI Fleet Courier 30B 10M/6M AM transceiver.
Cosmetically a beauty.
Electrically a beauty. This is a classic early 1960's tube
"mobile/base" AM HF transceiver. Six crystal-controlled
channels.

Chromed cabinet. Blue front panel with white lettering.
Good cabinet and front panel. Output is 15 watts AM.
Includes microphone, AC power cord, and DC-DC convertor.
This is a classic
in very nice condition. Thought it was sold before, but buye
never sent payment. Includes 1 set of
crystals (26.1, I think) Asking $45 + shipping.

8. Kenwood AT-120 mobile antenna tuner. Matches the Kenwood
TS-50 in size. Originally for use with Kenwood TS-120 HF
transceiver.
Covers 80 thru 10 meters. Includes lighted VSWR meter, as well
as tuner bypass position. Single coax in and coax out
connections.
Very clean -- works well. Also very close in size to Icom 706
and Alinco DX70 mini HF transceivers. $100 + shipping

9. Heathkit SB102 SOLD

10. Vibroplex #6 "lightning bug" key -- late 1930's vintage with
Japanned base (no gold trim). Keyer is fully functional but
is missing both the original dit arm weight and the vibroplex name
plate. Homebrew dit arm is included. This is a nice bug --
took it in on trade, but decided that I like the auto-keyer
since I get "glass arm" sending with a bug. This one is
probably not collector quality, but works great with my S-line and
gold dust twins. $80 + shipping

11. Collins Winged PM-2 mobile power supply -- CCA good condition.
Works with KWM2/KWM2A. Tested and works fine. Paint a little
rough, but not terrible. S/N 11XXX. $130 + shipping

11b. Collins Winged KWM-2A S/N 325. CCA good condition or better.
This is one of the earlier KWM2A's. All original except cabinet
paint, and the mic jack was changed from PJ068 plug to a standard
1/4 inch phono plug. Works fine -- clean chassis. Case has
been repained -- a close match to the original St. James Grey
color. Trim ring is primed -- but not yet painted white.
$420 + shipping

Will sell both the KWM2A and the PM2 mobile supply for $500
plus shipping if someone is interested in both. Price is firm.

12. Alinco DR-110T 2 meter SOLD

13. Desk amplified Microphones SOLD

14. ICOM UHF handheld transceiver covering 430-440 Mhz (note the
band, this is for use in Asia, Central, South America, and Europe.
Does "minus 5 megahertz" repeater split and automatically transmits
the 88.5Hz tone burst to open repeaters (as in Japan). Good
cosmetics, good electrical. 3 batteries, radio, antenna, and
wall charger. $99 + shipping

15. JC Penney 981-6247 SSB/AM CB radio -- AC/DC, 40 channel, and ready to convert to 10 meters. Will include converstion instructions (only requires a change in the oscillator crystal). Will also include SAMS photofact. Rig works fine. Just no time to convert it. Would be great for new novice or tech plus to try voice on 10M for an inexpensive price. Works AC and DC (has built in power supply for 120VAC). Includes hand mic, and AC power cord. Wood grain cabinet. Smaller size, does not take up much room. Has vol, sql, clarifier, tone, dim, vswr calibrate, mode switch, pa switch, nb, anl, etc. Again, excellent for 10M SSB conversion -- currently on CB band. $ 80 + shipping.

16. Regency INFORMANT 1 police radio mobile scanner. Preprogrammed scanner covering VHF LO and HI bands -- designed for monitoring state / county police. Simply dial up your state, and the preprogrammed scanner does the rest....Designed for 13.8VDC and includes both radio and cig lighter power cord. $25 + shipping

17. Home brew boat anchor power supply -- designed for use with all HEATHKITS. Much heavier duty than the HP23 supply. Could also be used with the COLLINS S-line and KWM2 transmitter/transceiver with simple re-wire of the octal power plug. No schematic, heavy (about 40 LBS), works fine. $45 + shipping

I'm located in Portland, Oregon.
No LIDS, No KIDS, No SPACE CADETS. NO BAD NEWS either.
Happy to discuss details via email or can call you. Net references available on items that I've already sold.

Mailto:K7JOE@yahoo.com
thanks,
Joe

There are ways to munge your address and still make it easy to reply. I'm using
one way.
And it REALLY DOES cut WAY down on spam. I was getting 10 spams a day. Since I

changed my address and started spamproofing, I'm getting 1-2 a week after six
months.

If you don't have a mouse to click or are using an obsolete newsreader, or don't
bother
to read the sigfile or the reply address, or are just plain stubborn, that's
not MY fault.

miker, the spam-free moron

Oh, please! As you can imagine, with the volume of posting
I do, I get plenty of spam. But it only takes 15 to 30 seconds
a day of pushing the delete key to get rid of it (you don't actually
read that crap do you?). If you don't have that much time, what
are you doing posting to net news?

What *really* peeves me is people who munge their reply
addresses when they send me *email*. (I get 30-40 a day.)
There's no possible way that a valid address sent in private
email can generate spam. I will *not* try to unmunge your
address. If a reply bounces, it bounces, and you won't
get the benefit of an answer to your query.

In the newsgroups, I generally reply to a post with a
follow-up post. So I don't care if the poster's email
address is munged. But if you send me private email
and expect a reply, you'd better have a valid reply
address in the header.

And while on the subject of pet peeves, will you people
please quit posting messages containing HTML junk
in them. They are virtually unreadable, and I will not
take the time to try to ferret out the text amongst all
that crap. Remember, newsgroup postings should
contain *only* plain monospaced ASCII text. Reserve
that HTML crap for your webpage.

There are occasions where a person jumps in a newsgroup for the very first time, and asks a question. And they ask us to please email the reply, because they aren't going to be around...

I find that practice acceptable for honest questions. Not everyone has the time to subscribe to all newsgroups of interest.

But when that same person uses an alias or a "no-spam" alteration of their email address, I tend to move one ot the next post.

I have been online for over twenty years. I have never used an alias. I have never logged on with another acocunt. I have never initiated an anti-spam filter on my end. And life's OK...

Me too. I used to try to respond both to the news group and directly but so many of the direct replys get bounced I normally don't do it any longer. I set filters on the subject so that e-mail with "XXX", "money" and such go directly to the trash can - I never see them. Gets rid of a lot of the spam since most of what I get is either X rated or how to make a million bucks in a week.

It would be a very boring newsgroup that had only posts from people
sucking up information by asking questions only and demanding email
replies.

I don't read newsgroups to read people's questions, I read newsgroups
to see what other people have to say. Since I'm already here, then I
might as well add to the newsgroup by answering questions when I can.

My replies hopefully to appeal to some. Perhaps they wanted to ask
a similar question, but were hesitant for any number of reasons. Or
perhaps they've never thought of asking such a question, but seeing
the answer in some way is helpful. By answering questions, I (and
others) help to keep those people reading the newsgroup, so at some
time in the future when there's a question they can answer, they will
be here to answer. Or maybe at some time in the future, someone else
will ask a question that's already been answered by myself or someone
else, and the people reading the messages today will be able to answer
the question tomorrow because the question and answer has been here
already.

And don't forget the whole point of FAQ's are to collect frequently
asked questions, and answer them, in an attempt to avoid the repetition
in the future. But by keeping things off in email, someone who's good
at cataloging won't have access to the answers, so they'll be unable
to get involved and create a FAQ for the newsgroup.

One of the things that annoys me is when I respond to someone's question
in the newsgroup, many times there will be a followup from the original
poster, but via email. Often, I never get around to answering them,
because I either have to look something up or because I just don't feel
like it. SOmehow, if you answer a question in the newsgroup, you become
an expert or maybe it's just that you are perceived as someone who will
be helpful. But when the poster does a followup in email, they lose
the potential of the collective mind of the newsgroup to respond.

AT LAST !!! Gary and I agree on SOMETHING !!!

If your time is SOOOO valuable that you can't delete a few junk
email messages, then mine is SOOOOO much MORE valuable,
that I don't have time to fix your NOSPAM.CLAM email address to
try and help you with something.

But as one last chance to get you normal, I'll offer you a solution
to your junk email problems:

1. Go to Deja News and sign up for an account.
2. Change your email address in your newsreader software to

whatever-you-signed-up-with@deja-news.com

3. Go back to Deja News once a week, and read any personal
mail you have. Delete the one or two junk email messages that
make it thru Deja New's junk mail filter.

Usually, anybody you want to get email from knows your email
address anyway....

And for you more parnoid types, I just read that the lastest
email address bots are running around looking thru HTML code
on web pages looking for email addresses too, so if your ham
club club has your email address listed on the club web page,
you are in big trouble....

> are you doing posting to net news?

Gary,
Your postings are always informative and thorough, so I
appreciate your activity in this newsgroup. I would, however,
like to lobby for a different response to spam - both from
you, and from the rest of the newsgroup's readers.
While it may only take a few moments to delete the spam
you receive, the current level of spam activity on the 'net
is only the tip of the impending iceberg. These people are
technically capable of sending tens or even hundreds of
thousands of messages with a click of a button. If spammers
are tolerated instead of eliminated, we can look forward to
seeing a 1000:1 ratio of spam to desirable email. I, for one,
use my email for business and for pleasure, and its utility
would be entirely trashed by such a future.
You might feel that (a) you are an insignificant person
on the net, (b) you do not have the time to deal with spam,
or (c) you don't have the expertise to do anything but hit
the delete. These are the responses the spammers love. If
they send out 10,000 emails that are tolerated, and receive
only one positive response, they've made money! They clicked
a button, and you paid to download their refuse. And no,
there is no long-term safety in filters, or in impending
legislation. These panaceas will work only if spammers find
it unprofitable to circumvent them.
So - what should you do? Take the time to send out some
complaints. Never respond to the spammer's email - it only
verifies your address. Complain to the spammer's ISP, and
if they fail to act, complain to the ISP's ISP. Send out as
many complaints as time allows, even if it's just one every
week or two. Don't just complacently delete spam.

I recommend that everyone spend a little time reading a few anti-spam sites on the net. This is not just another conspiracy paranoia subject. It deserves your time and just a bit of your effort. Please see:

http://spam.abuse.net

Broaden your search from there. This site and others will explain how to effectively complain about spam.

Now, as to the subject of the original posting, whether you use anti-spam measures in your email address is your own choice. I hope people are tolerant of those who choose to do so. They are justifiably angry about spam.

Please forgive the tirade, and the off-topic post.

73 - Bob, KI8AB

Seem to be a few issues going on in this thread:

1. Newsgroup postings requesting a personal/email reply.
Although we all recognize the benefit of public postings adding to the base of knowledge, there are legitimate reasons for requesting an email repply. As someone pointed out, people may not tune in regularly to that newsgroup. I believe that the method I use may satisfy everyone. My newsreader can reply to the group, the email, or BOTH. If a person requests an email response and I feel it is of general interest, I reply to BOTH. Really simple. If on the other hand, the question isn't worth replying to, then just don't reply. But no need to taake offense.

2. Anti-Spam munging.
The world is not homogeneous. Some people are more offended by spam than others. People who use a work account (like me) may be particularly sensitive to getting flooded by X-rated messages. What is my secretary or coworker going to think when she checks my email account for me when I'm out of town? And geeze guys, how long does it really take to erase a few characters in an address (as long as the need to do so is prominently pointed out)!

3. Munged (private) emails.
People who munge their reply addresses when they send *email* just need to be reminded that it doesn't help. Also, perhaps it was a mistake. I recently sent a couple emails to people in this group about an antenna question. Unfortunately, I had inadvertantly left my email address munged after doing a few news postings, and forgot to "unmunge" it. Bob graciously replied and reminded me of my error. Gary on the other hand apparently took offense and didn't bother to reply (last names deleted to protect the innocent). Such is life.

BTW.....

DO NOT AUTOREPLY
REMOVE "ZZZ" FROM EMAIL ADDRESS.

Ten-Tec Argonaut 505 QRP SSB/CW transceiver. Nice QSK, 5 watts input, about 6 lbs. Draws less than 100 mA on receive. There were only about 2000 of these produced. This one is very good looking, a 9.5 out of 10 cosmetically, and operationally perfect. It has the newer spinner VFO knob with the 1 KHz markings and the dial operates as smooth as silk. Comes with a copy of the manual. Great for camping, or just QRP operating.

Reason for selling: I have an Argonaut 505 already. I thought I was getting an Argonaut 509 when I bought this one. I wanted an Argonaut 509 for nastalgic reasons because I used to have one in my younger days. If you would like to look at some data, including a scanned QST advertisement, see: http://asd.state.va.us/tentec/tttrans.htm

$288 plus shipping or trade for a more common Argonaut 509.

I remember paying $288 for one of these in 1972. I got it out to the car,
hooked it to a pair of AA lantern batteries (while in the car) and got
it going out in the radio shop's parking lot. Took it to Barbados and
made QSOs as 8P6FS. Etc. etc. etc. etc. much fun radio!

Hi All,

I realize this is a long shot, but here goes....

I'm looking for the Ten-Tec Argonaut 509, serial number 509-4580. It had green LEDs replacing the dial lights and a couple of diodes back to back tacked on the SSB generator board to provide some RF clipping. Back in my freshman year in college, my dad gave me that rig. I had a lot of fun with it, but then in my lean grad school years I traded it at TNT Radio in Minnesota for a shiney new Icom IC-735. If you have any info on this perticular radio, please send me a note!

73,

Rob, KL7NA/W7

For Sale: One (1) Kenwood TS-440S/AT.

The radio has had the TX anywhere modification done to it, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

901. FS:ICOM 3SAT!

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes with original antenna, box, AC wall adapter, and a BP-83 battery. The radio also has the CTCSS encode/decode board inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $200US or best offer for the package, buyer pays shipping and prepays with an International Money Order if outside of Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you have any questions (remove the stuff in quotes, thanks :)).

902. FS: Icom R71A shortwave receiver

Newsgroup: rec.radio.amateur.swap

Source record: 9584
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.swap,rec.radio.swap,rec.radio.scanner

For sale:

Icom R71A general coverage 'shortwave' receiver. Includes longwave,
mediumwave (AM broadcast) and shortwave (amateur, international broadcast, etc)
coverage. Excellent condition except some scratches on top of case. Just gone
through (tuned) by Icom dealer, everything works great.

Asking $500 firm. Payment by postal money order only, I pay your
choice of UPS or USPS shipping. Sorry, contiguous US sales only. Please Email
if interested. Thanks...

Tom, N0YGT

903. For Sale: PRO-46 Scanner (800mhz Unblocked)

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

Dave,

Fun is sure the word. In 1974 I was living in an apartment in the
Philadelphia area had a 505 and a run of #28 wire about 150 feet from my
bedroom window to the top of a tree. No RF interfearence with this setup
and it was very stealthy as you could not really notice the antenna.

I was listening to the 75 meter big guns from New England and Long Island
on the lower end of the phone band working into Europe one evening and
broke in and asked if they could relay me through to one of the Great
Britian stations I was hearing but whom I never thought would hear me...
more of an SWL report than anything. This station from Long Island asked
everyone to standby and let the QRP station try to cross the pond with 5
watts SSB. I received a 5/5 report from several G stations and it was one
of my biggest thrills in ham radio.

911. FS: HF/VHF/UHF/BOATANCHORS -- shack cleaning sale update 7/31/98

Newsgroup: rec.radio.amateur.swap
Date: 1998-07-31 00:00:00 UTC
From: Joe K7JOE <K7JOE@Yahoo.com>
Message-ID: <35C21E0B.6307E525@Yahoo.com>
Source record: 9593
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,alt.ham-radio.marketplace,rec.radio.amateur.swap

Hi folks,
Family time is more important than ham radio time. I'm cleaning
the shack and down sizing some equipment that I wont be using.
Please email with questions. Terms are check or
money order. Prices dont include shipping. I can ship by what
ever means you like. Net references available.

5. Icom HF solid-state transceiver station including:
Icom 701, PS701 and SM-8 desk microphone. This is a 100W
DIGITAL all solid state HF rig covering 160 thru 10 meters
(excludes WARC bands). Radio covers USB/LSB/CW/CW-N/RTTY and
red LED digital frequency readout.
Has speech compressor, cw-narrow filter,
vox capability. Microphone is a condenser "gooseneck" type
with PTT button on the base. Power supply matches the radio
cosmetically. It is a 13.8V at 20 amps. Power supply also
has big speaker in it, to be used as external station speaker.
Entire setup is very clean--a few minor scratches, but front
panel is perfect. I have the original manual too. This would
make a great setup from Tech plus thru Extra. The rig works
great on SSB with the speech compression, as well as on CW with
the narrow CW filter. The bands are coming back NOW.
Dont miss the action, especially on 10M and 15M!
Entire station (wont split) $425 + 1/2 shipping. (sale pending)

6. Regency CB converted to 10M SSB. Radio runs 15W output PEP
and covers AM and USB. Freq coverage is 28.5-28.8 Mhz in
23 channel increments. Has VFO slider for both TX and RX,
to cover all the in-between and gap frequencies.
Can be easily moved up
or down the band with just a couple $5 crystals (available
from JAN Crystal). Nice SSB tx audio from hand microphone.
Great for mobile/backpacking. Nice cosmetic condition too.
Includes manual, sams photofact, mic, power cord,
and radio. $65 + shipping

7. ECI Fleet Courier 30B 10M/6M AM transceiver.
Cosmetically a beauty.
Electrically a beauty. This is a classic early 1960's tube
"mobile/base" AM HF transceiver. Six crystal-controlled
channels.
Chromed cabinet. Blue front panel with white lettering.
Good cabinet and front panel. Output is 15 watts AM.
Includes microphone, AC power cord, and DC-DC convertor.

This is a classic in very nice condition. Includes 1 set of
crystals (26.1, I think) Asking $45 + shipping.

8. Kenwood AT-120 mobile antenna tuner. Matches the Kenwood
TS-50 in size. Originally for use with Kenwood TS-120 HF
transceiver. Covers 80 thru 10 meters. Includes lighted VSWR
meter, as well as tuner bypass position. Simple coax in and coax out
connections.
Very clean -- works well. Also very close in size to Icom 706
and Alinco DX70 mini HF transceivers making a nice
compact ham station. $80 + shipping (reduced price)

10. Vibroplex #6 "lightning bug" key -- late 1930's vintage with
Japanned base (no gold trim). Keyer is fully functional but
is missing both the original dit arm weight and the vibroplex name
plate. Homebrew dit arm is included. This is a nice bug --
took it in on trade, but decided that I like the auto-keyer
since I get "glass arm" sending with a bug. This one is
probably not collector quality, but works great with my S-line and
gold dust twins. $70 + shipping (reduced price)

11. Collins Winged PM-2 mobile power supply -- CCA good condition.
Works with KWM2/KWM2A. Tested and works fine. Paint a little
rough, but not terrible. S/N 11XXX. $130 + shipping
14. ICOM IC3N UHF handheld transceiver covering 430-440 Mhz (note the
band, this is for use in Asia, Central, South America, and Europe.
Does "minus 5 megahertz" repeater split and automatically transmits
the 88.5Hz tone burst to open repeaters (as in Japan). Good
cosmetics, good electrical. 3 batteries, radio, antenna, and
wall charger. $99 + shipping

15. JC Penney 981-6247 SSB/AM CB radio -- AC/DC, 40 channel, and
ready to convert to 10 meters. Will include converstion
instructions (only requires a change in the oscillator
crystal). Will also include SAMS photofact. Rig works fine.
Just no time to convert it. Would be great for new novice or
tech plus to try voice on 10M for an inexpensive price. Works
AC and DC (has built in power supply for 120VAC). Includes
hand mic, and AC power cord. Wood grain cabinet. Smaller size,
does not take up much room. Has vol, sql, clarifier, tone, dim,
vswr calibrate, mode switch, pa switch, nb, anl, etc. Again,
excellent for 10M SSB conversion --will include conversion
plans -- simple 2 crystal change and receiver tweak.
Currently still on CB band, but slider in place.
$ 70 + shipping. (price reduced)

16. Regency INFORMANT 1 police radio mobile scanner. Preprogrammed
scanner covering VHF LO and HI bands -- designed for monitoring
state / county police. Simply dial up your state, and the
preprogrammed scanner does the rest....Designed for 13.8VDC
and includes both radio and cig lighter power cord.
$20 + shipping (reduced)

17. Home brew boat anchor power supply -- designed for use with
all HEATHKITS. Much heavier duty than the HP23 supply.
Could also be used with the COLLINS S-line and KWM2
transmitter/transceiver with simple re-wire of the octal
power plug. No schematic, heavy (about 40 LBS), works fine.
$45 + shipping

18. Heathkit MicroMatic CW keyer -- one of the last kits made by
heathkit in 1981. This is the iambic CW paddle and keyer
combo with capacitive cw paddle (keys by hand capacitance,
not mechanical). Keys both boat anchor and modern rigs.
Lots of features: memories and adjustable speed/weighting. This
keyer/paddle combo also has auto-cw practice (great for
upgrading your cw speed and practicing). Includes wall power
supply. Model is SA-5010. Condition is very good. Works
well. $50 + shipping

19. Radio Shack 2M 30 watt amplifier with preamp. Model 19-1122.
0.5-5w input will give 30 watts out. Nice helical front end
and GaAs FET preamplifier cuts down on intermod. In box, brand
new, never opened, never used, tape seal still in place.
Everything included: box, manual, packing material, etc.
Paid $99 new from Radio Shack. 1/2 price - $50 + shipping.

20. Icom HT rapid charger, model BM-82U. Found this in the closet
and dont recall what radio this charged. Does not fit
Icom 2AT/3AT/4AT or 02AT series. Maybe works with
the xSAT series rigs or commercial equivalent ??
$40 + shipping

21. Yaesu touch tone, up/down hand microphone. Model YM-48.
This is a 600 ohm condenser microphone. Has 16-digit
touchtone pad, up/down buttons, and 8 pin mic connector.
In perfect condition -- unused. Think it was an accessory
for the Yaesu FT-726R or FT-736R - not sure though.
sale pending....

I'm located in Portland, Oregon.
No LIDS, No KIDS, No SPACE CADETS. NO BAD NEWS either.
Happy to discuss details via email or can call you. Net
references available on items that I've already sold.

Mailto:K7JOE@yahoo.com
thanks,
Joe

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

HI I just got an EICO 753 and need to know what the tube number is that
sits next to the 5.2xx xtal on the left side of the radio as you face it.
It is a nine pin tube. I am also looking for a manual for the 753 and 751
P.S. If anyone wants to dispose of one please let me know. Thanks Larry

Hello,
Who was the gentleman from Arizona who purchased the Kenwood TH75A handheld and batteries from me? I inadvertently forgot to pack the instruction manual and the second battery wall charger when I tested the radio prior to shipping it to you. They both turned up yesterday after cleaning the kitchen table (grin). PLEASE contact me so I can forward the items that are rightfully yours -- I need your address. My hard drive crashed and I lost the relevant information.

thanks,
Joe

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

I have recently purchased a used Kenwood TS 520 S. The rig appears to be in good condition and seems to work quite fine. However, when using CW the manula tells me to limit the plate current to 200mA; when I do this the resultiong output is only ~2 watts. I am wondering what is going on here because my power meter shows that I am putting out ~80 watts when I switch to SSB, so my finals are resonating properly. If I adjust my carrier level upward my CW power does go up to ~80 watts but the plate current well in excess of 350mA (meter max.).

I would also like to know if anyone has any information about building or purchasing an external digital readout unit for this rig. The analg dial is quite accurate compared to what I'm used to (Heathkit HW-101 w/ 5kHz intervals), but a digital readout would be nice. For anyone not familiar with the rig there are outputs at the back of the rig for a Kenwood EXT digital readout labelled VFO, HET, and CAR (I'm assuming VFO freq., Heterodyne Oscillator freq, and Carrier freq respectively). Myself and a friend of mine are quite capable of building a display if necessary and anyone can provide the necessary info.

Please reply via e-mail as I do not read the newsgroups very often.

Thanks in advance

Have about 50 used 6 and 7AH 12 VDC gel cells for sale. All load
tested good. PERFECT for QRP rigs
and portable operation. I have sold hundreds of these to the QRP boy's
on the QRP mailing list and all have been very satisfied. Had a few
damaged in shipping and one came back DOA which I replaced for the
fellow free of charge but that's it. I am the service manager for an
alarm company and we change our customers batteries every 3 years as
preventive maintenance. These used cells should provide another 2 to 3
and probably longer service if used and recharged properly. Cells come
fully charged and are ready to go. They can be recharged with a simple
wall wart charger available at Radio Shack or a 1 amp automotive
charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS (SOLD OUT)
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

Images of the cells can be seen at:

Alan,

Nice to know somebody remembers Cromemco. Microcomputers have advanced and matured fast in the last thirty years so that a "sci.antique.microcomputers" dealing in everything about "antique" microcomputers should be a good outgrowth out of interest in electronics.

>If you have an old Cromemco Z-1 or Z-2 or something close to it and
>you are interested in digging it out of the corner, let me know. I'd
>like to buy one or the other and we could work out an incentive for
>you to go dig it out out.

The Z-1, Z-2 looks and weighs in like a 'boatanchor'. You must be into collecting. Good luck. I saw once a complete set of the series in one of those fund raising used-stuff stores for something like twenty bucks. Discouraging prices reflecting the demand for the stuff but it disappeared overnight. I didn't need it, I still had my own still sitting in the computer room much like an old vacuum tube set. Takes up too much space anyway to get another one, even for collecting. One day, I'll fire mine up again just for the 'll of it to stare at the cursor. :). The thing was like the Collins in its heyday. It cost a lot more though. And the software choices were very limited. Cromemco disappeared as part of another company. The S-100 bus design microcomputers were overcome by IBM, shrinking demand, and plain economics.

Brad,

You might want to take a look at the DFD-2 from Almost All Digital
Electronics.

Hi All,

I'm cross posting this because I'm looking for a company, A few years ago, I saw an ad in QST Advertising Luke Power supplies. I beleive they were based out of Michigan. Anyhow, They mostly made commercial power supplies... But they made a few models aimed at the Ham Radio people. and I've asked around and no one seems to know what happened to the company, does anyone know if the company still exists?

and if so, do they have a website? and a number?

Please help me here!

Thanks,

Hi All,

I found out where Luke Electronics is or shall I say WAS... Seem they went
out of business... My next question is why? They had excellent products.
Anyone know the story on this company? They were based in Lake City,
Michigan, are the owners still around? if anyone knows the story as to what
happened, please e-mail me...

947. FS: Radios, antennas, test equipment

Newsgroup: rec.radio.amateur.swap
Date: 1998-08-10 00:00:00 UTC
From: Walt Novinger <wnovinger@shaw.wave.ca>
Message-ID: <u7Iz1.68094$xs3.20662529@news.rdc1.bc.wave.home.com>
Source record: 9534
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.shortwave,rec.radio.swap

We have a mixture of hollow- and solidstate radios and test equipment available to go to new homes. All prices are in US Dollars and do not include shipping. Please call (403.247.4396) or email for details.

ANTENNAS
KIWA Pocket Loop, $75

Palomar base with BCB Antenna, $100

RADIOS

AOR 7030 $800

Kenwood R5000 $695

Marconi CSR5A (general coverage receiver works extremely well, very sensitive, s-meter added to front panel) $150

Marconi Electra (striking receiver appearance-wise, works, very difficult to find, overall cosmetics very good. This receiver has been modified to accomodate a professionally constructed internal power supply which has been fitted inside the original manufacturer's cabinet, works.) $400

Pye Model 39HC (British-made wood cabinet receiver, works, dial excellent, overall very good condition) $250

Hallicrafters SX-23 (Typically very difficult to find especially in fine cosmetic and working condition. This Hallicrafters model was manufactured for a short period of time; I believe one year. Raymond Lowey is believed to have been involved in the design of this uniquely attractive receiver. The gray painted chassis is original and is in excellent condition as is the overall receiver. Easily a 9 on a scale of 1 to 10) $575

Hallicrafters SX 28A (Have seen at least a dozen nice examples of this model receiver. This receiver has the nicest knobs of any SX-28 we've ever seen. I'd call them a 9 on a scale of 1 to 10. The front panel has had a toggle switch added (alongside the BASS toggle)-- it's been extremely well done, tho I don't know what it is supposed to do. On a scale of 1 to 10, the legends, front panel, etc. are an easy 9. BTW, it's also marked SX-28A on the front panel. Internally the receiver has been modified -- one mod is a Collins filter addition, audio mods are apparent as well. Works but needs electrical restoration.) $200

Hallicrafters SkyBuddy S19R (One of the earlier Hallicrafters, still has original speaker grille flocking, very good cosmetic condition) $125

Hammarlund HQ 145A (Double conversion, similar appearance to HQ 180, no clock, chassis immaculate, front panel excellent, perforated-design cabinet ala HQ-180 has some minor scratches) $175

RCA AR88 LF (Black wrinkle boatanchor that carries an equally weighty reputation as one of the best superhets ever. National S-meter has been added, receiver works but has not had cosmetic or electrical restoration, also has a cabinet.) $200

RCA BP61X (Vacuum tube lunchbox-style portable, works, cosmetics 8.5 on scale of 1 to 10) $75

RCA A-3 (Wood cabinet receiver, recently tuned, good condition, works very well) $75

Breting 14 (Newly powder-coated cabinet, mirror excellent, escutcheon very nice, this 1930's vintage radio hasn't been restored electrically yet) $350

Patterson PR-16 (Cosmetics very good, recapped, suprisingly sensitive receiver with a unique look) $425

Stromberg Carlson Model 874 (Wood cabinet, battery operated set in good condition, untested) $50

Phillips (Small maroon bakelite tabletop shortwave receiver in very nice condition, excellent reception, great little receiver on SW bands) $65

TEST EQUIPMENT
Hickok Model 156 Traceometer w/probes. Very good condition, works. Manual copy. $150

Hickok 288-X in good condition, one escutcheon is broken off at top edge but luckily it doesn't make it look terrible from a cosmetic standpoint. Very nice condition overall. Manual copy. $65

Heathkit IM-58 Harmonic Distortion Meter in good condition, works, $45

Hewlett-Packard Model 5328A Universal Counter w/HP-IB IO Opt. 011 and Opt. H99 (TCXO) in good condition, works $550

RCA Chanalyst w/probes and manual copy. Works and is in very nice condition. $150

Starkit Sweep Marker Generator is in very nice condition, $15

Simpson Model 480 Genescope with original manual. $75

Singer Spectrum Analyzer, MF-5 w/VR4 Module. Very good condition, works and has manual from Tucker. $135

Heathkit IO-102 Scope (works, manual copy available and is in nice cosmetic condition) $45

Can an ADMS interface cable be used to program Yaesu FTH-7008 radios, assuming
that the user has the appropriate programming software, and a homemade adaptor to
convert from the 3.5mm stereo plug to a 2.5mm mono plug?
If so, what's the schematic for the homemade adaptor cable to be used with
the ADMS cable?

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

I have for sale the following-

Icom IC-V100 Commercial VHF 16 Ch. Radio with EX-494 Programmer.
Currently programmed in the 2 Meter ham band.
CTCSS Encode and Decode.
35 Watts (That is what is on the radio tag but actually puts out 45 Watts.)
A 6 on a scale of 1 to 10 (Would be an 8 but it has a small notch cutout for the programming cable)
I have a copy of the programming manual.
$150.00 Plus Shipping

Kantronics Data Engine
Has both 1k2 an 9k6 Modems
In good shape.
$125.00 Plus Shipping
(Note: No it does not do Pactor or any of the HF modes, It is high speed packet or Node use.)

Radio Shack DX-394 Communications Receiver
150 kHz to 29.999 MHz
AM,LSB,USB,CW
LCD Display
9 on a scale of 1 to 10
$150.00 Plus Shipping

I can send JPEG's of any of the items.
Email me @

I have the following for sale:
1 Kenwood TR-7950 2mtr mobile with mic, no bracket or manual,
$65.00. Works great, volume pot is noisy, very good condition
1 Kenwood TM-731A 2mtr/440 dual band mobile with mic, manual and
duplexer, no bracket. $120.00. Works great, very good condition, can do
crossband repeat
1 Alinco DJ-S41T micro 440 handheld, new, manual, box, warranty
card. $65.00. Would work well in a city environment, doesn't quite cut
the mustard out in the sticks where I am!

Please email billp@idsely.com if interested. Prices include shipping.

73,

Bill KD7AVW

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Asking $3400 U.S. plus shipping. Condition warrants price.

I have one VHF 138 - 174Mhz, 25 watt, two channel radio. Combination #KT-134-A. Comes with mic but no speaker. Current tx on 158.XXX and rx on 152.XXX. Has had a horn honk device added to it (two switches and an led) on the front upper left panel of radio with a small circuit board mounted in front panel..

$75.00. Shipping not included. US Postal Service money order as payment.

I'm selling the entire shack. This is a buy all or nothing deal, I will
not sell individual pieces, I have the following:

Kenwood TS-930SAT w/250HZ Cw Filter
Johnson Mic
5-Elem/2M Yagi w/Rotor
MFJ-986 3KW Roller Inductor Tuner
Carolina Windom 160M Antenna
Mosley TA-33 3-Element Beam/10/15/20
CDE Rotor/Controller
HyGain 10/15/20 Meter Quad
Peter W. Dahl HV Xformer (new)
Astron 20A Power Supply
Homebrew RF-Deck uses pair 4-125's
Heathkig IG-102 RF Signal Generator
110V Variac
Thoradson Plate Xformer 1.2KV @ 1A
Heathkit DX-60B
Heathkig HG-10 VFO
B&K DC-30Mhz Dual Trace Scope
MFJ 752C Sig Enhancer
Heathkit AM-2 Swr Meter
Kenwood TM-733A dual Band mobile
Heath IP-17 HV Regulated Supply
Hand-Key -"J-38"
Hand-Key - "J-44"
Rohn HDBX 48ft Tilt-over tower complete
Pair Collis Motorized Roller Inductors
2- HTX 202 2M HT's w/hand mic & charger.

This is over $4000 worth of shack. $2500 get's it all.. you must pick up
or arrange for shipping (the tower pretty much has to go by motor
freight). I'm in NW Vermont. send e-mail if interested.

Would like to trade metal detector for transcevier around $550 in value -
some tube units finals OK. Please don't try and offer a $300 piece of equipment
unless you've also got $250 cash your willing to part with.
Specifics for this unit: is about 2.5 maybe 3 years old. D/C number inside
battery door indicates manufactured around August of 95.
Software version is 1.1. Unit is in excellent working condition, appearance 8.5
out of 10. Arm pad, strap and grip are not worn or torn.

Here's a list of everything I'll ship:
> XLT, Charger, Batteries, Manuals in Hard Case
> Has coil cover and weather covers for LCD and electronics unit.
> Sand Scoop
> Small Garden type shovel
> Stainless Steel Hole Hog (precision hole digger)
> Homemade ground probe (modified screwdriver)
> Advanced Water Working Techniques BookLet's
> Talk Treasure Hunting Book
> Military type canvas pouch (clips on belt)>

The least I will take for the unit is $550 plus $20 UPS shipping if
you send a money order in advance. If you want COD then the shipping
increases $10 to cover the CASH ONLY collection charge.
To see specs and picture:
http://www.treasurenet.com/whites/products/spectrum.html

Feel free to call me if your still interested.

I have a Kenwood TS-140 all manuals(service & operating). It has the FM board, computer interface port installed and 11 meter mod. Rig works and look great. Picture's can be available on request.

I also have a AEA AT-300 Tuner, two pl-259 inputs, a balanced feed and a dummy load position.

Will take $500.00 for the pair or offers on seperating them.

Motivated to sell these as wife says I need to for my tower project. GRIN...

Hi
I'v got an Icom ic706mk1. Just got it recently, only a few months ago, but I have hardly used it. Not worth my having it really. HF mobile operation didn't turn out as successful as I hoped and I'v got another rig in the house. So I was thinking of selling it, but, what would be better is a trade.
Anyone like to swap/exchange anything radio related? Maybe a good FT747? A TS50 plus a few quid would do, or even CB gear if you've got some decent stuff. Or what have you got?
Get in touch.
cheers
Jack MM0AXL
PS. I am situated in the south west of Scotland, UK.

Talk about nit-picking!!!! This of course is a correct statement, but they are mostly reffered to as MK1's ...A lot easier than saying "original", or requiring someone to ask "is it a MKII"..

Seems like we have a lot of people on this and other groups that have nothing to do but criticize others' spelling, grammar. etc..

And you're probably like most US amateurs, if it doesn't fall in their
lap ready made, to the letter, then they don't want to know and don't
have the intelligence to figure it out for themselves.

Stick to it Jack. Some of us do have the intelligence to work things out
for ourself without it being in black and white, and to the letter.

Ernie, I have a nice Ten Tec Corsair II HF tranceiver for sale. It works 100% and comes with the manual. It was just recently reworked by Ten Tec and sounds great. On a 1 to 10 scale this one is 9.8 Would you be interested in a trade. The value of the radio is around $750 so I would expect $200 cash difference. Same rules as you listed below for the transaction.

William:

I bought my Ten Tec Corsair II sevarla months ago for just over $400.
and then saw them posted for less than that with filters and the matching
power supply (mine had neither), has something happened that has escalated
the used value by over $300.?

I would have loved to have gotten $750. in trade value out of mine! I
heard that collectors inflation is puffing prices, but I didn't know the
Corsair II had become a collectable. :-(

Are there any QC people out there who can explain what this mil-spec business is all about? All the major manufacturers are making terrfic claims to imply a high standard of durability, but they're not being very "mil-specific."

Please post comments.

Sorry bud but you're wrong. I have been a ham for 25 years and service my own equipment. I also home brewed a lot years ago.
I knew I could get a rise out of someone but from the UK?

As the sender of the original IC706Mk1 message, I cant believe that this has got so out of hand. Dont you think this is such a minor matter that its embarrassing that some sad lonely people have nothing better to do than pick fault.
So heres a message to Steve and Gary W8PU.
As far as I'm concerned if a radio manufacturer makes a "mark2" than the previous model should be described as a " mark1" to save any confusion.
Now would both of you please not answer any message of mine ever again, and preferably never post one to this newsgroup. We have better things to do with out time than search through this crap looking for sensible material.
Jack.

Right on the head Jack. It comes from people with nothing better to do
but to sit an trawl NG's looking for things to nit pick. Good luck
selling your gear Jack.

For all your info, my 706 has been sold. To a bloke who, peculiar though it may seem, didn't give two hoots what it was called. I'm sure that wondering if it should be a Mk1 or not wont spoil his enjoymeent of the set.

I sent a few messages to people to tell them it was sold, but they bounced back, so I hope you all read this.

There are hundreds of thousands of specification out there written to
cover everything that can be imagined from communication equipment to
choclate chip cookies and even condoms. These mil specs detail out
every requirement that the product must meet. Each of these reqirement
must be tested and verified on either a sample basis or on every unit
depending on the contract requirements. The mil spec system was a
response to questionable equipment delivered during the late 50s and
60s. This system is being replaced by Acquisistion Reform. The new set
up puts all the control and responsibility back with the manufacture.
The same as it was before the Mil Specs came about. Will this lead to
the same problems all over again? MOST LIKELY.
The mil spec hardware may or may not be any better than commercial
equipment. I have worked on equipment that the manufacture built to the
mil spec requirements and the same equipment built to "Best Commercial
Practices", sometimes the mil spec is better sometimes the commercial is
better. I hoe this sheds some shadows on the idea of MIL SPECs

Hi,

Mil-spec is short for military specifications. These are simply a set
of minimum standards that the military has for some types of equipment.
This does not mean the equipment is superior to non-spec equipment. Many
manufactures exceed the mil-spec by a wide margin. It does guaranty a
minimum sort of standard. The mil-specs were devised to insure equipment
would be reliable, and rugged enough for field use. As a member of the
military who has used and repaired a fair amount of mil-spec equipment
I can only say, treat it like any other purchase. Call around and see
what the people who use it say.

Hello guys,

I'm studying for my ham ticket right now, but I found some good deals on radio books at http://www.chelmsford.com/sat/resources.html if anyone's interested. Some are discounted pretty good, others are titles I didn't see before.

1024. FS: Heath 2M AMPL. for HT's

Newsgroup: rec.radio.amateur.swap
Date: 1998-08-25 00:00:00 UTC
From: Marty <marty-k2@snet.net>
Message-ID: <35E2B86C.CD2599B4@snet.net>
Source record: 9516
Cross-posted to: rec.ham-radio.swap@snet.net,rec.ham-radio.packet,alt.ham-radio.packet,rec.radio.amateur.digital.misc,rec.radio.amateur.swap,rec.radio.amateur.digital

For sale, HA-201 2M amplifier. Great for getting that HT signal out.

Output 8 watts with 1 watt in; 1.5 in, 10 out. Appearance is very good.

It has been modified by substituting a carrier operated relay(COR) for
the original diode switching TR circuit which noticeably attenuated the
received signal. Also, SO-239's have been paralleled with the original
RCA jacks for both input and output. Dimensions: 5.5"x3.5"x3.0".

With original manual. $35 plus shipping from CT.

Marty K1FHR

1025. 2m & 6m multimodes for trade/swap

Newsgroup: rec.radio.amateur.swap
Date: 1998-08-25 00:00:00 UTC
From: Jack <jack.axl@btinternet.com>
Message-ID: <01bdd01f$690d8820$LocalHost@default>
Source record: 9517
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.cb,rec.radio.swap

Its time for a shack clearout, I'm getting rid of everything I dont use
and
looking for something more useful.
The following equipment is not necessarily for sale, I'm not strapped for
cash at the moment (nice to be able to say that for a change) so I would
prefer to swap / part ex these items for something else. Like a TS50, a
FT747, a 2m/70cms dual band mobile, decent CB gear, or whatever you've got
spare. Try me.

Yaesu FT690R2, 6m multimode. Boxed, pretty good nick apart from a mark on
the top case,
BUT it comes with a brand new top case straight from Japan (still wrapped
in Japanese newspaper). Complete with clip on telescopic antenna, battery
charger and a set of brand new nicads (never been charged)

Also, Nevada 15 watt linear amp for 6m.

Also, Yaesu FT290R2, 2m multimode , with rubber duck antenna and full of
nicads. Not as
tidy as the 690, a few scratches here and there on the top and bottom
cases
and the display backlight doesn't work, but everything else works
perfectly.

Also, Microwave modules ML144/30-LS 30 watt linear amp for 2m.

Now I reckon this stuffs got to be worth 600 notes. But like I say, I'd
prefer to swap it. Drop me an email if you'd like to chat about it.

Hi All,

I have just spent over an hour making at least a half dozen calls across the country. You'd think that in that amount of time i'd be able to find a company willing to sell me the VPL-1D programming kit for the FTH series portables and the VXR series repeaters. Most of the companies that I spoke with said that they can sell this kit to adresses in their own state or export only. I have been unable to speak with the Yaesu rep. that covers Utah(based in Denver, go figure?).

I have 12 of the FTH-2009 radios and I need the programming cable and software. Anybody have pinouots for the cable? Can anybody help me out?

After today, I am of the belief that Yaesu software is harder to obtain than Motorola RSS.

Thanks in advance!!

Dan Dialogue

Another consideration is, they will never tell you what paragraphs or tests under the generic MIL they're quoting, much less how testing was performed ("qualified" labs, etc.) MIL testing is laborious and expensive. I doubt seriously that ANY ham manufaturer has actually gone through all the hoops to qualify thier equipment. I asked Yaesu, once, and they blew it off. They had no idea what I was talking about!! Take it with a grain of MIL-K-876B/C salt!

Bullshit. It is NOT all mode. It does not include the hard to find
module which is required to work FM.

What question ? Nobody asked a question. But yes, the rig will "work"
FM (not DO FM) with the optional module JUST like stated in the items
description on eBay if that's what your refering to.
You ex cb'ers need to learn the "ham" language and get out of the CB
age. I see your as big a wimp as the other guy with the phony email
address.

1044. Help needed with FT-73 tuning

Newsgroup: rec.radio.amateur.swap
Date: 1998-08-27 00:00:00 UTC
From: "Jack T.Dragon" <tdragonn@blarg.net>
Message-ID: <35E59367.5824@blarg.net>
Source record: 9438
Cross-posted to: rec.radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap

I need some help for a friend. He just picked up a FT-73r, and wanted to mod
it so that he could listen to his businesses freq but not x-mit on it. However, the
radio dosen't work much outside of it's designed limits. RX drops off pretty fast. He
says that there's a pot inside that'll widen the radio's RX and TX up. But without
the service manual, figuring out which it is isn't easy. Can anyone help him out?
He dosen't have internet access, nor even a home computer, so I'll relay
messages for him.
P.S., if you think he's doing this to mess around with other freqs, he's most
definately not. He's 67, and he's a Vet who strongly believes in not breaking the
law. I've known him long anough to know that he's straignt. Besides, as a precaution,
he's going to set the Tx freq to something so far out of band that TX power will be 0
watts. With this ht, that's easy.

item #27642396. late WE [s/n 46xxx] with RE pto subchassis--a crossover model i reckon. this radio has .8 and 2.4 filters, not a scratch or chip in the front panel, one paint chip on the rack adapter, a little shelf dust on the chassis is all, the knobs paint isn't chipped, the knob inserts do need polishing, and the power cord's a bit dirty but still has the original little green tag. probably a CCA 9 or better, but i'm not sure i fully understand the cca rating system so i've tried to give a comnplete descriptiuon.

I have a Bug that I would like to sell or trade, but have no idea of price.
It's chrome and has a wide base on it. Serial number is 213677. I has a
triangular shaped fulcrum and the speed setting bar has numbers on it wiht
the weight there too. All parts are on it and it's in really good shape.
On a scale of 10 (new) it's at least an 8.

That ugly antenna that comes with the FT-50R isn't as horrible, say, as the stock VX-1R antenna...but the Comet SMA-503 is a better performer. You can use it, of course, on both your VX-1R and your FT-50.

Circumstances force me to offer for sale my pristine 51S1F, very late WE s/n 46XX with RE PTO subchassis, apparently a crossover model. Works good. Not a scratch or chip in the front panel. The only defects are a chip in the paint on the rack adapter and a dirty line cord, which still has the little green tag attached.

$1400 o/b/o, buyer pays shipping.

It's OK. I have worked a few of them. Thought it sounds kinda of mushy above 35 wpm when in QSK mode. Like it's chopping some of the dashes or something. Don't know how well it RX's. Can only tell you what it sounds like over the air since I don't have one.

I can say, the faster you send, the better your signal must sound due to static and QRM. It's takes too much effort to guess what your trying to say... Best CW still comes from older rigs with a manual PTCW switch.

I am considering buying an Icom IC-706 or 706mkII. Since my favorite mode is CW I would like to hear comments from anyone on how well this rig performs on cw. How is Icom's optional CW filters in this rig? Good S/N ratio ? I need something more portable to drag back and forth from my cabin and since I am currently lugging seperate rigs for HF, 6 and 2 meters the 706 would better fit my bill. Any comments at all would be welcome please.

Tim-

I cannot give you a fair reveiew on CW, as I do very little CW work. The IC-706 is an excellent rig though for all-around work. The MKII model has anumber of enhancements over the original model, and the current incentives from Icom make it almost a no-brainer as to which model to choose.

Portable, the 706 is very compact, rugged and a good performer on SSB and FM. The menu system does take some getting used to, but it grows on you. I have used mine now for several years, and have just bough tthe matching AT-180 for it. The separation kit is almost a must for mobile use if you are going to actually mount it. I use a Timewave DSP-9+ on SSB and don't miss the filters at all.

I would choose the IC-706 over and over again, but I have to admit I would have waited for the MkII if I had known it was coming.

Go buy one. You'll be hard pressed to find so many features in a small box like this.

It's ok. I have used one at a field day that had a cw filter. It was pretty tight. But I wasn't overly impressed with the overall audio quality of the rig. Seems to maybe have a tad to much rf gain on the low bands. But I imagine this is due to catering to the mobile ops. It wasn't distorted or anything just kinda flat sounding. But heck, what can you expect from such a small radio, and also I'm spoiled on my 830 and other rigs. Good sensitivity on the high bands. Overall I'd say it's ok. Reliable with a decent track record. And small. I use a old IC 730 in my car, and has been a very reliable radio over the years. MK

Well I've got an Icom IC-706MKII in my '86 Chevy S-10 pickup.
It's mounted in the space below the AMFM/cassette player.
Don't run mobile CW with it as I only use it for SSB & sometimes FM.

It also makes a great SWL reciever

Antenna is a Bugcatcher. Don't use any kind of antenna tuner.

For those of you who were also ripped off by Roland S. Geter, Sr.
He has been fired from the Maricopa County Sheriff's Office, (as a result of my formal complaint), and if anyone else would like to pursue action against Roland S. Geter, Sr. you may contact the sheriff's office at....
Maricopa County Sheriff's Office
102 W. Madison St.
Phoenix, AZ. 85003

Put your complaint in writing, be "professional", and be very precise with your details. Include any relavant e-mail exchanges, receipts, etc. They are especially interested in any other instances Roland Geter identified himself as a deputy to "close" the deal. I also carbon copied the Arizona Attorney Generals Office but I have not heard from them yet.
Good Luck,
Piero

We have for sale one Kenwood TS440S/AT. The radio has hardly been used, and comes in the original box with user's manual and hand mic.

The radio has had the extended TX modification done to it.

We are asking $600US or best offer, buyer pays shipping and prepays with a US International money order.

Pictures and specs for the unit can be seen at http://www.bcfmca.bc.ca/ts440.html

We can be contacted at bcfmca@'nospam'bcfmca.bc.ca (please remove the 'nospam').

Thanks.

From: Terry Brown <brownt@frl.orst.edu>
Message-ID: <35F69F06.577639F6@frl.orst.edu>
Source record: 9396
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

I have an Icom IC-751 that does not have a scratch on it. I have original box/manual/mike. This rig was used mostly in the late 1980's then very little since then. I have logged all my contacts and this rig has been used to work just over 1000 contacts, mostly short duration DX. As a result, it has not had a great deal of use.

I power up the rig every few months to make sure everything is in proper working order. Because I did not want the added heat load on the rig, it does not have an internal power supply.

Also included: RC-10 remote control unit. (keyboard for direct frequency

entry).

Price: $575.00 FIRM

If you are looking for an excellent, non-DSP rig with a lot of useful features that won't overwhelm you, this is a good rig for you.

Terry Brown, N7TB

For Sale - Best Offer (plus shipping)

2 meter transceiver, Alinco DR1200, manual, no microphone.
Was used for a packet BBS, so it was purchased without
the microphone. However, a new mike would only cost about
$30.

Asking Price: $145

You are correct in regard to HRO which has an EMS-11 for around $50.
However, I've seen several compatible new mikes at swap meets for
around $30.

I have for sale-
Icom IC-706 (Original) with HM-95 Touch Tone Hand mic.
Matching AT-180 auto antenna tuner for the 706.
The 706 has the CR-502 High stability oscillator,
UT-102 Voice synth. and
FL-223 1.9 kHz IF SSB filter installed.
Radio has the MARS/CAP Mods.

$925.00 shipped Con U.S.
Maybe Swan 250 in good shape plus $

I can send digital pictures if interested.

Also looking for a 5 pin DIN to fit a Microwave Modules Transverter.

Could someone please tell me where to take the audio in and out from an
FT-990 radio.
There are plugs for packet and what not (friends radio) but where would be
good to plug in on the back to get the audio to send and receive SSTV??
Any info would be appreciated. Oh and I looked in the owners manual and it
doesn't say anything about SSTV. DARN.
Thanks all.
Andrew

I use the phone patch in and out on my TS 940. The
FT 990 probablyhas phone patch connections, use
them.
For address change .com to .net

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $2900 U.S. plus shipping. Condition warrants price.

The laptops ARE to be used for a law enforcement project. Is it true that you LIED to the Maricopa County Sheriff's Office, telling them that Roland said he was a Deputy Sheriff when in fact he would never say that? If you did lie, and you are in fact a police officer, then maybe someone needs to take some action with the Internal Affairs office at YOUR agency. There's nothing worse than a corrupt cop.

I have a New MFJ-1024 active shortwave antenna with the following

1) Covers 50kHz - 30MHz
2) 20dB attenuator with gain control
3) 54 in. whip antenna
4) 50ft. cable

MFJ does not sell this with any sort of power supply. I will throw that in as well. This is new guaranteed against DOA. First $75 gets it. Buyer pays shipping. Questions to thecrow@poboxes.com.

He didn't even need the tracking number. Federal Express in Phoenix
Arizona contacted Mr. Geter personally to pick up his package. They had
the package waiting for him and he never picked it up! They (Federal
Express) and I contacted him several times to pick up the package but he
never picked it up!

> The laptops ARE to be used for a law enforcement project. Is it true >that you LIED to
the Maricopa County Sheriff's Office, telling them >that Roland said he was a Deputy
Sheriff when in fact he would never >say that?

WRONG! He told me what the laptops were to be used for and that he was a
deputy sheriff for the Maricopa County Sheriff's Office. If he didn't
tell me that, how would I have known that fact, crystal ball???
I also have several e-mails from other amateur radio operators he has
done the exact same thing to, I guess we are all lying and Roland Geter
is the only one telling the truth!

>If you did lie, and you are in fact a police officer, then maybe >someone needs to take
some action with the Internal Affairs office at >YOUR agency. There's nothing worse than a

corrupt cop.

No, I did not lie and I substantiated my facts with the Maricopa County Sheriff's Office with documentation. I will be more then happy to submit to a P.S.E. test, (more accurate then a regular polygraph), given to me by any qualified and certified law enforcement agency/operator
> - Harold

Harold, get your facts straight before you accuse someone of something you have no personal involvement in and are only getting part of the story. The Maricopa County Sheriff's Department was satisfied with the documentation I provided them, something you apparently weren't informed of.

Harold,
While you are conducting your investigation, why don't you do a search of the Dejanews files, in the search field enter Roland Geter and you will get plenty of hits about your buddy Roland Geter and his business dealings, bad checks, items never paid for, etc., etc. Just today (9/21/98) another posting from a guy who got a bad check from Roland Geter in Arizona and filed a complaint with the Glendale Arizona District Attorney's Office. It took five years for the victim to get his money...isn't that great! You can contact the D.A.'s office for Glendale Arizona, bad check division to verify it.

Do your homework before you start defending someone....
Piero

Hi;
Several months ago, I responded to a request from "Roland S. Geter, Sr", claiming to be a member of the Maricopa County Sheriff's Dept. and sent him a batch of RCA numerical indicator tubes. The package was sent to the Maricopa County address and the payment has not been received. Since it was a mere $35 or so, I was not overly distressed by the non-payment. But, it seems, his perfidy was not limited to me.
bye, Sid Washer KC2COO

My mistake; it was $25, not $35.00 that Geter did not pay. Please see
below.

MARICOPA COUNTY SHERIFFS OFFICE
Roland S Geter Sr, Communications Posse
11201 N El Mirage Rd Suite 10
El Mirage AZ 85335-3104

Hi, Roland;
Enclosed are the readout tubes; I hope that they are what you want. I
had them left over from a project many moons ago.
Pardon my ignorance, but where is Maricopa County? I'v only been in
Arizona once, almost 51 years ago and that was just an afternoon in
Tucson.
(snip)
BTW, just make the $25.00 cheque out to me, Sid Washer, and my vacation
account will thank you for your support.

Very truly yours,

Sid Washer

Hi Sid,
Prime example of the problem I have been having with the most simple purchases!!! I have not been at that location for quite some time since I have been summer traveling. Since you apparently didn't send the items COD CASH ONLY my secretary thinks its all right that you think she's clairvoyant .....but she asks would you mind including a return address for a remittance? (smile)

Do you remember which tubes and quantities you sent? I have a couple volunteer technicians rebuilding four older Doppler traffic radar units for donation to a couple surrounding low budget municipalities. I'll check it they have been opened and used yet. Please be sure that 25 bucks included some shipping, OK?

Where is your vacation account taking you.... South for the Winter or North for the Summer? We leave Phoenix (permanent home) during 120degree Summers then return for 80-85degree Winters.
Thanks,
Roland S Geter Sr

Gee, how unusual...ANOTHER person falls victim to Roland Geter's games. The address listed above IS NOT the address of the Maricopa County Sheriff's Office. The actual address of the Sheriff's office is as follows.... Maricopa County Sheriff's Office 102 W. Madison Street Phoenix, AZ. 85003

I'm sure they would be very interested in the above situation about sending the package and not receiving payment. If you want to send a complaint, send it attention Lt. Scott Freeman, Internal Affairs Bureau. I know for a fact he would be interested in your transaction. Good Luck, Piero

Please move this thread off-line so we don't suffer through any more of it in the newsgroups.

It is becoming obvious that Mr. Geter only does business on his own terms - and woe to the person who doesn't understand, or strictly adhere to them. It becomes their "fault" because Mr. Jeter is in denial and now is blaming his "secretary" for not being clairvoyant. Where is his sense of responsibility? I don't expect that people will send me "free" parts - I believe I would attempt to communicate with them (that's what return addresses are for).

(It appears from the comments below that, if you just make up a package and send it "COD Cash Only" to Mr. Geter, his secretary is authorized to pay for it! I know how I am going to clean out my junk box (smile)).

Would you list the person(s) that say I have purchased their equipment
WITHOUT paying them using my COD CASH ONLY system. I realize 3
complain their shipper messed up which I have taken care of them all
as soon as they call me and produce some minimal documentation they
even sent me anything.

You're very, very right Al........ that's why I issue personal PO
numbers that I insist be on the package exterior. Before my PO system
I received over 15 such bogus packages!!!

To Piero,
You know, OM, we are really getting fed up with your problem. We personally feel too sorry for you to complain because maybe you can't help your condition. But you really should seek help, seriously, OM, Good Luck. Roland

To Sid,
Please be patient for remittance until I return to Phoenix in couple weeks and get caught up with items not received COD CASH ONLY, OK? . Yes. you will get your promised 501C TAX CREDIT receipt for the difference you sold me the tubes for and the value you placed on them, OK? The readout tubes are being used to repair older Doppler Radar Units I've donated to Law Enforcement Agencies. Sorry you had to catch the garbage here on the newsgroup but you should have contacted me directly. Sincerely, Roland

>Gee, how unusual...ANOTHER person falls victim to Roland Geter's games. The

>
Well, you're are wrong again, Piero. Just to show you how screwed up you are I'm attaching a copy of my cellular telephone bill among many that get mailed to me every month; you will please note my address. You simply don't understand how our system works here and are really making a fool of yourself. You are a prime example of attempts to misuse your badge and position. It's called abuse of power and you would have been immediately fired here in Arizona if not in your own precinct. Many of my friends, and one special one you'd be very, very surprised who I'm talking about, has personally suggested I not ignore your lies, and inflammatory statements, with my silence but that I respond to your lies. The truth is with the evidence, I could sue you and very easily win, but you don't have any assets to attach. All I could do is screw up your life with some ridiculous judgment I could never collect on. For what, I don't dislike you but instead hope you get better. You might consider that maybe you're burned out on your job, OM.

My friends and acquaintances have suggested I should reimburse you the amount FEDEX would have charged you only. Majority have said I shouldn't reimburse you anything because of your mouth. I feel It is not your fault but instead simply your ignorance of shipping conventions for which you shouldn't be penalized..

Roland

I have a ICOM IC-737 HF (160-10m TX) rig. It has the built in antenna tuner, built in keyer, dual antenna jacks (switchable from the front panel) and comes with a HEIL mic. This rig has all the extras and works 100%. All knobs and bunttons are present. No gouges or that funny smokers scent on the radio.

Asking 725.00 OBO

Thanks

TED

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for best offer over $2400 plus shipping. Condition warrants price.

The first thing that raises a flag is the he claims to be a member of a
Posse (volunteer group) and not an actual deputy.

The address he has given sounds like one of those Mailboxes, Etc. retail
store post office boxes that you can rent by the month. I don't ship
until I see the $$$.

Hey Piero and Sid,
Don't feel singled out, this jerk has ripped a buddy and I off in similar ways. I sent him a Federal Express COD package that this jerk refused to pay for and I got stuck for the shipping charges and my buddy shipped him an old Johnson mobile radio he never paid for. We both contacted this jerk time and time again and he never made good on the deals. The best advice is for everyone to avoid ANY business dealings with Roland Geter...he is a thief!

I don't think that this guy was trying to play 'Newsgroup Police." It seems like he was making a polite personal request, and pointing out the convention that is the basis of his request.

There are still lot's of moderated groups. The more useful groups are often moderated.

A charter isn't precluded because a group isn't moderated. Many Non-alt groups are still formed by vote based on a charter.

FS, FA, FT, WT* just help buyers scan the group faster and are to the seller's advantage. If the group takes too much time to scan fewer people read it.

Useful newsgroups that run well rely on a fairly high level of courtesy and convention (unwritten rules if you prefer.) The swap groups are getting busier by the day. If people don't make best use of the subject lines, the groups will get to take so long to review that they will be useless to all but the most technically sophisticated users who can filter group content by subject and message content. This mode of operation is in the interest of very few users of any of the groups.

Hi;
Mr. Geter claimed to issue "personal purchase order numbers" and that packages should be sent "COD-cash only". His memory errs because he did not specify either of those conditions at the time that I sent him the RCA numerical indicator tubes.
As far as I'm concerned, I've been ripped off to the tune of a big $25.00 and that's the end of it. Son cosas de la vida.

You will find this type of "individual" obtains pleasure from fleecing those more responsible among us. He is, after all, almost URBAN LEGEND status on ALL of the swap lists with his unscrupulous ways. I got bit two years ago when he responded to an ad for a Johnson Viking Thunderbolt amplifier. It was always "the check got lost, send it anyway and I will get another check right out".... You know how much that Thunderbolt weighed??? Took three men and a boy to lift it!! Like Monica said, "dealing with him leaves a bad taste in your mouth...."...

Too bad Roland, it appears you are the only one who is getting fed up with this problem YOU created...you should have gone to the Federal Express Depot when they called you and told you about the package.

> We

"We"? You have a mouse in your pocket?

> personally feel too sorry for you to complain because maybe you can't
> help your condition.

What condition? My aversion to people who cause me financial loss? If that is a condition then I guess I have one.

> But you really should seek help, seriously, OM,

Sorry Roland, but I'm not the one who is writing bad checks, receiving merchandise and not paying for it, not paying for C.O.D. shipments I have personally authorized to be shipped, etc., etc. like you have been for many years as it appears by all the replies and posts.

> Good Luck. Roland

It is nice you can pay your cellular phone bill but you can't pay for your C.O.D. shipments, other packages you receive, etc., etc.

> you will please note my address.
> You simply don't understand how our system works here and are really
> making a fool of yourself.

Ohhh, I see, those of us who don't "understand" your system have to suffer financial loss.

> You are a prime example of attempts to
> misuse your badge and position.

If you consider me "misusing my badge and position" to bring light to your games then I guess I do. Hopefully, by posting these warnings, no one else will fall prey to your games. I also guess I "misuse" my badge every day I go to work when I arrest thieves, bad check writers, stop creeps from victimizing other people, etc., etc. I must be doing something right, I'm the highest decorated officer in my department and in the area so I guess no one in this area agrees with you

> It's called abuse of power

Wrong again, abuse of power is when, as a police officer, I commit a crime. Sorry, I haven't committed any crimes here. I haven't written bad checks, caused financial loss to others by having others ship C.O.D. packages and not paying for them, or worse yet, receiving items and just not paying for them as you have done.

> would have been immediately fired here in Arizona if not in your own
> precinct. Many of my friends, and one special one you'd be very, very

> your lies, and inflammatory statements, with my silence but that I
> respond to your lies.

I can back up my statements with copies of your e-mail messages (which I have kept) and every other aspect of our transaction. Also, if you look around you will see many others who have replied about similar problems...I guess we are all mistaken? I guess we are all lying and you are the only one telling the truth.

> The truth is with the evidence, I could sue you
> and very easily win, but you don't have any assets to attach.

And I have plenty of evidence. Please sue me, I'd be glad to see if the State of Arizona would fly two law enforcement officers here to pick me up, then transport me (fly of course) to Arizona for the civil trial. At the civil trial I would bring all the copies of our e-mails, my receipts, subpoena the other victims who have replied, and of course your court abstract from the Glendale District Attorney's Office. Oh, I forgot, the Governor of Pennsylvania won't sign an extradition order for

me to be taken to Arizona for a civil trial, and I don't think the State of Arizona is willing to spend thousands of dollars to process a civil service when they look at your track record. As far as my personal assets, I have many assets you could try to attach. I own a 3000 sq. ft. 4 bedroom, 2 1/2 bath home with an inground swimming pool. I own two modern cars and two antique cars, and I own a lot of other personal property. Speaking of assets, still living in an RV?

> All I
> could do is screw up your life with some ridiculous judgment I could
> never collect on.

You are correct there, Pennsylvania won't honor your ridiculous claims, and from what the Arizona Attorney General's office told me on the phone, they won't either.

> For what, I don't dislike you but instead hope you
> get better.

I would get better if you paid me the $132.58 you cost me from shipping that package to you and you not picking it up.

> You might consider that maybe you're burned out on your
> job, OM.

Sorry to disappoint you, but the professionals disagree with you.

>
> My friends and acquaintances have suggested I should reimburse you the
> amount FEDEX would have charged you only.

That would be better then the nothing I have received from you.

> Majority have said I
> shouldn't reimburse you anything because of your mouth.

I guess your "majority" has not suffered financial loss because of your actions. I told you not to play games, did you think I would just take this lying down like so many other of your victims?

> I feel It is
> not your fault but instead simply your ignorance of shipping
> conventions for which you shouldn't be penalized..

No, it is my fault for not insisting on payment up front with a postal money order and not shipping until I received the money up front. I trusted you when you said you would reimburse me after you failed to pick up the package when notified by the supervisor , I'll never make those two mistakes again! It cost me $132.58 to learn that lesson.

Don't feel bad Sid, Roland Geter specifies "his" conditions as he goes along. Even if you had met every one of his "conditions", you would still be out your $25.00. That was his excuse for not picking up the C.O.D. package I sent him as he specified, even when contacted by the supervisor at the Federal Express Depot in Phoenix, Arizona where he "does a lot of business". Yes, I also have suffered a loss, mine was a little more expensive to the tune of $132.58. I hope others won't fall victim to Roland Geter's shenanigans and they heed my warnings. You can also forget Roland Geter's false promises of making good also, I can send you his e-mails where he promises to reimburse me for the lost shipping charges AND wants me to reship the computer. Fortunately I demanded payment up front before I shipped this notebook computer again. Of course the postal money order never arrived.

An expensive lesson learned,
Piero

You are right, unfortunately he has Harold Lines buffaloed with his lies and deceptions. I will continue to warn others about Roland Geter until I am reimbursed for the monies I lost as a direct result of his scam. It is ashame Roland Geter doesn't come into my jurisdiction, this problem could be legally remedied immediately. I also hope others file complaints with the Maricopa County Sheriff's Office so legal action could be taken in Arizona...although some legal action already has been taken.

Piero

I did notify the Maricopa County Sheriff's Office who took
administrative action against Roland Geter. I also notified the Arizona
and Pennsylvania Attorney General's Office. Unfortunately, because of
the small amount ($132.58), they would rather reimburse me out of their
own funds instead of prosicuting Roland Geter for Theft by Deception.
Prosecution just isn't finacially fesable for bothe states. However, if
everone who has suffered a loss by Roland Geter would file a complaint,
maybe some further action would be taken.

Have specially modified Kenwood TS-742 that works in combination with a CSI Patch IV. This provides autopatch, repeater, remote controllable configuration. Have used this set-up for field day repeater, local repeater with a 150 watt FM UHF amplifier which is also for sale.

This is an excellent combo package for anyone looking for autopatch, economic repeater for private club or individual use.

Asking $1300 for everything and a few extras - customized cabling with N connectors, discriminator output switch, etc.

Will consider any reasonable offer or trade. Available to ship overnight!

I recently purchased a BCT-2, When monitoring a channel it always cuts out
(checking another channel I presume) can I change this??

Also the delete button on the front I assume is to remove unwanted channels!
By deleting these is there a way to restore them at a later date, i.e...
turn off then on??????

Greetings,
I won this radio at the Madison, Ohio Hamfest 03/98. This radio has less then four hours of use on it. Due to my schedule and lack of time most of the time it has sat in the box. The radio is in brand new condition. I am asking $950.00 or best offer. I will pay the shipping. If interested please e mail me at stu@harborcom.net or call at 440-352-7787. Thanks in advance. 73, Stuart KB8VIY

You know, from reading these post, from Mr. Geter, I
got the impression from his early post that he actually
worked for the Sheriff's Office. Maybe it was just me.
But I wonder how fruitful it would be to file a formal
complaint with the Sheriff's Office, with a copy of the
early post that led me and probably others, to draw
the conclusion that Mr. Geter was 'officially' associated
with them. They may be able to provide some added
'influence'. Especially if you indicate satisfaction would
be achieved by being compensated, not by continuing
the complaint process.

If nothing else, you can stink it until the Sheriff's Office
wouldn't deal with Mr Geter if he gave them stuff for free.

Sometimes it's not right or wrong, correct or incorrect,
good or bad. It's strictly quieting the most annoying noise.

I'll bet ya Harold Lines has never sent that guy ONE THING so he has
nothing to base his support on,some people just bury their head I guess.
BTW,have you even recieved a reply from the Maricopa County Sheriff's
Office?

1209. 7D02 - PM101 module search

Newsgroup: rec.radio.amateur.swap
Date: 1998-10-02 00:00:00 UTC
From: Jim Flanagan <jflan@gte.net>
Message-ID: <6v2h0n$jv1$1@news-1.news.gte.net>
Source record: 9366
Cross-posted to: sci.electronics.equipment,sci.electronics.misc,sci.electronics.repair,misc.industry.electronics.marketplace,sci.electronics.design,rec.radio.amateur.swap,rec.radio.swap

Does anyone have a PM101 personality module that they would want to sell
or trade at a reasonable price? This module was used with the
Tektronix model 7D02 logic analyzer...

Also, does anyone know where to find the Tektronix document that
describes how to develop custom ROMs for these modules. Supposedly,
there was at one time, a document referred to as a 'ROM development
aid' that described how to write the P-code for these modules.

Any help would be appreciated.... Thanks..

Jim Flanagan..

Real smart Dana.

It's so touchy that you have to post 10 bytes to bitch with
how many bytes in the reply? It you don't like it, don't read
it. I sure everyone cares that you posted. For that matter,
I just every one is just tickled that I'm replying, but then,
I don't care, just like not that I've pointed out your stupidity,
I don't care about you.

It's my jop to point out stupid things.

This radio works and looks well. It has no wear marks on its face. I
will not state mint condition because that phrase means an in box
condition which has never been opened. The radio does however look close
to new. It is a 4 year old radio.The price is $1250.00 Mike.....
e-mail to above address. Thanks

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for best offer over $2400 plus shipping. Condition warrants price.

Ryan,

It's not that we all hate eBay auctions, it's just that we'd rather
you put the word "eBay" in the title of your post, so we'll KNOW it
is an auction and not a normal sale. I wouldn't have read the post
if I'd known it was an auction (although I use eBay myself a lot!).

73,

Dean, K5DH

Ryan, you could avoid the flames by paying attention.

You are already aware of the eBay "discussions" in this newsgroup. You should also be aware that a "gentlemen's agreement" has been reached - if you put FA (For Auction) instead of FS (For Sale) or eBay in the subject line, you will avoid all the flames!!

Greetings everyone, we have some news to share with you!!

We have a new home!! We are now located at http://www.batlabs.com
Please update your bookmarks.

Additionally, after 36 hours of work, we have a bunch of updates to
share as well. These include:

-Added the cloning cable pinout, cloning instructions, and 99 channel
scan programming info to the HT600/MT1000/P200 page

-Added Pac/RT and Type I to Type II/IIi trunking conversion infor to
the Maxtrac page

-Updated the model chart and added channel expansion info and the
power connector pinout to the MCX1000 page

-Re-scanned the MTSX model chart

-Added B5 to C7 conversion info the the Spectra page

-Added info on adding conventional personalities to trunking STX's

-Added some out of band info for 5-tone GP300's

-Added the R.I.C.K. schematic

-Added some info on the mic connector for the Maxar 50 and the power
connector for the Moxy

-Added a PROM conversion chart for the Syntrx

-Corrected an error on the pager RIB schematic

-Added the pinout and schematic of the PL board for the SP10

-Added the programming cable pinout for the MTR-2000 repeater

-Added some info on adding channels to an SM50

-Added another possible dongle pinout for TK

-Added a link to get MoSlo for slowing your machine down

-Made a correction to the Spectra 900 programming cable

-Updated the WANTED page.

SO, come visit the premier Motorola 2-way information page at our new
home on the internet. There is no one else who compares (actually,

there is no one else, period :)).

Thanks,

Bat Wing

I have the following for sale, prices do not include shipping. E-mail direct if interested.

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply: $150.00

Unbuilt Heathkit Coax-Switch $60.00

Heathkit DX-60B w/matching HG-10 VFO: $130.00

MFJ 752C Signal Enhancer: $40.00

Heathkit AM-2 Swr Meter: $15.00

Pair Collis Motorized Roller Inductors $80.00

Kenwood TS-930SAT w/250hz CW filter, auto tuner, etc... exec condition: $850.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @ 1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 6KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $450.

sounds like it's checking the priority channel (every 2 seconds or so)
i think you'd have to use "hold" on the channel you want to override
the priority checking (i think)

i think if you hold the "lockout" (delete?) button down for
2 (or is it 5 seconds) you will hear a "beep beep". this is
the procedure to release all locked out channels.

if this don't work - maybe find a operator's manual . . .

This Argonaut is in excellent electrical shape. It draws less current than my 509, and may be more sensitive as well. It has been realigned very recently. Cosmetically it is average. It has one scratch on the top of the front panel that is quite noticable. It is an early serial number. There were only about 4,000 of these made according to a Ten-Tec ad. It is a really fun little rig for camping, and QRP. The reason I'm selling it, is that I already have a 509 and a chap in Ireland wanted it quite badly until I got it packed up and he found out it didn't cover 160 meters. (It covers the 5 old bands between 80 and 10 meters.) I'd like $250 for it.

Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,rec.radio.shortwave,rec.radio.scanner

For Sale: Yaesu FRG-9600 multi-mode scanning communications receiver.
Receives 60-905 Mhz continuous
100 memory channels in 10 banks of 10
All mode - AMN, AMW, FMN, FMW, USB, SSB, CW
Can be computer controlled
Clock, timer
Triple conversion
Signal strength meter
Search, priority
Attenuator, tone control
Dial or keypad tuning
Base or mobile operation (mounting bracket, DC cable not included)

This receiver is ideal for those wanting to explore all signals between 60-905 Mhz. It will receive amateur radio (all modes), military (all non-digital), public service, business, FM broadcasts, TV broadcasts, etc. There is even an optional board (this radio does not have it) which will allow you to connect a monitor to it and view TV signals! In particular, this receiver should be of interest to amateur radio operators working satellite and DX. Radio is in mint condition and includes the whip antenna, AC adapter and manual.

This radio originally sold for $550 to $600 with dealers selling it used for around $400 currently. Price is $375 firm, I pay your choice of UPS or USPS shipping. Payment by postal money order only, no trades, US sales only. Please Email if interested. Thanks...

Its checking the "extender" channels for whatever state you selected, when
it finds
activity on one of them it will sound an alarm and the red "WARNING" lite
will
flash. To restore deleted frequencies, make sure the BCT-2 is not scanning
(open
the squelch) then press and hold the (DELETE) key until "CL" appears on the

display.

For Sale or trade: Complete AEA Fast Scan Amateur fast scan
tv
station. Includes:

AEA VSB-70 Fast Scan 430mHz transciever

AES RLA-70 remote 50 watt linear amp, can be mounted at
antenna
for low loss.

AEA MPS-100 multipurpose power supply,for both above units.
Feeds DC to remotely mounted amp via DC block in
coaxial feedline.

This equipment has seen very little use and is in as new
condition.
Comes with complete documention and an added Complete ATV
workbook, second edition. Original boxes and manuals.

Add your antenna/feedline, and TV of your choice and you're
on the air with fast scan TV.

Original cost at Amateur Electronic Supply was near $1100.
Will sell
for around half that or entertain interesting trades,
particularly
a Kenwood TS-50 or IC706.

Reply direct or phone 417-469-3347

Subject: Need data on Shakespeare Pogo Stick 318-GBT(28.885
machine?)
Cc: rec.radio.cb
Date: Sun, 18 Oct 1998 11:49:18

Hi All.

Can anyone tell me what this is? :(IE: electrical details)
I recently purchased a fiberglas/aluminum vertical whip.
Aprox a 6' fiber base, and a 12' vertical aluminum top section.
As far as I can tell, there are no ground wires needed but there
is a small bolt near the bottom for ?? (maybe a coil???)
It's labled as a "Shakespeare POGO STICK model 318-GBT"
No data on any of the Shakespeare pages. No electrical contact between
the so239 and any surface or connection on the outside of the antenna.

I can't find anything at all on the net about it, and the 2nd hand shop
I got it at
didn't know. I thought maybe it was an older CB vertical that I might
load on
28.885MHz (ahhh..., the link to the VHF reflector-6m liason qrg)

I put it all together but it won't resonate on *any* freq from
1.8-174MHz so I
am thinking a broken connection somewhere or a missing part. I took the
bottom
plug out and the 'interior' coax connection to the so239 is all ok.

Someone mentioned to me they thought it was a 26-30Mhz antenna, but
needed
an external coil to operate it, but that's all they knew. Would be a
shame to
trash this rugged beast, as I am sure it'd make a dandy 28.885Mhz
aerial.

Any leads, tips, ideas?

Many thanks!

MIKE/ve9aa

Greetings,
This radio is in brand new condition. Very clean. No scratches.
Non smoking environment. I bought the radio on 06/02/97 from HRO. I
have only used the radio on 2 meter ssb. Never even hooked an antenna
up to the 70 cm connector. Due to schedule change and lack of time I am
selling it. I have the box, manual, schematics, unused hand mic and the
tone board is installed. Very nice write up on it in the March of 1997
QST. I am asking $1200.00 "OR BEST OFFER." If interested please e mail
me at stu@harborcom.net or call me at 440-352-7787. Thanks in advance.

I have the following for sale, prices do not include shipping:

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply:
$150.00
(The parts in this thing alone are worth $150.00)

Unbuilt Heathkit 5-Position Rotary Coax-Switch $50.00

Heathkit DX-60B w/matching HG-10 VFO: $120.00

Heathkit AM-2 Swr Meter: $10.00

Pair Collis Motorized Roller Inductors $75.00 for both!

Two HTX-202 HT's, these are in good to excellent condition, each with
external hand mic/spkr and 1800mah battery. $95.00 Each or $175.00 for
the pair.

Kenwood TS-930SAT w/250hz CW filter, auto tuner, etc... exec condition:
$850.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical
pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @
1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 5KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $400.

AMD K6-233Mhz Computer with 32MB Ram 6.5G Hard Drive, FDD, 32X CDRom,
1M PCI SVGA Video, KB, Mouse, Acer FX-3d Sound Card, 20W Speakers.
Full Tower Case. $400.00

If interested send e-mail direct.

Hmmm, unless your going for an exact OEM replacement of the identical type of cells, I wouldn't recommend you attempt to swap in dissimilar type lithium ion cells. The electrical characteristics (cell capacity, discharge curves, etc), are very precisely matched to the charging circuit at the time of manufacture. Most packs contain an onboard embedded processor to monitor the charging process. This might allow you to replace the cells with a non matching type, given the window of adjustment the circuitry will permit.... however, and this is a big however, if it doesn't like the type of load it sees, or encounters an unexpected type of characteristic, there's no telling what will happen. Li-Ion cells are very volatile devices. Used properly, they are a superb power source, but abused they can cause serious safety issues. Pick up an issue of "Portable Design", or Battery Engineering for more substantial info and a list of OEM suppliers.

1299. FS: TM733A/E SERVICE & OPERATOR MANUALS

I have the Kenwood TM733A/E Service Manual, with an additional 14
application notes and tech service bulletins for sale. This manual has
large schematics, PCBoard layouts, parts lists, and circuit
descriptions, and is as new in the original wrapping.
I will ship Priority Mail for $30

I also have an unopened operators manual, with the small schematics,
purchased as a spare, for sale.
I will ship Priority Mail for $10.

These manuals are no longer needed as the 733 has been sold.
If interested reply via direct email.

1300. FS: Ten-Tec Argonaut 505 QRP SSB/CW Rig

Newsgroup: rec.radio.amateur.swap
Date: 1998-10-27 00:00:00 UTC
From: frohro@wwc.edu
Message-ID: <frohro-2710981051380001@csp-frohro.wwc>
Source record: 9219
Cross-posted to:
rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.ham-radio.swap,rec.radio.amateur.boatanchors

Ten-Tec Argonaut 505 QRP SSB/CW transceiver. Nice QSK, 5 watts input, about 6 lbs. Draws less than 100 mA on receive. (This is less than the more common Argonaut 509.) According to Ten-Tec advertising, there were only about 2000 of these produced. This one (serial number 73) is cosmetically about a 7 out of 10 (it has one scratch that is noticable on the top of the front panel), and operationally it is absolutely perfect. In fact it is a tad more sensitive than my Argonaut 509. It has been recently completely aligned. Comes with a copy of the manual. Great for camping, or just QRP operating.

Reason for selling: I have an Argonaut 509 as well and can't really justify keeping both. I decided to keep the 509 for nastalgic reasons because I used to have one in my younger days. If you would like to look at some data, including a scanned QST advertisement, see: http://asd.state.va.us/tentec/tttrans.htm

$250 plus shipping.

Does anyone know where I can get a kit for a mobile HF amp?
Specs:
~300 Watts out
13.8V power
Stripline construction
10-80 meters

I had one and foolishly sold it! I believe that the ham who
built it got the kit from somewhere in Florida, but I'm not
certain of that.

If you can help, please email direct to: lmenzel@millcomm.com

The following items are for sale, prices do not include shipping, e-mail direct if interested:

Two Hy-Gain "Hy-Quad" antennas, one completely rebuilt with 14ga 168 strand
"Super Flex" wire, one needs new wire. $200 for the pair.

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply: $150.00
(The parts in this thing alone are worth $150.00)

Unbuilt Heathkit 5-Position Rotary Coax-Switch $50.00

Heathkit DX-60B w/matching HG-10 VFO: $120.00

Heathkit AM-2 Swr Meter: $10.00

Heathkit HN-31 "Cantenna" dummy load $25.00

MFJ-16010 300W Random Wire Antenna Tuner $25.00

HTX-202 HT in good condition, with external hand mic/spkr
w/2 batteries. The batteries for this need work, so only $65.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @ 1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 5KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $400.

1328. FS: Uniden SPS 802TS $200 obo

I finally got my Army MARS Call and paper work.
This is 6 month after I applied and 1 week after I sold my IC-706!
I need a HF rig that is MARS modified or modifiable.
Just looking for some thing reliable and cheap! Tube or solid state.
Can afford up to $450.00
Thanks!

i have CSI private patch V forsale.

it works in several modes to fit a variety of needs.

i've used it mostly in simplex mode with 1 radio [dr-119]
with connections made through the mic jack.

complete repeater controller if you want to use 2 radios or
seperate tx and rx units.

speed dials, fully programmable over air or on built in keyboard
or with the telephone.

remote base operation in any mode.

$200.00 u.s. dollars includes shipping via postal priority.

thanks for your time.

Hi all,

Since the JRC NRD-535 receiver has been discontinued, are there any discounts on this receiver out there? Also, would someone know of any radio closeout/liquidators that might have this radio? I've been searching for one of these radios, and would greatly appreciate any information you might have.

please reply to mroriole@gte.net if you have any information.

Thanks in advance,

-jim

1337. RT-385A NavCom Aviation Radios for sale

Newsgroup: rec.radio.amateur.swap
Date: 1998-11-08 00:00:00 UTC
From: tvsjr <tvsjr@sprynet.com>
Message-ID: <72505v$hk9$1@juliana.sprynet.com>
Source record: 9156
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have two Cessna RT-385A NavCom Aviation Radios which I would like to sell. Both radios light up at 14 VDC, however one will not receive- probably a 28 volt version (however, an Astron variable supply will let you run it). Replacements sell for around $2,000 new. These radios are in 8 of 10 condition, and include the radio itself.

These are the same radios used in many aircraft for navigational aids as well as voice communcations. They have a D-Sub connector which handles all functions, and I should have pinouts around somewhere.

Make an offer...

Thanks
Terry

I just picked up a Bowtie antenna and it doesn't match up to the manual I
have for the HF5B The dimentions are the same(12ft x 6 ft) but it is
missing a few traps.And it is too small for their 10/11 meter bowtie.
Did Butternut make another Bowtie..maybe a 3 Band model???
If so,is there any manual available.I will pay copying and mailing costs.
Thanks in Advance

Hello all!
I have a KENWOOD TR-7800 2 Mtr mobile for sale
it has mobile mount (sturdy),NEW nicad memory backup batts,MIC, and
COM-SPEC TE-32
PL DECK, Unit has its share of scratches but works great puts out 5 or
25 watts
15 channel. It kind of looks like a HF rig at first glance and has DTMF
on face
This radio was recently serviced and aligned at BURGHARDTS in So. Dakota

I just have too many radios now only reason for getting rid of it
I am asking $200 I ship for the package
If interested Please email
tiny2nz@jorsm.com
Thanks Tiny

Hi,

I recently acquired an old Knight Kit R-100A receiver, and it is missing a main tuning knob. I've scanned a couple of images in of it so you can see how it
looks. It is about 1.9 inches in diameter.

A photo of the front is available on the web at:
http://www.wwc.edu/~frohro/Knight_knob_top.jpg

A photo of the back of the knob is on the web at:
http://www.wwc.edu/~frohro/Knight_knob_bottom.jpg

If you have a spare, please send me a note!

Thanks & 73!

Rob, KL7NA/W7

Rob:

You should be able to find very similar knobs at most electronic supply houses, even Radio Shack. Or are you restoring it, and concerned about maintaining original parts?

i've got an hm-103.
it's the mic that came with my 706.
no dtmf but works/looks great.

a friend of mine used it with his 2710h while i replaced a chip resistor
in the stock mic to bring the audio down to an acceptable level.

I am looking for an NC-15 drop-in quick charger for my FT227R. I will settle for the NC-18 compact charger (wall wart) for FNB-4 battery packs if I can't find the NC-15 for a reasonable price. I want to deal pretty fast as my old charger is dead and the rig is pretty useless with no juice. Thanks in advance for your help.

This is the last day for this auction. I'm selling my tried and true 520se with the optional 500hz cw filter installed. Rig is in good cosmetic condition - (some light scratches on the case, face is very good), and excellent operating shape. With manual. Only reason it's leaving is that I just bought a new radio (TS-570D) and wife says if one comes IN, then one goes OUT! (hi, hi). Nice first hf rig, or as a backup. Very fine transmit audio - like most of the tube kenwoods always get great reports on the sound. And the cw filter is great for picking a signal out of the qrm.

So it's on EBAY thru tonight (11/13). Currently at $250. I have a $275 reserve, but have decided to sell for $250 or above plus shipping.

Not trying to be price police or anythig like it. But it seems to me one can buy a real nice DSP unit for the same price. I own all the same equipment and do not find anything special about the filter except the only way to find it is used.

I always come up with varying results when I use a search engine to look for an amplifier.

I'd like to hear from anyone and everyone privately about what words YOU use to search for amplifiers.

Which words individually?
Which two or three word phrases?
What can you think of?

Please reply privately to me as this won't be of much interest to most newsgroup viewers.

For Sale: 2M (50 watt) Linear Amplifier and pre-amp

This amp is just over one year old and is in excellent condition. The current list price for the amp is $119.95 at AES (which is where I bought it). I am willing to sell the amp for $70 or best reasonable offer. I got my amateur radio license a while back and have just gotten out of the hobby for one reason or another. Please let me know if you have any questions or are interested. I'd be more than happy to answer any questions you may have. Please feel free to e-mail me at: mnicolia@greenapple.com

Model: MH-A103 (Maha)

This amp is designed for use with any VHF band handheld or mobile transeiver with an RF output power rating of 2.5 to 5 watts to increase it's output to a nominal 50 watts and has a built-in GaAs FET receiver pre-amp.

Features
----
* 50 watt output with 2.5-5 watt input
* Low noise pre-amp
* Dual Mode (FM & SSB)
* SWR protection circuit
* Reverse DC power polarity protection

Specs

Frequency range: 144-148 MHz
Modes: SSB/FM
Input: 2.5-5 watts
Output: 50 watts
Receiver gain: 18 dB
Impedance: 50 Ohms
Connectors: Type M (SO-238)
DC Input: 13.8 Volts
Current Drain: 8 Amps (max)
Dimensions: 5.3" (W) x 1.7" (H) x 6.3" (D)
Weight: 2 lbs

There is more information about this product at:

http://www.maha-comm.com/products/poweramps/mh-a103.htm

Please contact me if interested (mnicolia@greenapple.com).

Hi all.. please be aware that ALL merchandise I ordered from Roly has arrived a little late, but AS STATED IN CONDITION STATED, People do sometimes have difficulties and we can't plan for the unexpected, so let's cut the guy some slack. I posted with a simple question: 'where did you go and what happened to your contact lines?' This apparantly sparked a rash of other postings, I assume, of a less than polite nature.... I hope it wasn't my posting that started it and if so, I do apologize to anyone affected. Roly, if you're out there...Thanks, and hope u resolve the problems, whatever they were and all turns out for the good.....
73 to all,
Randy

1389. FS:ICOM IC-551 6M rig (Excellant condx!!)

I have an excellant condition ICOM IC-551.
6M SSB/CW/AM rig (no FM board, FM was not good on this rig anyway!).
Has the rare optional PBT (pass band tuning) installed. 10 watts out.
Perfect working condition and about a 9 consmetically.
Very sensitive and selective, built in Noise Blanker, selectable AGC, dual VFOs, memories!
This rig has a REAL S-meter, not a light show! Very clean, not a TVI generator.

See it at http://radiodan.com/xcvrs/icom551.htm

Built in AC power supply. I have worked 42 states on 10 watts and an indoor dipole with this rig!
You can too!

(I can accept credit cards)

You must have never experienced FM on the 551, 10 watt or 551-D, 80 watt Icoms. The quality of FM is as good as the new radios of today.

Source record: 9117
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have two TM2400 radios. These are Kenwood 2.4ghz mobiles. They are based on the same chassis as the TM742 triband radios. The 2.4ghz modules take up two slots in the radio therefore you can add one more band using a standard TM742 band module. Kenwood only sells this model in Japan and they are no longer in production however you can still occassionally find them at isolated ham shops in Japan.

These are brand new, still in the box although I took one out just to look at it. I paid 13999 yen plus 5% consumption tax plus 10% import duty. That translates to $1364 at the exchange rate of 118 which is what it was when I bought them. I'll sell them for that price each plus shipping. I also have a mobile antenna and a base antenna which I will sell to whomever buys one of the radios.

Sorry I don't have a prop pitch motor to donate or sell, but I would like to mention that they sure are awesome rotors. My brother had one in the 60's from a B-29 which was very slow but very sure. The thing probably could have rotated the house if we could have figured out how to get it (the house) on top of the tower.

The 2.4ghz modules take up two slots in the radio therefore you can add one more band using a standard TM742 band module. Kenwood only sells this model in Japan and they are no longer in production however you can still occassionally find them at isolated ham shops in Japan.

These are brand new, still in the box although I took one out just to look at it. I paid 13999 yen plus 5% consumption tax plus 10% import duty. That translates to $1364 at the exchange rate of 118 which is what it was when I bought them (and about what it is now). I'll sell them for that price each plus shipping.
I also have a mobile antenna and a base antenna which I will sell to whomever buys one
of the radios.

I'm selling this receiver/transmitter combination on eBay at

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=45793183

I bought these receiver/transmitter pair about 5 years ago and used them for about a year before I moved to an apartment. At the time I boxed them up they worked great. A matching speaker is included in the price along with a morse-code keyer and a microphone (it doesn't have a stand though). I have the original manuals, boxes, and an advertisement (text included below) that ran in magazines when the radio was new.

I will pay shipping (which is about $35 due to the fact that the receiver and transmitter weight a bunch). For method of payment I would prefer a cashiers check. I will accept a personal check I'll wait for it to clear before shipping the goods. If the radio is DOA (dead on arrival) I'll refund your money.

Gordon Edwards, N4VPH

Here's the text from the advertisement (when it was new):

Kenwood developed the T-599D transmitter and R-599D receiver for the most discriminating amateur.

The R-599D is the most complete receiver ever offered. It is entirely solid-state, superbly reliable and compact. It covers the full amateur band, 10 through 160 meters, CW, LSB, USB, AM and FM.

The T-599D is solid-state with the exception of only three tubes, has built-in power supply and full metering. It operates CW, LSB, USB and AM and, of course, is a perfect match to the R-599D receiver.

If you have never considered the advantages of operating a receiver/transmitter combination... maybe you should. Because of the larger number of controls and dual VFOs the combinaton offers flexibility impossible to duplicate with a transceiver.

Compare the specs of the R-599D and the T-599D with any other brand. Remember, the R-599D is all solid state (and includes four filters). Your choice will obviously be the Kenwood.

1417. Power/SWR Meter (MFJ) FS

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure forward power as follows:
HF:
200 or 2000 watts Full Scale
HF:
2 or 20 watts FS
VHF (50-175 Mhz)
20 or 200 watts FS.

This should cover just about all your station power measuring/testing needs, I would think!

It's black metal with chrome trim. It's ery accurate and in near-perfect cosmetic condition. It dates from c. 1987. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers, You get the manual with it.

The price is $125

This is the forrunner of a newer model which encorporates cross needle
technonlogy and covers all the same frequencies and ranges. The newer model
sells for $85 and can often be found on sale at $10 or so off. Your price
is about $75 to $85 too high.

I have a VHF Visar that truly is 'as new' - no marks on it, and the original Motorola programming still in it except for two channel I programmed to
test with. It has the antenna and owner's manual; it does not have the full keypad option. I would like to trade it for a UHF Visar; preferably the mid-split, but high split is OK also. I would prefer to keep my battery etc., and you keep yours, but would consider including either battery(s) and/or nylon case for the right deal.

Regards,

Phil Barber

Last week i send out 875.00 in postal M/O for some gear.
I ask the clerk which would be the best way to ship, Why Priority Mail certified of course. it will be there by monday.......Well here it is Friday and it still didn't show up! Let me tell you this They cant track it . It is out there in Limbo somewhere...
I did purchase postal M/O But that is another story, if it is lost because of there
incompetence then im the one who has to suffer for 60 days before they issue a refund. Listen up.. You ship m/o best bet is overnight/insured make sure it has a tracking number that can be traced.
ANY ONE ELSE EXPERIENCE THIS WITH PRIORITY MAIL I'D LIKE TO KNOW...
thanks chris 73s

Yep. I sent my USPO Money order to Tom Kasey in Kentucky certified priority mail with return receipt requested and they never had him sign for it or send back the receipt. There is no record of anything. I made my inquiry to Louisvile and they sent back the form saying they never dealt with it. Of couse the MO was cashed so hopefully my recourse will be to claim that it was stolen from the mail since they just handed it to anyone there: assuming some postal employeee didn't rip it off and cash it himself! I am now dealing with it that way. I'll keep everyone posted on what happens. This will be a good lesson since this is the worst case scenerio that could ever happen to anyone. Keep looking for subject headers called "Kentucky RIPOFFS!

Ask the Post Office, priority mail is treated EXACTLY like first class mail.
When they say 2-3 days, that is actually their target for first class! Of
course there are no guarantees. The only time priority mail makes sense is
if the cost is less than the cost of regular first class. It sometimes is
and sometimes is not because its a flat fee whereas first class is so much
for each ounce after the first. If you are sending a letter or a MO or
such, dont be sucked into paying $3.00 for the same service 32 cents will
buy !!!!

I just sent two packages to the same address from CA to AL. One was sent
on Tuesday and cost $11.00 to mail priority. It arrived on thursday in
great shape. The other was heavy and cost $31.00 to mail on wednesday
and it arrived on friday in great shape. Two days in both cases and with
great service from USPS people and not an AK-47 in sight :) . I have
stories about big brown that will give you the shudders.

I have heard of these stories for years and know that a good many of them are true. However, I have to stop and think about how much "stuff" the USPS handles in a year and by percent how small the problems are.

The boys in the brown trucks are very picky about what they will and will not ship, not the USPS. I know there have been and will be problems but, I still feel the best job for the money is the USPS. And, they don't stop in the middle of the street and block traffic while they unload.....I know it's a pet peeve.

Hi.

I have following items for sale;

1. TS-830S
Serial # is 1 million.
Cosmetic condition is 9.5 out of 10 scale. No visible scratch anywhere.
Electrical condition is 10 out of 10. No filter installed.
6146B finals are in perfect condition and I cleaned all switches with
Pro-Gold contact cleaner few months ago.
Comes with original box and manual, but no mic.
Price is $360 in US fund.

2. TS-530S
Serial # is 1 million.
Cosmetic condition is about 8.5 out of 10 scale. No major scratches but

some dings on the bottom of the case near feet.
Electrical condition is 10 out of 10. No filter installed.
Comes with original manual and hand mic (not original).
Price is $320 in US fund.

3. Drake C-Line
R4C has serial # 17xxx. 4 position mode selector model.
500Hz filter included.
No mod has been done on this unit.
Cosmetic condition is about 8 out of 10.
Electrical condition is 9.9 out of 10 (because of the age of the
receiver).
T4XC has serial # 27xxx
Cosmetic condition is about 9.5 out of 10.
Electrical condition is 10 out of 10 (low hours on this transmitter)
with AC-4 and MS-4 included, but no mic.
Price for the whole set is $400 in US fund.

4. Murch UT-2000B 2kW tuner with meter.
This tuner handles 2kw, and has meter on it.
Appearance is about 7 out of 10, but it works perfect.
It had a little crack on the edge of ceramic core of center coil, but I
repaired it professionally. Electrical condition is 9.9 out of 10.
Price is $100 in US fund.

All prices do not include shipping. I normally use Canada Post (same as

US Postal Service) and I will pack it nicely when I ship.

If interested, please call or e-mail me. Thanks and 73.

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure power as follows:

HF - 200 or 2000 watts Full Scale.
HF - 2 or 20 watts FS.
VHF (50-175 Mhz) - 20 or 200 watts FS.

NOTE: Each measurement module has its own set of input and output "UHF" connectors, so no fiddling is necessary to measure the power output from different radios

Its case is black metal with chrome trim--no plastic! It's very accurate and in near-perfect cosmetic condition. It dates from 1983. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers in 1987. You get the manual with it.

Total original cost in 1983 dollars: $240 You pay $150.

Model HD1418 Active Audio Filter -- dates from 1988.

Assembled solid-state unit in mint condition. Attractive design. Has bandwidth settings for CW, SSB, and RTTY. The CW filter includes a tunable notch/peak filter with variable BW. The unit also has high and lowcut capabilities to get rid of "rumble" and "hiss". It has its own audio amplifier.

Very dark brown metal with red and white lettering--no plastic! Coordinates with the Heathkit rigs of the era. In perfect cosmetic condition. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers shortly after I assembled it. You get the manual with it.

Asking $100

Hi.

I have following items for sale;

1. TS-530S
Serial # is 1 million.
Cosmetic condition is about 8.5 out of 10 scale. No major scratches but

some dings on the bottom of the case near feet. Front panel is in
perfect condition.
Electrical condition is 10 out of 10. No filter installed.
Comes with original manual and hand mic (not original).
Price is $320 in US fund.

2. Lafayette HE-30 general coverage receiver
Covers all HF and MF bands. It has band spread and BFO.
Cosmetic condition is about 9 out of 10. It is in very good condition.
Electrical condition is 10 out of 10. Perfect working order.
comes with original manual. All tubes have been checked OK with TV-7.
Price is $80 in US fund.

3. Murch UT-2000B 2kW tuner with meter.
This tuner handles 2kw, and has meter on it.
Appearance is about 7 out of 10, but it works perfect.
It had a little crack on the edge of ceramic core of center coil, but I
repaired it professionally. Electrical condition is 9.9 out of 10.
Price is $100 in US fund.

All prices do not include shipping. I normally use Canada Post (same as

US Postal Service) and I will pack it nicely when I ship.

If interested, please call or e-mail me. Thanks and 73.

Well, after another deal fell through, I have a box of tubes to sell. I'm unsure of their worth.

1 GE 17JB6A
1 GE 1G3GTA/1B3GT
2 RCA 10JT8
2 RCA 12BE6
1 RCA 15KY8A
1 RCA 2ILU8
1 RCA 42KN6
1 RCA 5814A
2 RCA 5JL6
1 RCA 5U4GB
1 RCA 6AY3B
1 RCA 6EH7/EF183
1 RCA 6EJ7/EF184
1 RCA 6GE5
1 RCA 6GH8A
1 RCA 6GJ7/ECF801
1 RCA 6HM5/6HA5
2 RCA 6JT8
1 RCA 6JZ8
1 RCA 6U8A/6KD8
1 Realistic GoldClad 17JB6A
1 Realistic GoldClad 6GK6
1 Realistic GoldClad 6LT8
1 Sylvania 3A3B
1 Westinghouse 1G3GT/1B3GT

I would like to sell the whole box, but would consider splitting.
E-mail with best offer- TVSJR@SPRYNET.COM

If you reply to the ng, I may not receive- my ISP's news server has been really bad about "losing" things lately.

Thanks!
Terry

the po has lost 2 of my packages in the last 4 years or so, but considering i handle about 3-4 a week, I'd say this is not bad. I have had too many problems with UPS to ever consider using them. They do lose stuff, but more often, it is abused, and sometime totally destroyed during shipment. The po has yet to damage one of my packages. I'd prefer the less than 1% dissapearance rate of the USPS, to the 5% damage rate of UPS.
Of course, this is only me personal experience, but it is true. I always insure everything. It just makes it easier to accpet a loss. And as far as speed, for the money, i prefer priority mail, and it usually is within 2-3 days like they say. It is cheaper than going to my local mailboxes USA place, and having them send it UPS. The UPS place that is closest to me, is not really close.

Just my $.02, YMMV.

1478. RCA lowband/6 meter equip. FS

Newsgroup: rec.radio.amateur.swap
Date: 1998-12-13 00:00:00 UTC

Lowband/6 meter equipment for sale:

RCA Series 1000 mobile radio, model CMFM7MMRNC. 100 watts, presently on 39.xxMHz. Complete system with 4 frequency scanning control head & bracket, speaker, mic, mounting tray, and control/power cable. Has optional noise blanker option. Also includes complete, original RCA 700/1000 series lowband service manual set in three ring binder. Clean, complete, working when pulled a couple years ago. $75.

RCA 'Supercarfone' mobile, model CMFA50N2TT. 50 watts, 45-54MHz split, presently on 47.98. Complete system with 4 frequency 'integrated' control head with mtg bracket, speaker with mtg bracket, mic, mic hangup box, mounting tray, control and power cables. Also includes complete, original RCA Supercarfone/Superfleetfone lowband service manual set. Radio is very clean, head and cables complete, but a little dirty and worn. Working when pulled a couple years ago. $60.
Both for $115.

Equipment is in southern NH; I would be glad to show it if you're in the area. Prices plus shipping. Check in advance or COD (at cost) are both fine.

I have a SG-2000 with PowerTalk upgrade.
Electrical condition is 10 out of 10, and cosmetic condition is 9 out of
10.
All manuals and mic with this fine radio but no original box.
Please make an offer. No reasonable offer will be refused.
Thanks and happy holidays.

SG-2000 with PowerTalk control head.
Electrical condition is 10 out of 10, but cosmetic condition is 9
out of 10.
Some wears on edges and corners (no major though).
Comes with all mounting bracket and manuals.
Perfect radio for any type of mobile operation.
Price is $1300 in US fund plus shipping.
Thanks.

1490. 2m/440MHz gear and Cushcraft R-5 vertical HF antenna for sale

Newsgroup: rec.radio.amateur.swap
Date: 1998-12-16 00:00:00 UTC
From: Jerry Bransford <jerrypb@home.com>
Message-ID: <36773A13.291B@home.com>
Source record: 9011
Cross-posted to: rec.ham-radio,rec.ham-radio.packet,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.amateur.packet,rec.radio.amateur.equipment,

1) Standard (brand) "Twin Bander" (Dual Band) 144 MHz/450 MHz FM Transceiver. Includes optional 100 channel memory upgrade. Can also be used for repeater or packet duties. All controls are on the microphone so you can mount the main unit anywhere in your car or truck. It includes the 2m extension cable between the microphone/controls and the main unit. It works perfectly and looks near new. It's never been abused. It has been modified so it can transmit/receive on Civil Air Patrol frequencies. It is made for mobile use so it needs 12 volts DC to operate on. It has around 50 watt output and can receive from 118 MHz to over 800 MHz in addition to the ham and CAP bands. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible.

2) ICOM IC-W2A Dual Band FM hand-held Transceiver. 5 Watts output. Also modified for use on the CAP bands that have no negative effect on normal operations. This also receives outside the hambands too and includes 118 to over 800 Mhz. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible. This unit can also operate packet. 60 memory channels.

3) Cushcraft R-5 HF Vertical antenna. Perfect for the 10M band now coming back alive. This unit is near-new, since it was only installed a couple hours before a neighbor threatened to sue me over it (CC&Rs). Please, no comments on that LOL... I dealt with that some time back. I don't recall the specific bands this antenna works but 10/15/17/20 come to mind.

If you don't want to spend cash, I will negotiate for certain items I want you can buy off your credit card and ship to me in exchange.

Please, PLEASE... don't contact me UNLESS you are serious about buying one or more of the above units, I get too much email as it is. I'll accept best offers for them all. $350 minimum for the Standard, $300 for the ICOM, $150 for the Cushcraft. You pay shipping costs.

73,

Jerry Bransford

Better to go with Express Mail if you want a tracking number. With that,
you can track your package via the USPS web site. I've followed packages
all the way across the country with that thing...!

In article <36686FCD.5DDEA034@bellsouth.net>, ni4l@bellsouth.net says...
> Last week i send out 875.00 in postal M/O for some gear.
> I ask the clerk which would be the best way to ship, Why Priority Mail
> certified of course. it will be there by monday.......Well here it is
> Friday and it still didn't show up! Let me tell you this They cant track
> it . It is out there in Limbo somewhere...
> I did purchase postal M/O But that is another story, if it is lost
> because of there
> incompetence then im the one who has to suffer for 60 days before they
> issue a refund. Listen up.. You ship m/o best bet is overnight/insured
> make sure it has a tracking number that can be traced.
> ANY ONE ELSE EXPERIENCE THIS WITH PRIORITY MAIL I'D LIKE TO KNOW...

Hi folks,

I have lots of web space available and would be very happy to share my site
and skills in putting up a small WebSite for your HAM related products that
YOU offer to us all. Products, Services, Tips, etc??
I know it sounds crazy, but I will put up and maintain a site, makes changes
and updates when you want ALL FOR FREE!!
See http://radiodan.com/aa6ee/
As an example of one such site I have put up for a guy who sells books and
CD's at discount to us all.
Another example is http://radiodan.com/IIX/
E-mail these guys if you have any questions about the authenticity of my
offer!

Merry Ho Ho Ho!!!

E-mail me if you have any questions.

I avoid US Mail when possible, for many reasons; crushed boxs, jeep tracks etc. I like FedX as first choice, and UPS 2nd choice. Tracking is very important!

This isn't very encouraging, Paul! It's been a week since I sent a "flat-rate" envelope via Priority Mail from my local Maryland post office to a Post Office Box in Florida. It still has not arrived, despite assurance from the postal clerk when it was sent that "it will arrive there in 2 days". Now, another trip back to the post office to wait again in line for 1/2 hour, fill out forms necessary to "trace" it, and "hurry up and wait" until they report they can't find it. Some priority!

The 2-3 days applies to "most letters". The post office will tell you nothing is guaranteed. They of course, dont offer this information up front.

GL on the tracing. I have not heard anything. The person on the other end did get his part of the paper work to sign stating he never received the package...but that is it.

Hi Gang,

I have a TS-930SAT (Auto-tuner), w/250 Hz CW filter in excellent condition both cosmetically and electrically. The 930 has an absolutely great signal processor to give you great SSB, an with the 250hz filter you can really pick out the signals during QRM. Asking $750.00 + shipping.

e-mail direct if interested.

I sent a radio to K0XM in Kansas from Winter Haven Florida via priority mail on 1Dec98. It has not been delivered yet. The post office has a form to fill out and they claim they will look for the package...but I have already sent the money back for the radio.

It's UPS or Fedex for me. The USPS will get no more of my business.

how do you pack your stuff? i havent had a single problem with USPS yet. when i'm done packing something up you can heave the box across the livingroom without fear of breakage providing its no heavy enough to destroy the packing material. i recvd some pretty lousy examples of packaging from some folks and some well packed items from others. for labels i use bright yellow post-its that are stuck to the package using clear 3M heavy duty tape, you can spot the label from across the room.

i have a buddy who works at miami international and he's witnessed packages from UPS going into the dumpster just because it fell off the conveyor and onto the floor, worst of all its been their supervisors doing it!

i have yet to deal with fed-ex but dont think i will since their prices arent too competitive.

I have some Heil BM-10 headsets NEW for $40 each with #5 (full range element).
Also have some Heil HM-10 mics with #5 elements NEW with cable and clip ready for your stand. These look like a singers mic and are very high quality. $40 each.

As of now I still have some Yaesu and Kenwood wired versions although it is the same connector and just needs rewiring if I don't have the one for your brand when you call.

I have a few cable adapters for Heil Prosets at $10 each. Collins, Yaesu, Kenwood
And a very few Heil B4K microphone boom with #4 DX element, This unit replaces the entire boom mic on a BM-10 headset, and has the 8 pin plug, 1/4 jack and cable. Usually the guys use this to switch between contest and DX #4 element and the regular ragchew #5 element, $25 for this unit, again NEW! Plus ship. Credit cards OK

Todd:

How is it they have perfect cellular capabilities? I didn't think the
BC9000 was capable. Isn't it the UBC9000, or something like that?

Thanks,
Bill Crocker

Wattmeter is in great condition. Was checked out by technician in 96 and
found it to be in great working order. I just do not have a need for this
nice of meter anymore..
Comes with
4410-3 2-30 mhz
4410-5 25-80 mhz
4410-6 50-200 mhz
4410-8 200-1000 mhz
operational from 200mw-1kw
Leather case hold meter and 6 elements

300.00 shipped
taspicer@danville.net

For what it's worth;

I repair amplifiers so I go through a LOT of
sweep tubes....

I currently get ALL my sweep tubes from Bob.

I have tried various other vendors but Bob
consistantly provides me with better tubes at a
lower cost than the other vendors did...

I hope everyone on this newsgroup has a safe,
happy, and healthy holiday!

Dennis

I got sooo many responses to the BM-10 headsets (all sold out now, thanks!)
that I dug around the warehouse and came up with 4 dusty boxes with HEIL
BM-5 desk mics. BRAND NEW in box.
I have only 2 for Kenwood, 1 for late model (8 pin) ICOM, and 1 for Yaesu.
All with 8 pin plugs.
These are very nice units with goose neck and ptt bar on smart looking base.
All have #5 element for natural sounding audio.

$50 each + ship.

First payment (credit card OK) and shipping info gets choice.
Also, still have some HM-10 mics (looks like singers mic) with same #5
element and cable/connector for only $40 + ship NEW!
And a few B4K (Kenwood) and 1 B4Y (Yaesu) boom mics complete with cable and
connector for the BM-10 headset. This has the DX #4 element and can be
simply installed by removing the original boom so you can easily have a #4
and a #5 element boom available for DX/contest use or regular ragchewing.
NEW $25 + ship.

Phone on Thursday OK 800 995-2929 or e-mail

Hi folks,
An announcement about the new HENRY reflector on contesting.com.
Here's how to join the group! We talk about anything related to HENRY Amplifiers.
Address a new e-mail to majordomo@contesting.com

In the body (NOT subject) of the message simply type subscribe henry

When you get the confirmation back, just copy and paste into a new e-mail the authorization information.

You will get another confirmation that you are all set and welcome to the list! Then, after you're all set-up just type henry@contesting.com to post new messages.

Hope to see all HENRY enthusiasts there!

Hi,
Well, I'm giving it up in lieu of a new computer....

NEVER MOBILE

Yaesu FT900AT
auto freq. tracking tuner built in
modded for MARS/CAP
all the normal base model stuff....
no scratches or dents, works great!
Purchased new in 1995 from AES, (I even have the reciept.. over $1300!!)
Radio, manual, hand mike, box, papers to include factory mods, etc...
factory filters
Priced at $775, uship, No trades, please....
Please reply via EMAIL
Picture emailed on request and this one will have to be prepay, so
references available, too, from these groups even!
thanks for the time and space,
Randy, KC8CPK

I am in search of a DTMF palm microphone for the Radius/Maxtrac line of radios. I have a Spectra Desk Mic in great condition which I would like to trade. Any one interested?

Also, does anyone have the fourth-row DTMF modification for the DTMF moto mics?

Please reply via e-mail TVSJR@SPRYNET.COM because my ISP has been dumping a bunch of news lately.

Thanks!
Terry

1549. FS:IC-2SRA(2mtr Transceiver+Scanner)

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Brief Specifications;
Transceiver
Transmit : 140-150 MHz
Receive : 138-174 MHz
Output Power : 0.5 to 5 Watts (4 levels)

Scanner
Freq. : 25-950 MHz (Continuous, NO GAP)
Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
2 Antennas (one for Tranceiver and one for Scanner),
and Manual. but no orginal box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $325.00 U.S. plus shipping.

Happy New Year, 73.
Robin

I need 3 or 4 good 6SK7 tubes, prefer NOS but good used are acceptable.
I have some 6SG7GT NOS for trade. Also have many other tube types if
you want to trade for something other than 6SG7s let me know what you
need. Thanks,

Mark W6LKV

During a recent move to a new house I found several items I no longer need
and that are taking up space. I have the following for sale:

1. Regency TRH-202 mobile VHF 2 ch ($100)

2. Maxon SM-4150 VHF 16 ch ($225)

3. Motorola Convert-A-Com for MX300 series portables ($50)

4. Motorola Saber rapid charger ($100)

5. Federal Signal 100w compact siren speaker ($60)

6. Uniden Force rapid charger APX 111B ($25)

7. Motorola rapid charger NLN6895A for HT-220 ($25)

All prices are plus shipping from St. Louis metro area.
Feel free to contact me for further information, serial #'s, etc.

Mounting Kenwood 741 in new car. The Radio unit has a nice home under seat,
but cant hear it... Anyone have a used Motorola speaker?
Preferably black....
Thanks
taspicer@danville.net

1555. FS: Knight R100A Receiver, $75 plus shipping

Newsgroup: rec.radio.amateur.swap
Date: 1998-12-31 00:00:00 UTC

I have a Knight Kit R-100A reciever, with a nice copy of the manual for sale. It doesn't have the S-meter option, but it is in good shape. I put photos on my web page. The URLs are:
http://www.wwc.edu/~frohro/Knight/R100A.jpg and
http://www.wwc.edu/~frohro/Knight/R100A_back.jpg
I'd like $75 plus shipping from 99324. If you don't think this is a fair price, make me an offer.

73,

Rob, KL7NA/W7
